On placement
• Place the player in a location with adequate ventilation to prevent heat build-up in the player.
• To reduce the risk of fire, do not cover the ventilation opening of the appliance with newspapers, tablecloths, curtains, etc.
• Do not expose the appliance to naked flame sources (for example, lighted candles).
• Do not install this player in a confined space, such as a bookshelf or similar unit.
• Do not place the player outdoors, in vehicles, on ships, or on other vessels.
• If the player is brought directly from a cold to a warm location, or is placed in a very damp room, moisture may condense on the lenses inside the player. Should this occur, the player may not operate properly. In this case, remove the disc and leave the player turned on for about half an hour until the moisture evaporates.
• Do not install the player in an inclined position. It is designed to be operated in a horizontal position only.
• Do not place metal objects in front of the front panel. It may limit reception of radio waves.
• Do not place the player in a place where medical equipment is in use. It may cause a malfunction of medical instruments.
• If you use a pacemaker or other medical device, consult your physician or the manufacturer of your medical device before using the wireless LAN function.
• Do not place heavy or unstable objects on the player.
• Do not place any objects other than discs on the disc tray. Doing so may cause damage to the player or the object.
• Take out any discs from the tray when you move the player. If you don’t, the disc may be damaged.
• Disconnect the AC adaptor and all other cables from the player when you move the player.

**On power sources**
- The player is not disconnected from the AC power source as long as it is connected to the wall outlet, even if the player itself has been turned off.
- Disconnect the player from the wall outlet if you are not going to use the player for a long time. To disconnect the AC adaptor, grasp the plug itself; never pull the cord.
- Observe following points to prevent the AC adaptor being damaged. Do not use the AC adaptor if it is damaged, as doing so may result in an electric shock or fire.
  – Do not pinch the AC adaptor between the player and wall, shelf, etc.
  – Do not put anything heavy on the AC adaptor or pull on the AC adaptor itself.

**On AC adaptor**
- Use the supplied AC adaptor for this player, as other adaptors may cause a malfunction.
- Do not disassemble or reverse-engineer.
- Do not confine the AC adaptor in a closed place such as a bookshelf or an AV cabinet.
- Do not connect the AC adaptor to a traveler’s electric transformer, which may generate heat and cause a malfunction.
- Do not drop or apply shock.

**On adjusting volume**
Do not turn up the volume while listening to a section with very low level inputs or no audio signals. Your ears and the speakers may be damaged when the sound level reaches the peak.

**On cleaning**
Clean the cabinet, panel, and controls with a soft cloth. Do not use any type of abrasive pad, scouring powder or solvent such as alcohol or benzine.

**On cleaning discs, disc/lens cleaners**
Do not use cleaning discs or disc/lens cleaners (including wet or spray types). These may cause the apparatus to malfunction.

**On replacement of parts**
In the events that this player is repaired, repaired parts may be collected for reuse or recycling purposes.

**On connecting to the HDMI OUT jack**
Observe the following as improper handling may damage the HDMI OUT jack and the connector.
- Carefully align the HDMI OUT jack on the rear of the player and the HDMI connector by checking their shapes. Make sure the connector is not upside down or tilted.
- Be sure to disconnect the HDMI cable when moving the player.
- Hold the HDMI connector straight when connecting or disconnecting the HDMI cable. Do not twist or force the HDMI connector into the HDMI OUT jack.

**On watching 3D video images (BDP-S5500/BX550 only)**
Some people may experience discomfort (such as eye strain, fatigue, or nausea) while watching 3D video images. Sony recommends that all viewers take regular breaks while watching 3D video images. The length and frequency of necessary breaks will vary from person to person. You must decide what works best. If you experience any discomfort, you should stop watching the 3D video images until the discomfort ends; consult a doctor if you believe necessary. You should also review (i) the instruction manual and/or the caution message of any other device used with, or Blu-ray Disc contents played with this product and (ii) our website.

Control for HDMI (BRAVIA Sync)

The [Control for HDMI] function does not work (BRAVIA Sync).
- Check that [Control for HDMI] in [HDMI Settings] is set to [On] (page 31).
- If you change the HDMI connection, turn the player off and on again.
- If power failure occurs, set [Control for HDMI] in [HDMI Settings] to [Off], then set [Control for HDMI] in [HDMI Settings] to [On] (page 31).
Check the following and refer to the instruction manual supplied with the component.
- the connected component is compatible with the [Control for HDMI] function.
- the connected component’s setting for the [Control for HDMI] function is correct.

When you connect the player to a TV through an AV amplifier (receiver),
- if the AV amplifier (receiver) is not compatible with the [Control for HDMI] function, you may be unable to control the TV from the player.
- if you change the HDMI connection, disconnect and reconnect the AC adaptor, or a power failure occurs, try the following:
  ①Switch the input selector of the AV amplifier (receiver) so that the picture from the player appears on the TV screen.
  ②Set [Control for HDMI] in [HDMI Settings] to [Off], then set [Control for HDMI] in [HDMI Settings] to [On] (page 31). Refer to the instruction manual supplied with the AV amplifier (receiver).

The System Power-Off function does not work (BRAVIA Sync).

**About wireless LAN security (BDP-S5500/BX550/S3500/BX350 only)**

Since communication via the wireless LAN function is established by radio waves, the wireless signal may be susceptible to interception. To protect wireless communication, this player supports various security functions. Be sure to correctly configure the security settings in accordance with your network environment.

**◆ No Security**
Although you can easily make settings, anyone can intercept wireless communication or intrude into your wireless network, even without any sophisticated tools. Keep in mind that there is a risk of unauthorized access or interception of data.

**◆ WEP**
WEP applies security to communications to prevent outsiders from intercepting communications or intruding into your wireless network. WEP is a legacy security technology that enables older devices, which do not support TKIP/AES, to be connected.

**◆ WPA-PSK (TKIP), WPA2-PSK (TKIP)**
TKIP is a security technology developed to correct the deficiencies of WEP. TKIP assures a higher security level than WEP.

**◆ WPA-PSK (AES), WPA2-PSK (AES)**
AES is a security technology that uses an advanced security method that is distinct from WEP and TKIP. AES assures a higher security level than WEP or TKIP.
