Wireless Audio System

Operating Instructions
AIR-SA20PK

© 2008 Sony Corporation
WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

To reduce the risk of fire, do not cover the ventilation opening of the apparatus with newspapers, tablecloths, curtains, etc. Do not place the naked flame sources such as lighted candles on the apparatus.

To reduce the risk of fire or electric shock, do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on the apparatus.

As the main plug is used to disconnect the unit from the mains, connect the unit to an easily accessible AC outlet. Should you notice an abnormality in the unit, disconnect the main plug from the AC outlet immediately.

The unit is not disconnected from the mains as long as it is connected to the AC outlet, even if the unit itself has been turned off.

Do not install the appliance in a confined space, such as a bookcase or built-in cabinet.

Do not expose batteries or apparatus with battery-installed to excessive heat such as sunshine, fire or the like.

The nameplate is located on the bottom exterior.

Notice for the customers in the U.S.A.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

AIR-SA15Ti:
The following indications are located on the AC power supply unit.

AIR-SA15R:
The following indications are located on the bottom exterior.
Owner’s Record
The model and serial numbers are located on the bottom of the unit. Record these numbers in the space provided below. Refer to them whenever you call upon your Sony dealer regarding this product.
Model No. ________________
Serial No. ________________

Important Safety Instructions
1) Read these instructions.
2) Keep these instructions.
3) Heed all warnings.
4) Follow all instructions.
5) Do not use this apparatus near water.
6) Clean only with dry cloth.
7) Do not block any ventilation openings.
   Install in accordance with the manufacturer’s instructions.
8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11) Only use attachments/accessories specified by the manufacturer.
12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13) Unplug this apparatus during lightning storms or when unused for long periods of time.
14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
The following FCC statement applies only to the version of this model manufactured for sale in the U.S.A. Other versions may not comply with FCC technical regulations.

NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

CAUTION
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

For the wireless transceiver (EZW-RT10)
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.
This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65.
This equipment should be installed and operated with at least 20cm and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).
Notice for the customers in Canada
For the wireless transceiver (EZW-RT10)
This device complies with RSS-Gen of IC Rules.
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
This equipment complies with IC radiation exposure limits set forth for uncontrolled equipment and meets the RSS-102 of the IC radio frequency (RF) Exposure rules.
This equipment should be installed and operated with at least 20cm and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).

Features

The AIR-SA20PK is an “S-AIR” compatible packaged product that consists of one S-AIR main unit AIR-SA15Ti and two S-AIR sub units AIR-SA15R. Connecting the S-AIR main unit (hereafter called “Main unit”) with the S-AIR sub units (hereafter called “Sub units”) using “S-AIR” technology, you can use each unit in a remote location.

For example, you can install the sub units, one in the study room and the other in the bedroom, and then install the main unit in the living room. You can then listen to the music from the main unit located in the living room by controlling the sub units. You can also connect the main unit to an optional AV system (such as a TV), and on this optional AV system you can enjoy audio, video and photo contents of an iPod which is connected to the main unit.

S-AIR (Sony Audio Interactive Radio frequency)

Recent times have seen the rapid spread of DVD media, Digital Broadcasting, and other high-quality media.

To ensure that the subtle nuances of these high-quality media are transmitted with no deterioration, Sony has developed a technology called “S-AIR” for the radio transmission of digital audio signals with no compression, and has incorporated this technology into the EZW-RT10.

This technology transfers digital audio signals with no compression using the 2.4 GHz band range of ISM band (Industrial, Scientific, and Medical band), such as wireless LANs and Bluetooth applications.
Unpacking

Check that you have all the following items.

**Main unit**

- Main unit (AIR-SA15Ti) (1)
- Wireless transceiver (EZW-RT10) (1)*
- Remote (RM-ANU05) (1)
- R03 (size AAA) batteries (2)*

**Sub unit**

- Sub unit (AIR-SA15R) (2)
- Wireless transceiver (EZW-RT10) (2)*
- Remote (RM-ANU046) (2)
- R03 (size AAA) batteries (4)*

**Others**

- Operating Instructions (this manual) (provided in each language)
- Warranty (1 for customers in the USA, 1 for customers in Canada)
  - For customers in the USA: Use “LIMITED WARRANTY” card warranted by Sony Electronics Inc.
  - For customers in Canada: Use “Consumer 1 Year Warranty” card warranted by Sony of Canada Ltd.

* The same type of wireless transceivers and batteries are used for the main unit and the sub units.
Guide to parts and controls

Main unit (AIR-SA15Ti/Wireless Audio Transmitter)

Front panel

Rear panel
Remote for the main unit (RM-ANU045)

1 ILLUMINATION (33)
Press to change the illumination brightness.

2 BAND (27)
Press to select FM or AM reception mode.

3 SYSTEM MENU (22, 25, 28, 37)
Press to enter the system menu.

4 POWER indicator (20)
Lights up when the main unit is turned on.

5 iPod connector (19, 25, 29)
Place an iPod on the connector to listen to audio contents stored in the iPod. You need to connect the supplied iPod Dock Adapter first to use an iPod. For details on the supplied iPod Dock Adapters, refer to the instructions supplied with the iPod Dock Adapters.

6 S-AIR indicator
Lights up when the main unit is turned on with the supplied wireless transceiver inserted.

7 Unit: TUNING/SELECT +/- (22, 25, 27, 28, 37)
Press to tune in the desired station. Press to select a menu item.
Remote: TUNING +/- (27, 28)
Press to tune in the desired station.

8 ENTER (22, 25, 28, 37)
Press to enter the settings.

9 Illumination (33)
You can change the brightness using ILLUMINATION 1.
10 Display (13)

11 Remote sensor

12 ANTENNA jacks (18, 19)
Connect the supplied FM lead antenna and AM loop antenna.

13 POWER switch (20, 34)
Switch for turning the main unit on or off.

14 iPod AUDIO OUT L/R jacks (29)
iPod VIDEO OUT jack (29)
Connect an optional AV system, such as a TV, etc.

15 S-AIR ID selector (19, 20)
Select the S-AIR ID to connect with the sub units.

16 PAIRING button (22)
Press to perform pairing.

17 EZW-RT10 slot (19)
Insert the supplied wireless transceiver.

18 Buttons for controlling an iPod

▶⏸ (play/pause) (26)
Press to start or pause playback.

⏮∥⏭∥ (26)
Press to skip to the previous/next track. Hold down to find a point in a track.

MENU (26)
Press to return to the previous menu. Works much like the Menu button on the iPod.

佞/_GENER (26)
Press to select a menu item or track for playback.

ENTER (26)
Press to execute the selected item or play the selected track.

19 PARTY CH (25, 27, 29)
Press to select the sound source when the S-AIR mode is set to “PARTY.”

20 S-AIR MODE (25)
Press to select the S-AIR mode.

21 Battery compartment lid (20)
22 PRESET +/— (29)
Press to select a preset station.

23 DISPLAY (25, 30)
Press to view the information on the display.

Display

1 S-AIR mode indicator (25)

2 PAIRING indicator (21)

3 Text information

4 Tuner reception mode (27)
Tuner reception (27)

Sub unit (AIR-SA15R/Wireless Speaker System)

Front panel

Rear Panel
Remote for the sub unit (RM-ANU046)

1. \(\text{I/} (\text{power}) (20, 32, 37)\)
   Press to turn on or off the sub unit.

2. STANDBY indicator (34)
   Lights up when the sub unit is turned off.

3. S-AIR CH (26, 28, 29)
   Press to select the S-AIR channel of the connected main unit.

4. \(\text{play} (26, 32)\)
   Press to start or pause playback of an iPod connected to the main unit.

5. \(\text{pause} (26)\)
   Press to pause or start playback of an iPod connected to the main unit.

6. \(\text{/CANCEL (stop/cancel)} (26, 37)\)
   Press to pause playback of an iPod connected to the main unit.

7. \(\text{PRESET +/— (29)}\)
   Press to select a preset station.

8. \(\text{DISPLAY (30, 33, 37)}\)
   Press to display the information of the connected main unit or clock in the display.

9. \(\text{SLEEP (31)}\)
   Press to set the Sleep Timer.

Continued
CLOCK TIMER/MENU (23, 31)
Press to set the clock and the Daily Timer.

VOLUME +/- (26, 31, 33)
Press to adjust the volume.

S-AIR indicator (21)
Lights up while the sub unit is connected to the main unit.
Flashes when the sub unit is not connected to the main unit.

Remote sensor

Display (17)

(headphones) jack
Connect optional headphones.

S-AIR ID selector (19, 20)
Select the same S-AIR ID as the main unit.

PAIRING button (22)
Press to perform pairing.

EZW-RT10 slot (19)
Insert the supplied wireless transceiver.

Battery compartment lid (20)
**Display**

1. Timer indicator (31)

2. Text information

3. Wireless strength
   Indicates the S-AIR signal strength.

4. Play/Pause

5. PAIRING indicator (21)
Getting Started

Hooking up the system

Main unit

- **A** AM loop antenna
- **B** FM lead antenna (Extend it horizontally.)
- **C** White side for North American model
- **D** Brown side for other models
- **E** Wireless transceiver

Sub unit

- **A** AM loop antenna
- **B** FM lead antenna (Extend it horizontally.)
- **C** White side for North American model
- **D** Brown side for other models
- **E** Wireless transceiver

*Wall socket*
A Wireless transceiver
Insert the supplied wireless transceiver (EZW-RT10) securely into the EZW-RT10 slot on the rear panel of each unit. Check the orientation of the ▼ mark when inserting the supplied wireless transceivers (EZW-RT10). Failure to do so may result in damage to the unit.

Notes
• Make sure to turn off the main unit and the sub units when inserting or removing the supplied wireless transceivers (EZW-RT10). Failure to do so may result in damage to the unit.
• Do not touch the terminals of the supplied wireless transceivers (EZW-RT10).
• Do not insert any device other than the supplied wireless transceivers (EZW-RT10) into the EZW-RT10 slot.

B S-AIR ID selector
Set the same S-AIR ID for the main unit and the sub units. For details on setting the S-AIR ID, see “Establishing the S-AIR connection” (page 20).

C FM/AM antennas
Find a location and an orientation that provide good reception, and then set up the antenna. Keep the antennas away from the power supply cord to avoid picking up noise.

D Power
Connect the power supply cord and the power cord to a wall socket.

To use the iPod
Insert an iPod Dock Adapter into the iPod connector on the main unit before use. For details on the supplied iPod Dock Adapters, refer to the instructions supplied with the Dock Adapters.

To remove the iPod Dock Adapter, pull it up with your fingernail or a flat object using the slot inside the adapter.
To use the remote
Slide and remove the battery compartment lid, and insert the two supplied R03 (size AAA) batteries, side first, matching the polarities shown below.

Remote for the main unit (RM-ANU045)

Notes on using the remote
- With normal use, the batteries should last for about six months.
- Do not mix an old battery with a new one or mix different types of batteries.
- If you do not use the remote for a long period of time, remove the batteries to avoid damage from battery leakage and corrosion.

Establishing the S-AIR connection
You can easily establish the connection by setting the same S-AIR ID for the main unit and the sub units.

1 Check that the wireless transceivers are inserted securely to the main unit and the sub units (page 19).

2 Turn on the main unit and the sub units.
   - **Main unit**
     Set the POWER switch on the rear panel to “ON.”
     The POWER indicator on the unit lights up.
   - **Sub units**
     Press I/Ω.

3 Set the same S-AIR ID for the main unit and the sub units.
   - **Main unit**
     Set the S-AIR ID selector on the rear panel to the desired S-AIR ID.
   - **Sub units**
     Set the S-AIR ID selector on the rear panel to the same S-AIR ID as the main unit.

Tip
The S-AIR ID is set at the factory to “A.”
4 Confirm the connection status.
Once the connection between the main unit and the sub units is established, the S-AIR indicators on the sub units light up and “LINKED” appears in the displays of the sub units for about 2 seconds.

Tip
Up to 10 sub units (sold separately) can be connected with the main unit.

Identifying the main unit with a specific sub unit (Pairing operation)
It is easy to set the same S-AIR ID for the main unit and the sub units to establish the connection. However, if a neighbor has an S-AIR main unit with the same S-AIR ID as your S-AIR main unit, you may be able to hear the audio transmitted from your neighbor’s S-AIR main unit on your system. To prevent this, you can identify the main unit with a specific sub unit by performing the pairing operation.

Before pairing
The connection is established by the S-AIR ID (example).

<table>
<thead>
<tr>
<th>Your system</th>
<th>Neighboring system</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main unit</td>
<td></td>
</tr>
<tr>
<td>ID A</td>
<td></td>
</tr>
<tr>
<td>Sub unit A</td>
<td></td>
</tr>
</tbody>
</table>

After pairing
The connection is established between the paired main unit and sub unit.

<table>
<thead>
<tr>
<th>Your system</th>
<th>Neighboring system</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main unit</td>
<td></td>
</tr>
<tr>
<td>ID A</td>
<td></td>
</tr>
<tr>
<td>Sub unit A</td>
<td></td>
</tr>
</tbody>
</table>
1 Place the sub unit to be paired near the main unit.
   Pair the main unit with the sub units one at a time.

2 Check that the power of the main unit and the sub unit are turned on.

3 Check that the S-AIR ID of the main unit is the same as the S-AIR ID of the sub unit.

4 Press the PAIRING buttons on the rear panel of the main unit and the sub unit using a pointed object.
   When pairing is performed, the displays on both the main unit and the sub unit change as follows:
   “PAIRING” → “COMPLETE”

To cancel pairing
Change the S-AIR IDs of the main unit and the sub unit to different S-AIR IDs.

To stop the pairing operation midway
Press the PAIRING button again.

To pair the main unit with multiple sub units
Repeat steps 1 through 4.

If the S-AIR connection is unstable
Since the S-AIR product uses radio waves that share the same frequency (2.4 GHz) as other wireless systems, such as wireless LAN or Bluetooth devices, interference or poor transmission may result if you use other wireless systems near the main unit and/or the sub units.
In this case, the connection may be improved by changing the RF CHANGE (Radio Frequency Change) setting on the main unit.

1 Press SYSTEM MENU on the unit.

2 Press TUNING/SELECT +/- on the unit repeatedly until “RF CHG” appears, then press ENTER on the unit.

3 Press TUNING/SELECT +/- on the unit repeatedly to select the desired setting.
The default setting is underlined.

**AUTO:**
Normally select this setting. The main unit changes the RF CHANGE setting to “ON” or “OFF” automatically.

**ON:**
The main unit transmits sound by searching for the best channel for transmission.

**OFF:**
The main unit transmits sound using a fixed channel for transmission.
When you select this setting, select the S-AIR ID that provides the best connection.
4 Press ENTER on the unit to exit the system menu.

### Setting the clock of the sub units

Use buttons on the unit to set the clock.

1 **Press I/○** to turn on the unit.

2 **Select the clock set mode.**
   Press CLOCK/TIMER MENU. If the current mode appears on the display, press ◀/▶/◀/▶ repeatedly to select “CLOCK,” and then press CLOCK/TIMER ENTER.

3 **Set the time.**
   Press ◀/▶/◀/▶ repeatedly to set the hour, and then press CLOCK/TIMER ENTER. Use the same procedure to set the minute.

**Note**
The clock settings are canceled when you disconnect the power cord or if a power failure occurs.
Operations

Selecting the S-AIR mode

When connecting to multiple sub units, you can listen to different sound sources on each sub unit (MULTI SOURCE mode) or to the same sound source on both sub units (PARTY mode) by selecting the S-AIR mode accordingly. Use the main unit to set the S-AIR mode.

■ MULTI SOURCE mode

Main unit and iPod

Study room

Bedroom

Sub unit

Sub unit

iPod

iPod
Press S-AIR MODE on the remote repeatedly until the desired S-AIR mode indicator lights up in the display. The default setting is underlined.

**MULTI SOURCE:**
Select this setting to listen to different sound sources on each sub unit.

**PARTY:**
Select this setting to listen to the same sound source on multiple sub units.

**To select the S-AIR mode from the system menu**

1. Press SYSTEM MENU on the unit.
2. Press TUNING/SELECT +/— on the unit repeatedly until “MODE” appears, then press ENTER on the unit.
3. Press TUNING/SELECT +/— on the unit repeatedly to select “MULTI” or “PARTY,” then press ENTER on the unit. The selected S-AIR mode appears on the display.

**To check the S-AIR mode when the display of the main unit is turned off**
Press DISPLAY on the remote.

**Notes**
- When you change the S-AIR mode, the iPod channel is automatically selected for the connected sub units.
- When connecting the main unit to an S-AIR sub unit (such as the AIR-SA10) which is not compatible with the MULTI SOURCE mode, set the main unit to the PARTY mode. You can then select the S-AIR channel from the S-AIR sub unit.

**Listening to iPod music using the S-AIR connection**

Use the sub units to listen to the music of an iPod connected to the main unit. You can control the connected iPod from either the main unit or the sub units.

To use an iPod, refer to the user’s guide of your iPod.

**Using the main unit**

1. Place an iPod on the iPod connector as shown below.

Now, you are ready to listen to the connected iPod using the sub units.

2. Select the iPod channel.

**When the S-AIR mode is set to “PARTY”:**
Press PARTY CH on the remote repeatedly until “iPod” appears in the display.

**When the S-AIR mode is set to “MULTI SOURCE”:**
The iPod channel is internally activated. Go to step 3.
3 Start playback.
Operate the iPod to start playing the music. You can also operate the iPod using the remote (see “To control the iPod using the main unit”).

Using the sub units

1 Place an iPod on the iPod connector on the main unit.

2 Select the iPod channel.
Press S-AIR CH repeatedly until “iPod” appears in the display.

3 Start playback.
Operate the iPod to start playing the music. You can also operate the iPod using the remote (see “To control the iPod using the sub units”).

To control the iPod using the main unit
You can control your iPod with the following buttons on the remote.

```
<table>
<thead>
<tr>
<th>To</th>
<th>Press</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start playback</td>
<td>▶️▶️</td>
</tr>
<tr>
<td>Pause playback</td>
<td>▶️▶️ or ▶️/CANCEL</td>
</tr>
<tr>
<td>Select a menu or track</td>
<td>▲▼. You can scroll up or down the iPod menus.</td>
</tr>
<tr>
<td>Skip a track</td>
<td>◀▶/▶️</td>
</tr>
<tr>
<td>Find a point in a track</td>
<td>Hold down ◀▶/▶️ during playback, and release the button at the desired point.</td>
</tr>
<tr>
<td>Adjust the volume</td>
<td>VOLUME +/-</td>
</tr>
</tbody>
</table>
```

To control the iPod using the sub units
You can control your iPod with the following buttons on the remote or unit.

```
<table>
<thead>
<tr>
<th>To</th>
<th>Press</th>
</tr>
</thead>
<tbody>
<tr>
<td>Choose the selected item</td>
<td>ENTER. You can choose the selected item much like the center button on the iPod.</td>
</tr>
<tr>
<td>Return to the previous menu</td>
<td>MENU. You can return to the previous menu much like the Menu button on the iPod.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
```

26G
To use the main unit as a battery charger

You can use the main unit as a battery charger for the iPod when the main unit is on.
The charging begins when the iPod is placed on the iPod connector. The charging status appears in the iPod display. For details, refer to the user’s guide of your iPod.
To stop charging the iPod, remove the iPod or turn off the main unit.

Notes

• When placing or removing the iPod, handle the iPod in the same angle as that of the iPod connector on the main unit and do not twist or sway the iPod to prevent connector damage.
• Do not carry the main unit with an iPod set on the connector. Doing so may cause a malfunction.
• When placing or removing the iPod, brace the main unit with one hand and take care not to press the controls of the iPod by mistake.
• Before disconnecting the iPod, pause playback.
• You cannot adjust the volume using the main unit.
• The volume level does not change even if adjusted on the iPod.
• The main unit is designed for iPod only. You cannot connect any other portable audio players.
• Depending on the iPod model you are using and its status, operations using the main unit and the sub units may not be accepted or the wrong operations may be performed.
• Sony cannot accept responsibility in the event that data recorded to iPod is lost or damaged when using an iPod with this S-AIR product.

Listening to the radio using the S-AIR connection

Using the main unit

1 Select the tuner channel.

When the S-AIR mode is set to “PARTY”:
Press PARTY CH on the remote repeatedly until “FM” or “AM” appears in the display.

When the S-AIR mode is set to “MULTI SOURCE”:
The tuner channel is internally activated. Go to step 2.

2 Select “FM” or “AM.”
Press BAND repeatedly.

3 Perform automatic tuning.
Press and hold TUNING +/- on the remote (or TUNING/SELECT +/- on the unit) until the frequency indication changes and then release. “AUTO” lights up in the display. Scanning stops automatically when a station is tuned in, and then “TUNED” and “ST” (for FM stereo programs only) appear.
Using the sub units

When a radio station is tuned on the main unit, you can listen to that station by following the steps below.

To tune in a radio station using the sub units, that station needs to be preset beforehand (see “To call up a preset radio station using the sub units” (page 29)).

1. Select the tuner channel.
   Press S-AIR CH repeatedly until “TUNER” appears in the display.

2. Select “FM” or “AM.”
   Press and hold S-AIR CH until “FM” changes to “AM” or vice versa.

To tune in a station with a weak signal using the main unit

If “TUNED” does not appear and the scanning does not stop, press TUNING +/− on the remote (or TUNING/SELECT +/− on the unit) repeatedly to tune in the desired station.

To reduce static noise on a weak FM stereo station using the main unit

1. Press SYSTEM MENU on the unit.

2. Press TUNING/SELECT +/− on the unit repeatedly until “FM MODE” appears, then press ENTER on the unit.

3. Press TUNING/SELECT +/− on the unit repeatedly until “MONO” appears, then press ENTER on the unit.
   There will be no stereo effect, but the reception will improve.

Presetting radio stations

You can preset your favorite radio stations and tune them in instantly by selecting the corresponding preset number.

Use the main unit to preset the radio stations.

1. Tune in the desired station.
   See “Listening to the radio using the S-AIR connection” (page 27).

2. Press SYSTEM MENU on the unit.

3. Press TUNING/SELECT +/− on the unit repeatedly until “MEMORY” appears, then press ENTER on the unit.

4. Press TUNING/SELECT +/− on the unit repeatedly to select your desired preset number.
   If another station is already assigned to the selected preset number, the station is replaced by the new stations.
5 Press ENTER on the unit.

6 Repeat steps 1 through 5 to store other stations.
   You can preset up to 20 FM and 10 AM stations. The preset stations are retained for about half a day even if you disconnect the power supply cord or if a power failure occurs.

To call up a preset radio station using the main unit
Press PRESET +/- repeatedly.

To call up a preset radio station using the sub units

1 Preset radio stations on the main unit (see “Presetting radio stations” (page 28)).

2 Select the tuner channel.
   Press S-AIR CH repeatedly until “TUNER” appears in the display.

3 Select “FM” or “AM.”
   Press and hold S-AIR CH until “FM” changes to “AM” or vice versa.

4 Press PRESET +/- repeatedly to select a preset station.

---

Using an optional AV system

You can enjoy audio and video of the connected iPod with an optional AV system.

1 Connect an optional AV system (such as a TV, etc.) to the iPod AUDIO OUT L/R jacks and/or the iPod VIDEO OUT jack of the main unit using an optional audio cord and/or video cable.

2 Place an iPod on the iPod connector on the main unit.

3 Start playback of the iPod.
   See “Listening to iPod music using the S-AIR connection” (page 25).

Note
• The tuner’s sound cannot be output through the iPod AUDIO OUT L/R jacks.
• Before enjoying video, adjust the video settings on the iPod to the appropriate settings according to your situation.

Tip
Even if you change the S-AIR mode or the S-AIR channel using PARTY CH, audio and/or video from the connected iPod will continue to be output from the iPod AUDIO L/R jacks and/or the iPod VIDEO OUT jack.
Changing the display

Using the main unit

To view the information on the display
Press DISPLAY on the remote.

Using the sub units

To change the information on the display while the sub unit is on
Press DISPLAY on the unit. Each time you press the button, the display changes as follows:

When the sub unit is connected to the main unit:
Information of the connected main unit
→ Model name of the connected main unit → Clock → ...

When the sub unit is not connected to the main unit:
“S-AIR” → “UNLINKED” → Clock → ...

To turn off the display of the sub unit
When the sub unit is turned off, the clock is displayed. You can turn off the clock display to minimize the amount of power consumed (Power Saving Mode). Press DISPLAY on the unit when the clock is displayed. Press the button again to display the clock.

Note
Regardless of the selected S-AIR mode, when the same S-AIR channel is selected on multiple sub units and you change the display of any one of them, the display on all sub units will change (only when the information of the connected main unit is displayed).

1) Depending on the iPod model you are using, up to 16 characters of the following information can be viewed, for example, while playing the iPod.
   — Track name
   — Artist name
   — Album name
   — Elapsed playing time of the track
Characters that cannot be displayed appear as “—”.
   When listening to the radio, the frequency is displayed.
2) Displayed for about 8 seconds.
Using the Timers

The sub units offer two timer functions. If you use the Daily Timer with the Sleep Timer, the Sleep Timer has priority. Use buttons on the unit to set the timers.

Sleep Timer:
You can fall asleep to music. This function works even if the clock is not set. Press SLEEP repeatedly.

Note
Even if you set the timer, no sound is output from the sub units if playback on the connected main unit ends within the set time period or if communication with the main unit is cut off.

Daily Timer:
You can wake up to the sound of the connected main unit at a preset time. Make sure you have set the clock.

1 Press VOLUME +/- repeatedly to adjust the volume level while viewing the volume level indication on the display.

2 Press CLOCK/TIMER MENU.

3 Press I<>/<>> repeatedly to select “TIMER,” then press CLOCK/TIMER ENTER. “ON TIME” appears, and the hour indication flashes.

4 Set the time to start playing. Press I<>/<>> repeatedly to set the hour, and then press CLOCK/TIMER ENTER. The minute indication flashes. Use the procedure above to set the minute.

5 Use the same procedure as in step 4 to set the time to stop playing.

6 Press I<>/<>> repeatedly to select the desired option. The default setting is underlined.

ALARM:
An alarm is output.

AUTO:
Sound from the connected main unit is output. However, an alarm sounds in the following cases.
- When communication with the main unit is cut off.
- When no sound is output from the main unit or the audio signal level is too low.
- When the main unit is not ready for playback at the set start time. Note that the alarm continues to sound even if the main unit becomes ready after the start time has passed.

7 Press CLOCK/TIMER ENTER. The display shows the timer settings.

Continued →
8 If you selected “ALARM” in step 6, go to step 9.
   If you selected “AUTO” in step 6, prepare the sound source on the main unit.

   iPod:
   Select the track to be played back by the timer, and set the iPod to the pause mode.

   Tuner:
   Tune in the desired station (see “Listening to the radio using the S-AIR connection” (page 27) and “Presetting radio stations” (page 28)).

9 Press I/\ to turn off the unit.
   The sub unit turns on about 45 seconds before the preset time.
   If the sub unit is on at the preset time, the Daily Timer will not play.

To stop the alarm
Press any button.

To activate or check the timer again
1 Press CLOCK/TIMER MENU.
   “SELECT” flashes in the display.
2 Press CLOCK/TIMER ENTER.
3 Press I◄/ ► repeatedly to select “TIMER.”
4 Press CLOCK/TIMER ENTER.

To cancel the timer
1 Press CLOCK/TIMER MENU.
   “SELECT” flashes in the display.
2 Press CLOCK/TIMER ENTER.
3 Press I◄/ ► repeatedly to select “OFF.”
4 Press CLOCK/TIMER ENTER.

To change the setting
Start over from step 1.

Note
Even when “AUTO” is selected in step 6 and the iPod is to be played using the timer, timer playback may not start and the iPod may be set to the pause mode if the iPod was being played by another sub unit when the timer started operating. In this case, press ► on the sub unit.

Tip
The Daily Timer setting remains as long as the setting is not canceled manually.
Turning off the remote control function of the sub units

When using the multiple sub units near each other, all the sub units may receive the same signal from the remote and the main unit may not function properly. To prevent this, you can turn off the remote control function of the sub units. Use buttons on the sub unit whose remote control function you want to turn off.

1. Press \( \text{I/\(\text{C}\)} \) to turn off the unit.
2. Press DISPLAY repeatedly until the clock is displayed.
3. Press \( \text{I/\(\text{C}\)} \) while holding down CLOCK/TIMER ENTER. “RMT OFF” appears in the display and the sub unit is turned on. If you try controlling the sub unit using the remote, “RMT OFF” appears in the display and the sub unit will not accept the signal from the remote.

To turn on the remote control function
Perform steps 1 and 3 above and check that “RMT ON” appears in the display.

Note
Even when the remote control function is turned off, \( \text{I/\(\text{C}\)} \) and VOLUME +/- on the remote will continue to function.

Changing the illumination brightness of the main unit

Press ILLUMINATION repeatedly. Each time you press the button, the illumination brightness changes as follows:

Bright → Darkened → Off
Troubleshooting

1. Make sure the power supply cord and the power cord are correctly and firmly connected.

2. Find your problem in the checklist below, and take the indicated corrective action.

If the issue persists, contact your nearest Sony dealer.
When bringing the product in for repairs, be sure to bring in the entire system (the main unit, the sub units and wireless transceivers). This product is a system product, and the entire system is needed to determine the location requiring repair.

If “PROTECT” appears on the display of the main unit
Set the POWER switch on the rear panel to “OFF” to turn off the unit, and then unplug the power supply cord. After checking that there is no indication on the display, reconnect the power supply cord and set the POWER switch to “ON” to turn on the unit. If the issue persists, contact your nearest Sony dealer.

If the STANDBY indicator on the sub unit flashes
Immediately unplug the power cord, and check if anything is blocking the ventilation holes on the rear panel of the unit. After the STANDBY indicator stops flashing, reconnect the power cord, and turn on the unit. If the issue persists, contact your nearest Sony dealer.

General

The remote does not function.
- Remove any obstacles between the remote and the remote sensor, and position the main unit and the sub units away from fluorescent lights.
- Point the remote at the remote sensor.
- Move the remote closer to the main unit or the sub units.
- The remote control function of the sub unit is off. Turn on the remote control function (page 33).
- Check whether you are using the remote for the main unit to operate the main unit and the remote for the sub unit to operate the sub unit.

The S-AIR indicators on the main unit and the sub units are turned off.
- Check that the power supply cord and the power cord are connected securely and the main unit and the sub units are turned on.
- Check that the supplied wireless transceivers are inserted securely to the main unit and the sub units (page 19).

Connecting the main unit and the sub units is not possible. (The S-AIR indicator on the main unit is turned off and/or the S-AIR indicator on the sub unit flashes.)
- Check that the supplied wireless transceivers are inserted securely to the main unit and the sub units (page 19).
- If you use another S-AIR main unit, place it more than 8 m away from the main unit.
- Confirm the S-AIR IDs of the main unit and the sub units.
- The main unit is paired with another S-AIR sub unit. Pair the main unit with the sub unit you are using.
• The main unit is paired with another S-AIR sub unit. Cancel pairing.
• Place so that the main unit and the sub units are separated from other wireless devices.
• Stop using any other wireless devices.
• The main unit or the sub unit is turned off. Make sure the power supply cord and the power cord are connected and turn on the main unit and the sub units.

**The S-AIR channel fails to change.**
• Check that the main unit and the sub units are connected properly.
• If you are using an optional S-AIR sub unit (such as the AIR-SA10) which is not compatible with the MULTI SOURCE mode, set the main unit to the PARTY mode.

**There is no sound.**
• If you use another S-AIR main unit, place it more than 8 m away from the main unit.
• Confirm the S-AIR IDs of the main unit and the sub units.
• Check the pairing setting.
• Place so that the main unit and the sub units are closer.
• Stop using any equipment that generates electromagnetic energy such as a microwave oven.
• Place so that the main unit and the sub units are separated from other wireless devices.
• Do not place a mobile phone near the main unit and the sub units, as this may result in noise.
• Change the RF CHANGE setting on the main unit (page 22).

**Check that the power supply cord and the power cord are connected securely and the main unit and the sub units are turned on.**
• Increase the volume of the sub units.
• Check that headphones are not connected to the (headphones) jack on the rear panel of the sub units.
• Change the RF CHANGE setting on the main unit (page 22).

**There is noise or the sound skips.**
• If you use another S-AIR main unit, place it more than 8 m away from the main unit.
• Place so that the main unit and the sub units are closer.
• Stop using any equipment that generates electromagnetic energy such as a microwave oven.
• Place so that the main unit and the sub units are separated from other wireless devices.
• Stop using any other wireless devices.
• Change the S-AIR ID settings of the main unit and the sub units.
• Do not place a mobile phone near the main unit and the sub units, as this may result in noise.
• Change the RF CHANGE setting on the main unit (page 22).

---

**Further details:****
• Confirm the S-AIR IDs of the main unit and the sub units.
• Check the pairing setting.
• Place so that the main unit and the sub units are closer.
• Stop using any equipment that generates electromagnetic energy such as a microwave oven.
• Place so that the main unit and the sub units are separated from other wireless devices.
• Do not place a mobile phone near the main unit and the sub units, as this may result in noise.
• Change the RF CHANGE setting on the main unit (page 22).

---

**Continued →**
**iPod**

**There is no sound.**
- Make sure the iPod is connected securely.
- Make sure the iPod is playing music.
- Adjust the volume of the sub units.
- Update your iPod to use the latest software.

**The iPod cannot be operated by the main unit or the sub units.**
- Check that the iPod and the main unit are connected properly and that the main unit and the sub units are connected properly.
- Depending on the iPod model you are using and its status, it may not be possible to operate the iPod using the main unit or the sub units.
- Update your iPod to use the latest software.

**The sound is distorted.**
- Turn down the volume of the sub units.
- Set the “EQ” setting of the iPod to “Off” or “Flat.”

**The iPod cannot be charged.**
- Make sure the iPod is connected securely.
- Check that the power supply cord is connected securely and the main unit is turned on.

**The iPod track information cannot be obtained.**
- Depending on the iPod model you are using and its status, it may not be possible to obtain the track information properly during playback.
- Up to 16 characters can be displayed on the displays of the sub units.
- Check that the track information has been entered into the iPod.

**Video/Photo image from the connected iPod does not appear on the TV screen.**
- Make the connection according to your AV system.
- Switch the TV input to the video input connected to the main unit.
- Check that the TV output setting on the iPod is on (Refer to the user’s guide of your iPod).
- Check that the iPod is compatible with video output (Refer to the user’s guide of your iPod).

**Tuner**

**Severe hum or noise, or stations cannot be received. (“TUNED” or “ST” flashes on the display of the main unit.)**
- Connect the antennas properly.
- Find a location and an orientation that provide good reception, and then set up the antennas again.
- Keep the antennas away from the power supply cord to avoid picking up noise.
- Connect a commercially available external antenna.
- Consult your nearest Sony dealer if the supplied AM antenna has come off the plastic stand.
- Turn off nearby electrical equipment.
To change the AM tuning interval
The AM tuning interval is factory-preset to 10 kHz. Use the main unit to change the AM tuning interval.

1. Tune in any AM station.
2. Press SYSTEM MENU on the unit.
3. Press TUNING/SELECT +/- on the unit repeatedly until “AM STEP” appears, then press ENTER on the unit.
4. Press TUNING/SELECT +/- on the unit repeatedly to select “9K” or “10K,” then press ENTER on the unit.
   “OK” appears.
5. Press ENTER on the unit again to confirm the setting.
   When you change the interval, all the AM preset stations are erased. To reset the interval to the factory preset, repeat the procedure.

To reset the main unit to factory settings
If the main unit still does not operate properly, reset the main unit to factory settings.

1. Disconnect and reconnect the power supply cord, and then turn on the unit.
2. Press ■/CANCEL, DISPLAY and 1/1 on the unit at the same time.
   All user-configured settings, such as timer, clock, etc. are deleted.

To reset the sub unit to factory settings
If the sub unit still does not operate properly, reset the sub unit to factory settings.

1. Disconnect and reconnect the power cord, and then turn on the unit.
2. Press ■/CANCEL, DISPLAY and 1/1 on the unit at the same time.
**Messages**

CANCEL: Time out without pairing.
COMPLETE: Pairing is completed.
ID A: Sets the S-AIR ID to “A.”
ID B: Sets the S-AIR ID to “B.”
ID C: Sets the S-AIR ID to “C.”
LINKED*: The sub unit is connected to the main unit.
PAIRING: Pairing is in progress.
RMT OFF*: The sub units are not accepting signals from the remote because the remote control function is set to “RMT OFF.”
S-AIR*: Displayed from the point power of the sub unit is turned on until connection with the main unit is established.
TIME NG*: The Daily Timer start and end times are set to the same time.
UNLINKED*: The connection with the main unit is cut off.

* Displayed on the sub units only.

**Precautions**

**Notes on use of the S-AIR product**

- As the S-AIR product transmits sound by radio waves, sound may skip when radio waves are obstructed. This is a characteristic of radio waves and is not a malfunction.
- As the S-AIR product transmits sound by radio waves, equipment that generates electromagnetic energy, such as a microwave oven, may interfere with sound transmission.
- As the S-AIR product uses the radio waves that share the same frequency as other wireless systems, such as wireless LAN or Bluetooth devices, interference or poor transmission may result. In this case, take the following steps:
  - Do not install the S-AIR product near other wireless systems.
  - Do not use the S-AIR product and the other wireless systems at the same time.
- The transmission distance differs depending on the usage environment. Find a location where transmission between the main unit and the sub units is most effective, and install the main unit and the sub units there.
On safety

- Completely disconnect the power supply cord and the power cord from the wall socket (mains) if the main unit and the sub units are not going to be used for an extended period of time. When unplugging the units, always grip the plug. Never pull the cord itself.
- Should any solid object or liquid get into the main unit and the sub units, unplug the units, and have them checked by qualified personnel before operating them again.
- The power supply cord and the power cord can be changed only by a qualified service facility.

On placement

- Do not place the main unit and the sub units in an inclined position or in locations that are extremely hot, cold, dusty, dirty, or humid or lacking adequate ventilation, or subject to vibration, direct sunlight or a bright light.
- Be careful when placing the main unit and the sub units on surfaces that have been specially treated (for example, with wax, oil, polish) as staining or discoloration of the surface may result.

On heat buildup

- Heat buildup on the main unit and the sub units during operation is normal and is not cause for alarm.
- Do not touch the cabinet if it has been used continuously at a high volume because the cabinet may have become hot.*
- Do not obstruct the ventilation holes.*

* The sub units only.

On the speaker system*

This speaker system is not magnetically shielded, and the picture on nearby TV sets may become magnetically distorted. In this situation, turn off the TV, wait about 15 to 30 minutes, and turn it back on. If there is no improvement, move the unit far away from the TV.

* The sub units only.

Cleaning the cabinet

Clean the cabinet with a soft dry cloth. Do not use any type of abrasive pad, scouring powder, or solvent, such as thinner, benzine, or alcohol.
Specifications

Main unit (AIR-SA15Ti)

Output

**AUDIO OUT:**
- voltage 775 mV, impedance 47 kilohms

**VIDEO OUT:**
- Max. output level 1 Vp-p, unbalanced,
  Sync. negative, load impedance 75 ohms (Composite Video Out)

Wireless transceiver (EZW-RT10)

Communication System:
- S-AIR Specification version 1.0

Output:
- 12.0 milliwatts

Frequency band:
- 2.4000 GHz — 2.4835 GHz

Modulation method:
- DSSS

Power requirements:
- DC 3.3 V, 350 mA

Dimensions (w/h/d):
- 50 × 13 × 60 mm

Mass:
- 24 g

Tuner section

FM stereo, FM/AM superheterodyne tuner

**FM tuner section:**
- Tuning range: 87.5 — 108.0 MHz (100 kHz step)
- Antenna: FM lead antenna
- Antenna terminals: 75 ohms unbalanced
- Intermediate frequency: 10.7 MHz

**AM tuner section:**
- Tuning range:
  - 530 — 1,710 kHz (with 10 kHz tuning interval)
  - 531 — 1,710 kHz (with 9 kHz tuning interval)
- Antenna: AM loop antenna, external antenna terminal
- Intermediate frequency: 450 kHz

General

Power requirements:
- 120 V AC, 60 Hz

Power consumption:
- 15 watts

Dimensions (w/h/d) (excluding the AC power supply unit):
- Approx. 295 × 43 × 110 mm

Mass (including the AC power supply unit):
- Approx. 1.1 kg
Sub unit (AIR-SA15R)

Amplifier section
U.S.A. model:
AUDIO POWER SPECIFICATIONS
POWER OUTPUT AND TOTAL HARMONIC DISTORTION:
With 3 ohms loads, both channels driven, from 300 — 20,000Hz; rated 4 watts per channel minimum RMS power, with no more than 10% total harmonic distortion from 250 milliwatts to rated output.

Other models:
Continuous RMS power output (reference):
4 + 4 watts (3 ohms at 1 kHz, 10% THD)

Output
*) (stereo mini jack):
Accepts headphones with an impedance of 8 ohms or more

Speaker section
Speaker system:
Full range, bass-reflex type
Speaker units:
65 mm, cone type (2)
Nominal impedance:
3 ohms

Wireless transceiver (EZW-RT10)
Communication System:
S-AIR Specification version 1.0
Output:
12.0 milliwatts
Frequency band:
2.4000 GHz — 2.4835 GHz
Modulation method:
DSSS
Power requirements:
DC 3.3 V, 350 mA
Dimensions (w/h/d):
50 × 13 × 60 mm
Mass:
24 g

General
Power requirements:
120 V AC, 60 Hz
Power consumption:
15 watts
Dimensions (w/h/d):
Approx. 300 × 136 × 115 mm
Mass:
Approx. 2.2 kg

Design and specifications are subject to change without notice.

Halogenated flame retardants are not used in the certified printed wiring boards.
Compatible iPod models

You can use the following iPod models on the main unit. Update your iPod with the latest software before using it.

- iPod touch
- iPod nano 3rd generation (video)
- iPod classic
- iPod nano 2nd generation (aluminum)
- iPod 5th generation (video)
- iPod nano 1st generation
- iPod 4th generation (color display)
- iPod 4th generation
- iPod mini
