Precautions

Safety

- If you play a disc held together with paper clips, the clips may damage the disc or the player.
- Do not place any foreign objects in the CD slot.
- Do not place the player on top of or near an appliance such as a TV.
- The nameplate indicating operating conditions is located on the bottom of the player.

Notes on cassette

- If the player is left in a car parked in the direct sunlight, the temperature inside the car may become extremely high, causing possible damage to the player.
- Unplug the player from the wall outlet before leaving the car.
- For AC operation, use the supplied AC power cord; do not use any other type.

Discs with non-standard shapes (e.g., R20) batteries.

- Operate the player only with Sony alkaline LR20 (AA) batteries.
- Make sure the batteries are inserted correctly.
- Replace all the batteries with new ones if they are weak.

On safety

- The player contains magnets which may affect credit cards, floppy disks, video tapes, and TV tuners.
- If the player is not going to be used for a long time, remove the batteries.
- The player consumes 2 W (max.) when the AC power cord is connected.
- Before moving the player, unplug the power cord and remove any discs.
- Do not expose the player to strong light such as direct sunlight or incandescent light.
- If strong static electricity is generated, the player may not operate properly. In this case, remove the batteries, and then reinsert them.
- The player has a total of 90 minutes of memory for cassette data. When you operate the player on batteries, this time may be affected by the temperature or the type of batteries used.

Troubleshooting

General

- The power does not come on.
- The player does not operate when you press any button.
- The REC and PLAY/PAUSE lights in the display remain lit.
- The remote does not function.
- The sound drops out.
- Someone is using a portable telephone or an electronic device nearby.
- The CD-R/CD-RW was not finalized. Finalize it with the recording device.
- The CD-R/CD-RW was not prepared properly. Place the CD with the label surface up.
- The CD-R/CD-RW was not supported properly. Press the Open/Close button to open the CD compartment.
- The CD-R/CD-RW with the recording device.
- The CD-R/CD-RW was not inserted properly. Insert the CD with the label surface up.
- The Dolby system is not working properly. Connect the player to a Dolby system.
- The performance of the驟heir system is not sufficient. Connect the player to a system with good sound quality.

Radio

- The broadcast cannot be tuned in.
- The sound is weak or has poor quality.
- The remote does not operate the TV.
- The remote does not operate the CD player.
- The remote does not operate the TV tuner.
- The video signals cannot be displayed on the TV.
- You cannot turn on the player with the remote control.

Specifications

- Power requirement: AC 30 W
- Power consumption: 1 W (max.)
- Dimensions (W/H/D): 115 x 330 x 195 mm
- Weight: 2.2 kg

Audio Power Specifications

- Audio power output: Woofer: 4 W + 4 W (at 3.2 Ω), 10 % harmonic distortion
- Frequency response: 50 - 150 Hz; rated 6 W minimum RMS
- Input impedance: 16 kΩ, 10 % harmonic distortion in DC

Outputs

- Headphone output: 3 V DC, 2 size AA (R6) batteries
- Input impedance: 32 kΩ

Frequency Range

- FM: 87.5 - 108 MHz
- AM: 530 - 1710 kHz

Frequency Response

- Vinyl: 20 - 20,000 Hz
- Compact disc: 20 - 20,000 Hz

Remote Control System

- infrared

Location of Service

- In normal use, the batteries should last for about six months. When the remote no longer operates the player, replace two batteries with new ones.

Preparing the remote

- Insert the batteries into the remote control unit. Replace the supplied batteries with two AAA batteries.

*The buttons have tactile dots.

Listening to the radio

1. Press POWER to turn on the player.
2. Press RADIO/STATION until the band you want appears in the display.
3. To select the desired frequency, press the numeric buttons on the remote.

To select a station automatically

1. Press RADIO/STATION with the button briefly (1 sec) to select the band.
2. Press AUTOMATIC (AUTO) on the remote.

To record from the radio

1. Press RECORD (REC) on the remote.

Connecting optional components

1. Connect the optional components, such as a VCR, and possible MD/CD player through the jacks of the player.

Recording

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.
3. If the power cord is plugged in, set the power switch to "OFF" or "STANDBY" on the remote.

To record from the radio

1. Press RECORD (REC) on the remote.

Recording the sound from the connected components

1. Insert a blank cassette.
2. Press the button to select the band you want.
3. Set the indicator to the selected band.

Connecting the component to the player

1. Connect the component to the player using the audio connecting cable (not supplied).
2. Press FUNCTION (FUNCTION) on the remote.
3. If the program number is 10 or more, enter the corresponding number button (as 10 or more)

Tips

- The repeat play indicator "PGM REP" and the shuffle play indicator "SHUF" in the display. Then proceed as follows:

Playing a program

1. Press POWER to turn on the player.
2. Press PROGRAM (PGM) until the program source you want to record.

Recording the sound from the connected components

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.
3. If the power cord is plugged in, set the power switch to "OFF" or "STANDBY" on the remote.

To record from the radio

1. Press RECORD (REC) on the remote.

Connecting optional components

1. Connect the optional components, such as a VCR, and possible MD/CD player through the jacks of the player.

Recording

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.

Tips

- The repeat play indicator "PGM REP" and the shuffle play indicator "SHUF" in the display. Then proceed as follows:

Playing a program

1. Press POWER to turn on the player.
2. Press PROGRAM (PGM) until the program source you want to record.

Recording the sound from the connected components

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.

Tips

- The repeat play indicator "PGM REP" and the shuffle play indicator "SHUF" in the display. Then proceed as follows:

Playing a program

1. Press POWER to turn on the player.
2. Press PROGRAM (PGM) until the program source you want to record.

Recording the sound from the connected components

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.

Tips

- The repeat play indicator "PGM REP" and the shuffle play indicator "SHUF" in the display. Then proceed as follows:

Playing a program

1. Press POWER to turn on the player.
2. Press PROGRAM (PGM) until the program source you want to record.

Recording the sound from the connected components

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.

Tips

- The repeat play indicator "PGM REP" and the shuffle play indicator "SHUF" in the display. Then proceed as follows:

Playing a program

1. Press POWER to turn on the player.
2. Press PROGRAM (PGM) until the program source you want to record.

Recording the sound from the connected components

1. Press POWER to turn on the player.
2. Press REC to select the tape compartment and insert a blank tape. Use TYPE I (normal) tape.
