Precautions

On safety
- Make sure to insert the CD player properly into the TV component. The connection will not be made properly if this is not done correctly.
- Always make sure that the power cord is disconnected from the power outlet before servicing.
- Do not use the player in a location near fluorescent lights. This may cause the player to malfunction.
- Do not place the player near a heat source. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to rain or moisture. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to excessive dust. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to direct sunlight. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to chemical vapors. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to instability. This may cause the player to malfunction.

On operation
- Do not leave the player in a location where it may be exposed to dust or humidity. This may cause the player to malfunction.
- Do not leave the player in a location where it may be exposed to vibrations. This may cause the player to malfunction.
- Do not leave the player in a location where it may be exposed to strong magnetic fields. This may cause the player to malfunction.
- Do not leave the player in a location where it may be exposed to strong light. This may cause the player to malfunction.

On power sources
- Connect the player to the power outlet using the power cord supplied with the player. If the power cord is not connected properly, the player may not function properly.
- Make sure that the power cord is connected to the power outlet properly. If the power cord is not connected properly, the player may not function properly.
- Make sure that the power cord is connected to the power outlet properly. If the power cord is not connected properly, the player may not function properly.

On placement
- Do not place the player in a location where it may be exposed to vibrations. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to strong magnetic fields. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to strong light. This may cause the player to malfunction.
- Do not place the player in a location where it may be exposed to instability. This may cause the player to malfunction.

Troubleshooting

Troubleshooting
- The player does not turn on when you press the power button. Make sure that the player is properly connected to the power outlet. If the player is not properly connected to the power outlet, the player will not function properly.
- The player does not function properly. Make sure that the player is properly connected to the power outlet. If the player is not properly connected to the power outlet, the player will not function properly.
- The player does not function properly. Make sure that the player is properly connected to the power outlet. If the player is not properly connected to the power outlet, the player will not function properly.

Specifications

Specifications
Audio Power Specifications
- Compact disc digital audio system
- Digital audio output: 0 dB
- Output impedance: 50 ohms
- Signal-to-noise ratio: 90 dB
- Total harmonic distortion: 0.1%
-Wow and flutter: Below measurable limit
- Laser diode properties: Wavelength: 780 nm, Radiated power: 4.2 mW

CD player
- The CD player will play on the “ABC” list in the display menu when a CD is inserted.
- The CD player will stop in the display menu when a CD is inserted.
- The CD player will start in the display menu when a CD is inserted.
- The CD player will start in the display menu when a CD is inserted.

2. Insert a CD in the CD compartment until it clicks into place.

To check the total number and playing time

To check the current track number and playing time

Press \( u \) once if the CD is stopped and twice if the CD is playing. The current program will be shown in the display.

About the CD compartment

To cancel selected play mode

To select a different program

Selecting the play mode

PAUSE

To check the number of tracks in the current program

(Example: To tune in a preset station 12, press \( >10 \) and 1 first, and then press 2.)

Using the remote control to operate a TV or CBL

Searching for the correct code

Notes on using the remote control

To adjust the volume

Point the remote directly at the components.

Press the button for the function you want to use.

• If your cable box can control volume, be sure to set its volume switch to a medium position. If the volume is set too high, the remote may not work properly.

• Some functions of the component may not work with this remote.

• Using this remote will not increase the functions of your components. The functions of the remote are limited to the functions available on your components.

• If the component does not operate properly, repeat steps 1 to 6 and search for another code.

• If the component does not operate properly after step 6, try the search method described in “Searching for the correct code.”

• If the component does not operate properly, repeat steps 1 to 6 and search for another code.

• If you press a wrong button in step 4

Press and release ENT to store the code number in the remote’s memory.

• If you press a wrong button in step 4

Press and release TUNE/CH+ until the frequency digits go back to the previous channel.

• If you press a wrong button in step 4

Press and release RADIO BAND•AUTO PRESET to select the band.

• If you press a wrong button in step 4

Press RADIO BAND•AUTO PRESET until the band you want appears in the display.

• If you press a wrong button in step 4

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to play.

Press the number buttons for the track you want to program in memory.

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to program in memory.

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to program in memory.

Press the button again to resume recording.

To record from the radio

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to program in memory.

To record from the CD player

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to program in memory.

To record from the tape

Press \( \times \) or \( \times \) or \( \times \) to select the track that you want to program in memory.

About the remote control

To enter the code number

Press the number buttons and ENT, for example,
