About the backup battery

- Do not replace the battery with a battery of a different type. Doing so may result in a backup battery leakage or other problems.

Knowing when to replace the battery

- The date is not displayed when the battery is weak; the current time will not be displayed.
- Replace the battery with a 3V lithium battery. Use of another battery may cause a battery explosion.

Replacing the battery

- There is a danger of explosion if the battery is replaced with the incorrect type. Replace only with the same or equivalent type.
- There is a danger of battery leakage and corrosion if the battery is replaced with an incorrect type.

When to replace the batteries

- Replace the battery when the remote no longer operates the unit. The battery last for about 6 months. When the remote no longer operates the unit, replace the battery.

Replacing the battery

- You can play tracks repeatedly or in random order. You can change the playback mode by pressing the MODE button.

Improving the reception

- If FM stereo reception is poor, change to "FM MONO" mode (See "Presetting your favorite station").

Setting the clock for the first time

- The clock is set to the current 12-hour time.

Playing a CD

- There is a danger of battery leakage and corrosion.

Listening to the radio

- Setting the clock for the first time

- The clock is set to the current 24-hour time.

Listening to the sound from a connected optional digital music player

- Setting the clock for the first time

- The clock is set to the current 24-hour time.

When carrying the unit

- Setting the clock for the first time

- The clock is set to the current 24-hour time.

Unlocking the CD mechanism

- Setting the clock for the first time

- The clock is set to the current 24-hour time.
