Operating Instructions
Before operating the unit, please read this manual thoroughly, and retain it for future reference.

Owner’s Record
The model and serial numbers are located on the bottom. Record the serial number in the space provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. DCR-TRV _____________ Model No. AC- ______________

Serial No. _______________________ Serial No. ___________________
Welcome!
Congratulations on your purchase of this Sony Digital Handycam camcorder. With your Digital Handycam, you can capture life’s precious moments with superior picture and sound quality. Your Digital Handycam is loaded with advanced features, but at the same time it is very easy to use. You will soon be producing home video that you can enjoy for years to come.

WARNING
To prevent fire or shock hazard, do not expose the unit to rain or moisture.

For the customers in the U.S.A. and CANADA
DISPOSAL OF LITHIUM ION BATTERY.
LITHIUM ION BATTERY.
DISPOSE OF PROPERLY.
You can return your unwanted lithium ion batteries to your nearest Sony Service Center or Factory Service Center.
Note: In some areas the disposal of lithium ion batteries in household or business trash may be prohibited.
For the Sony Service Center nearest you call 1-800-222-SONY (United States only)
For the Sony Factory Service Center nearest you call 416-499-SONY (Canada only)
Caution: Do not handle damaged or leaking lithium ion battery.

For customers in the U.S.A.
If you have any questions about this product, you may call:
Sony Customer Information Center 1-800-222-SONY (7669)
The number below is for the FCC related matters only.

Regulatory Information

Declaration of Conformity
Trade Name: SONY
Model No.: DCR-TRV730, DCR-TRV828, DCR-TRV830
Responsible Party: Sony Electronics Inc.
Address: 680 Kinderkamack Road, Oradell, NJ 07649 U.S.A
Telephone No.: 201-930-6972
This device complies with Part15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Never expose the battery pack to temperatures above 60°C (140°F) such as in a car parked in the sun or under direct sunlight.
CAUTION
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

“Memory Stick”
This device complies with Part15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.
The shielded interface cable supplied with this equipment must be used with this equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

For customers in CANADA

CAUTION
TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

“Memory Stick”
This Class B digital apparatus complies with Canadian ICES-003.

N50
Main Features

Taking moving or still images, and playing them back
• Recording a picture (p. 19)
• Recording a still image on a tape (p. 33)
• Playing back a tape (p. 27)
• Recording still images or moving pictures on “Memory Stick” (p. 97, 104)
• Viewing a still image or a moving picture recorded on “Memory Stick” (p. 117, 120)

Capturing images on your computer
• Using with analog video unit and your computer (p. 73)
• Viewing still images or moving pictures recorded on “Memory Stick” using USB cable (p. 122)

Other uses
Functions to adjust exposure in the recording mode
• Back light (p. 23)
• NightShot/Super NightShot (p. 23)
• PROGRAM AE (p. 43)
• Adjusting the exposure manually (p. 45)

Functions to give images more impact
• Digital zoom [MENU] (p. 78) The default setting is set to OFF. (To zoom greater than 18x, select the digital zoom power in D ZOOM in the menu settings.)
• Digital program editing (p. 62)
• Fader (p. 37)
• Picture effect (p. 39)
• Digital effect (p. 40)
• Title (p. 47, 49)
• MEMORY MIX (p. 110)

Functions to give a natural appearance to your recordings
• END SEARCH/EDITSEARCH/Rec Review (p. 26)
• Manual focus (p. 46)

Functions to use after recording
• Zero set memory (p. 55)
• HiFi SOUND [MENU] (p. 78)
• SUPER LASER LINK (p. 32)
• Tape PB ZOOM (p. 54)/Memory PB ZOOM (p. 129)

This chapter introduces you to the basic features of your camcorder. See the page in parentheses “( )” for more information.

1 Connecting the power cord (p. 16)

Use the battery pack when using your camcorder outdoors (p. 11).

Open the DC IN jack cover.

Connect the plug with its ▲ mark facing up.

AC power adaptor (supplied)

2 Inserting a cassette (p. 18)

1 Slide OPEN/EJECT in the direction of the arrow and open the lid.

2 Insert the cassette in a straight line deeply into the cassette compartment with the window facing out. Push the middle portion of the back of the cassette to insert.

3 Close the cassette compartment by pressing the PUSH mark on the cassette compartment. After the cassette compartment goes down completely, close the lid until it clicks.
3  Recording a picture (p. 19)

1 Remove the lens cap.

2 Set the POWER switch to CAMERA while pressing the small green button.

3 Open the LCD panel while pressing OPEN. The picture appears on the LCD screen.

4 Press START/STOP. Your camcorder starts recording. To stop recording, press START/STOP button again.

Viewfinder
When the LCD panel is closed, use the viewfinder placing your eye against its eyecup. The picture in the viewfinder is black and white.

When you purchase your camcorder, the clock setting is set to off. If you want to record the date and time for a picture, set the clock setting before recording (p. 17).

4  Monitoring the playback picture on the LCD screen (p. 27)

1 Set the POWER switch to VCR while pressing the small green button.

2 Press ◀ to rewind the tape.

3 Press ▶ to start playback.

Note
Do not pick up your camcorder by holding the viewfinder, the LCD panel, or the battery pack.
Using this manual

The instructions in this manual are for the three models listed in the table below. Before you start reading this manual and operating your camcorder, check the model number by looking at the bottom of your camcorder. The DCR-TRV830 is the model used for illustration purposes. Otherwise, the model name is indicated in the illustrations. Any differences in operation are clearly indicated in the text, for example, “DCR-TRV830 only.”

As you read through this manual, buttons and settings on your camcorder are shown in capital letters.

e.g. Set the POWER switch to CAMERA.

When you carry out an operation, you can hear a beep sound to indicate that the operation is being carried out.

### Type of difference

<table>

<th>TRV730</th>
<th>TRV828</th>
<th>TRV830</th>
</tr>
</thead>
<tbody>
<tr>
<td>LCD screen</td>
<td>6.2 cm (2.5 type)</td>
<td>8.8 cm (3.5 type)</td>
<td>8.8 cm (3.5 type)</td>
</tr>
</tbody>
</table>

### Before using your camcorder

With your digital camcorder, you can use Hi8/Digital8 video cassettes. Your camcorder records and plays back pictures in the Digital8 system. Also, your camcorder plays back tapes recorded in the Hi8/standard 8 (analog) system. You, however, cannot use the functions in “Advanced Playback Operations” on page 52 to 58 for playback in the Hi8/standard 8 system. To enable smooth transition, we recommend that you do not mix pictures recorded in the Hi8/standard 8 system with the Digital8 system on a tape.

### Note on TV color systems

TV color systems differ from country to country. To view your recordings on a TV, you need an NTSC system-based TV.

### Copyright precautions

Television programs, films, video tapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provision of the copyright laws.
Using this manual

Precautions on camcorder care

Lens and LCD screen/finder (on mounted models only)

- The LCD screen and the finder are manufactured using extremely high-precision technology so over 99.99% of the pixels are operational for effective use. However, there may be some tiny black points and/or bright points (white, red, blue or green in color) that constantly appear on the LCD screen and the finder. These points are normal in the manufacturing process and do not affect the recording in any way.

- Do not let your camcorder get wet. Keep your camcorder away from rain and seawater. Letting your camcorder get wet may cause your camcorder to malfunction. Sometimes this malfunction cannot be repaired [a].

- Never leave your camcorder exposed to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight [b].

- Be careful when placing the camera near a window or outdoors. Exposing the LCD screen, the finder or the lens to direct sunlight for long periods may cause malfunctions [c].

- Do not directly shoot the sun. Doing so might cause your camcorder to malfunction. Take pictures of the sun in low light conditions such as dusk [d].

*DCR-TRV830 only

Contents of the recording cannot be compensated if recording or playback is not made due to a malfunction of the camcorder, storage media, etc.
Step 1 Preparing the power supply

Installing the battery pack

We recommend using the battery pack when you use your camcorder outdoors.

1. Lift up the viewfinder.
2. Slide the battery pack down until it clicks.

To remove the battery pack
1. Lift up the viewfinder.
2. Slide the battery pack out in the direction of the arrow while pressing BATT (battery) release lever down.

If you install the large capacity battery pack
If you install the NP-FM70/FM90/FM91 battery pack on your camcorder, extend its viewfinder.
Step 1 Preparing the power supply

Charging the battery pack

Use the battery pack after charging it for your camcorder. Your camcorder operates only with the “InfoLITHIUM” battery pack (M series). See page 148 for details of “InfoLITHIUM” battery pack.

(1) Open the DC IN jack cover and connect the AC power adaptor supplied with your camcorder to the DC IN jack with the plug’s ▲ mark facing up.
(2) Connect the power cord to the AC power adaptor.
(3) Connect the power cord to a wall outlet.
(4) Set the POWER switch to OFF (CHG). Charging begins. The remaining battery time is indicated in minutes on the display window. When the remaining battery indicator changes to ▲, normal charge is completed. To fully charge the battery (full charge), leave the battery pack attached after normal charge is completed until FULL appears on the display window. Fully charging the battery allows you to use the battery longer than usual.

The number in the illustration of the display window may differ from that on your camcorder.

After charging the battery pack
Disconnect the AC power adaptor from the DC IN jack on your camcorder.
Step 1 Preparing the power supply

**Note**
Prevent metallic objects from coming into contact with the metal parts of the DC plug of the AC power adaptor. This may cause a short-circuit, damaging the AC power adaptor.

**When the battery pack is charged fully**
The LCD backlight of the display window is turned off.

**Remaining battery time indicator**
The remaining battery time indicator in the display window roughly indicates the recording time with the viewfinder.

**Until your camcorder calculates the actual remaining battery time**
“– – – – min” appears in the display window.

**While charging the battery pack, no indicator appears or the indicator flashes in the display window in the following cases:**
– The battery pack is not installed correctly.
– Something is wrong with the battery pack.

**If the power may go off although the battery remaining indicator indicates that the battery pack has enough power to operate**
Charge the battery pack fully again so that the indication on the battery remaining indicator is correct.

**When you use the AC power adaptor**
Place the AC power adaptor near a wall outlet. If any trouble occurs with this unit, disconnect the plug from the wall outlet as soon as possible to cut off the power.

**Recommended charging temperature**
We recommend charging the battery pack in an ambient temperature of between 10 °C to 30 °C (50 °F to 86 °F).

**What is "InfoLITHIUM"?**
The “InfoLITHIUM” is a lithium ion battery pack which can exchange data such as battery consumption with compatible electronic equipment. This unit is compatible with the “InfoLITHIUM” battery pack (M series). Your camcorder operates only with the “InfoLITHIUM” battery. “InfoLITHIUM” M series battery packs have the mark. “InfoLITHIUM” is a trademark of Sony Corporation.
Step 1  Preparing the power supply

### Charging time

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>Full charge (Normal charge)</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP-FM50 (supplied)</td>
<td>150 (90)</td>
</tr>
<tr>
<td>NP-FM30</td>
<td>145 (85)</td>
</tr>

</table>

Approximate number of minutes when you use a fully charged battery

Approximate continuous playing time at 25 °C (77 °F). The battery life will be shorter if you use your camcorder in a cold environment.

The recording and playing times of a normally charged battery are about 90 % of those of a fully charged battery.

**Note**

The table shows the playing time for tapes recorded in the Digital8系统. The playing time of tapes recorded in the Hi8/standard 8 system is reduced by about 20 %.
Connecting to a wall outlet

When you use your camcorder for a long time, we recommend that you power it from a wall outlet using the AC power adaptor.

1. Open the DC IN jack cover, and connect the AC power adaptor to the DC IN jack on your camcorder with the plug’s ▲ mark facing up.
2. Connect the power cord to the AC power adaptor.
3. Connect the power cord to a wall outlet.

PRECAUTION
The set is not disconnected from the AC power source (house current) as long as it is connected to the wall outlet, even if the set itself has been turned off.

Notes
• The AC power adaptor can supply power even if the battery pack is attached to your camcorder.
• The DC IN jack has “source priority”. This means that the battery pack cannot supply any power if the power cord is connected to the DC IN jack, even when the power cord is not plugged into a wall outlet.

Using a car battery
Use Sony DC Adaptor/Charger (optional).
Step 2 Setting the date and time

Set the date and time settings when you use your camcorder for the first time. “CLOCK SET” will be displayed each time that you set the POWER switch to CAMERA or MEMORY unless you set the date and time settings. If you do not use your camcorder for about half a year, the date and time settings may be released (bars may appear) because the built-in rechargeable battery will have been discharged (p. 154).

First, set the year, then the month, the day, the hour and then the minute.

(1) Set the POWER switch to CAMERA or MEMORY, and then press MENU to display the menu settings.
(2) Turn the SEL/PUSH EXEC dial to select [ ], then press the dial.
(3) Turn the SEL/PUSH EXEC dial to select CLOCK SET, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to adjust the desired year, then press the dial.
(5) Set the month, day and hour by turning the SEL/PUSH EXEC dial and pressing the dial.
(6) Set the minute by turning the SEL/PUSH EXEC dial and pressing the dial by the time signal. The clock starts to move.
(7) Press MENU to make the menu settings disappear.

The year changes as follows:

1995 ← ··· → 2001 ← ··· → 2079

If you do not set the date and time
“--- -- ----” “--:--:--” is recorded on the tape and the “Memory Stick.”

Note on the time indicator

The internal clock of your camcorder operates on a 12-hour cycle.
• 12:00 AM stands for midnight.
• 12:00 PM stands for noon.
Step 3 Inserting a cassette

We recommend using Hi8 Hi8/Digital8 video cassettes.

(1) Prepare the power supply (p. 11).
(2) Slide OPEN/EJECT in the direction of the arrow and open the lid.
   The cassette compartment automatically lifts up and opens.
(3) Insert the cassette in a straight line deeply into the cassette compartment with
   the window facing out.
   Push the middle portion of the back of the cassette to insert.
(4) Close the cassette compartment by pressing the PUSH mark on the cassette
   compartment. The cassette compartment automatically goes down.
(5) After the cassette compartment going down completely, close the lid until it
   clicks.

To eject a cassette
Follow the procedure above, and eject the cassette in step 3.

Notes
• Do not press the cassette compartment down. Doing so may cause malfunction.
• Your camcorder records pictures in the Digital8 system.
• The recording time when you use your camcorder is half of indicated time on Hi8
  Hi8 tape. If you select the LP mode in the menu settings, 3/4 of indicated time on Hi8
  Hi8 tape.
• If you use standard 8 tape, be sure to play back the tape on this camcorder. Mosaic
  pattern noise may appear when you play back standard 8 tape on other camcorders
  (including other DCR-TRV730/TRV828/TRV830).
• The cassette compartment may not be closed when you press any part of the lid other
  than the PUSH mark.

To prevent accidental erasure
Slide the write-protect tab on the cassette to expose the red mark.
Recording a picture

Your camcorder automatically focuses for you.

1. Remove the lens cap by pressing both knobs on its sides and attach the lens cap to the grip strap.
2. Install the power source and insert a cassette. See “Step 1” to “Step 3” for more information (p. 11 to 18).
3. Set the POWER switch to CAMERA while pressing the small green button. Your camcorder is set to the standby mode.
4. Open the LCD panel while pressing OPEN. The viewfinder automatically turns off.
5. Press START/STOP. Your camcorder starts recording. The REC indicator appears on the screen. The camera recording lamp located on the front of your camcorder lights up. To stop recording, press START/STOP again. The recording lamp lights up in the viewfinder when you record with the viewfinder.

Notes

• Fasten the grip strap firmly.
• Do not touch the built-in microphone during recording.

Note on Recording mode

Your camcorder records and plays back in the SP (standard play) mode and in the LP (long play) mode. Select SP or LP in the menu settings (p. 78). In the LP mode, you can record 1.5 times as long as in the SP mode. When you record a tape in the LP mode on your camcorder, we recommend that you play back the tape on your camcorder.
Recording a picture

**Note on LOCK**
When you slide LOCK to the right, the POWER switch can no longer be set to MEMORY accidentally. The LOCK is released as a default setting.

**To enable smooth transition**
You can make the transition between the last scene you recorded and the next scene smooth as long as you do not eject the cassette if you turn off your camcorder. When you change the battery pack, set the POWER switch to OFF (CHG).

**If you leave your camcorder in the standby mode for 3 minutes**
Your camcorder automatically turns off. This is to save battery power and to prevent battery and tape wear. To resume the standby mode, set the POWER switch to OFF (CHG) once, then turn it to CAMERA again.

**When you record in the SP and LP modes on one tape or you record some scenes in the LP mode**
The playback picture may be distorted or the time code may not be written properly between scenes.

### Adjusting the LCD screen

The LCD panel moves about 90 degrees to the viewfinder side and about 180 degrees to the lens side.

If you turn the LCD panel over so that it faces the other way, the ☞ indicator appears on the LCD screen and in the viewfinder (**Mirror mode**).

![Adjusting the LCD screen](image)

When closing the LCD panel, set it vertically until it clicks, and swing it into the camcorder body.

**Note**
When using the LCD screen except in the mirror mode, the viewfinder automatically turns off.

**When you use the LCD screen outdoors in direct sunlight**
The LCD screen may be difficult to see. If this happens, we recommend that you use the viewfinder.

**When you adjust angles of the LCD panel**
Make sure if the LCD panel is opened up to 90 degrees.

**Picture in the mirror mode**
The picture on the LCD is a mirror-image. However, the picture will be normal when recorded.

**During recording in the mirror mode**
You cannot operate the ZERO SET MEMORY on the Remote Commander.

**Indicators in the mirror mode**
The STBY indicator appears as ⚪ and REC as ●. Some of other indicators appear mirror-reversed and others are not displayed.

**When recording with the LCD panel opened**
Recording time becomes shorter a little compared with when recording with the LCD panel closed.
Brightness of the LCD screen
You can adjust the brightness of the LCD screen. Select LCD B.L. or LCD BRIGHT in the menu settings (p. 78). Even if you adjust the LCD B.L. or LCD BRIGHT, the recorded picture will not be affected.

After recording

(1) Set the POWER switch to OFF (CHG).
(2) Close the LCD panel.
(3) Eject the cassette.

Using the zoom feature

Move the power zoom lever a little for a slower zoom. Move it further for a faster zoom. Using the zoom function sparingly results in better-looking recordings.
“T” side: for telephoto (subject appears closer)
“W” side: for wide-angle (subject appears farther away)

Zoom greater than 18x is performed digitally. To activate digital zoom, select the digital zoom power in D ZOOM in the menu settings. (p. 78)
The picture quality deteriorates as the picture is processed digitally.

The right side of the bar shows the digital zooming zone.
The digital zooming zone appears when you select the digital zoom power in D ZOOM in the menu settings.

Notes on digital zoom
• Digital zoom starts to function when zoom exceeds 18x.
• The picture quality deteriorates as you go toward the “T” side.
• You cannot use the digital zoom when the POWER switch is set to MEMORY.

When you shoot close to a subject
If you cannot get a sharp focus, move the power zoom lever to the “W” side until the focus is sharp. You can shoot a subject that is at least about 80 cm (about 2 feet 5/8 inch) away from the lens surface in the telephoto position, or about 1 cm (about 1/2 inch) away in the wide-angle position.
To record pictures with the viewfinder – adjusting the viewfinder

If you record pictures with the LCD panel closed, check the picture with the viewfinder. Adjust the viewfinder lens to your eyesight so that the indicators in the viewfinder come into sharp focus.

Lift up the viewfinder and move the viewfinder lens adjustment lever.

Viewfinder backlight
You can change the brightness of the backlight. Select VF B.L. in the menu settings. (p. 78)

Indicators displayed in the recording mode
The indicators are not recorded on tape.

- Remaining battery time indicator
- Format indicator
- Recording mode indicator
- STBY/REC indicator
- Time code/Tape counter indicator
- Remaining tape indicator
  This appears after the POWER switch is set to CAMERA for a while.
- Time indicator
  This is displayed for five seconds after the POWER switch is set to CAMERA or MEMORY.
- Date indicator
  This is displayed for five seconds after the POWER switch is set to CAMERA or MEMORY.

Remaining battery time indicator
The remaining battery time indicator roughly indicates the recording time. The indicator may not be correct, depending on the conditions in which you are recording. When you close the LCD panel and open it again, it takes about one minute for the correct remaining battery time in minutes to be displayed.

Time code (for tapes recorded in the Digital8 [+] system only)
The time code indicates the recording or playback time, “0:00:00” (hours:minutes:seconds) in CAMERA mode and “0:00:00:00” (hours:minutes:seconds:frames) in VCR mode. You cannot rewrite only the time code. When you play back tapes recorded in the Hi8/standard 8 system, the tape counter appears on the screen. You cannot reset the time code or the tape counter.
Recording a picture

Shooting backlit subjects – BACK LIGHT

When you shoot a subject with the light source behind the subject or a subject with a light background, use the backlight function.

Press BACK LIGHT in CAMERA or MEMORY mode. The indicator appears on the screen. To cancel, press BACK LIGHT again.

If you press EXPOSURE when shooting backlit subjects
The backlight function will be canceled.

Shooting in the dark – NightShot/Super NightShot

The NightShot function enables you to shoot a subject in a dark place. For example, you can satisfactorily record the environment of nocturnal animals for observation when you use this function.

While your camcorder is in CAMERA or MEMORY mode, slide NIGHTSHOT to ON. and “NIGHTSHOT” indicators flash on the screen. To cancel the NightShot function, slide NIGHTSHOT to OFF.
Recording a picture

Using SUPER NIGHTSHOT
The Super NightShot mode makes subjects up to 16 times brighter than those recorded in the NightShot mode.

(1) Slide NIGHTSHOT to ON in CAMERA mode.  and “NIGHTSHOT” indicators flash on the screen.
(2) Press SUPER NIGHTSHOT.  and “SUPER NIGHTSHOT” indicators flash on the screen.
   To cancel the Super NightShot mode, press SUPER NIGHTSHOT again.

Using the NightShot Light
The picture will be clearer with the NightShot Light on. To enable NightShot Light, set N.S.LIGHT to ON in the menu settings (p. 78).

Notes
• Do not use the NightShot function in bright places (ex. outdoors in the daytime). This may cause your camcorder to malfunction.
• When you keep NIGHTSHOT set to ON in normal recording, the picture may be recorded in incorrect or unnatural colors.
• If focusing is difficult with the autofocus mode when using the NightShot function, focus manually.

While using the NightShot function, you can not use the following functions:
– Exposure
– PROGRAM AE

While using the Super NightShot function, you can not use the following functions:
– Fader
– Digital effect
– Exposure
– PROGRAM AE

Shutter speed in the Super NightShot mode
The shutter speed will be automatically changed depending on the brightness of the background. The motion of the picture will be slow.

In MEMORY mode
You cannot use the Super NightShot function.

NightShot Light
NightShot Light rays are infrared and so are invisible. The maximum shooting distance using the NightShot Light is about 3 m (10 feet).
Self-timer recording

Recording with the self-timer starts in 10 seconds automatically. You can also use the Remote Commander for this operation.

(1) Press MENU to display the menu settings in the standby mode.
(2) Turn the SEL/PUSH EXEC dial to select \( \bigcirc \), then press the dial.
(3) Turn the SEL/PUSH EXEC dial to select SELFTIMER, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select ON, then press the dial.
(5) Press MENU to make the menu settings disappear.
(6) Press START/STOP.

Self-timer starts counting down from 10 with a beep sound. In the last two seconds of the countdown, the beep sound gets faster, then recording starts automatically. To stop recording, press START/STOP again.

To stop the countdown
Press START/STOP.

To restart the countdown, press START/STOP again.

To record still images using the self-timer
Press PHOTO in step 6. (p. 34)

To cancel self-timer recording
Set SELFTIMER to OFF in the menu settings in the standby mode.

Note
The self-timer recording mode is automatically cancelled when:
– Self-timer recording is finished.
– The POWER switch is set to OFF (CHG) or VCR.

Self-timer memory photo recording
You can also record still images on “Memory Stick”s with the self-timer (p. 101).
Checking the recording
- END SEARCH/EDITSEARCH/Rec Review

You can use these buttons to check the recorded picture or shoot so that the transition between the last recorded scene and the next scene you record is smooth.

END SEARCH

You can go to the end of the recorded section after you record.

Press END SEARCH in the standby mode.
The last 5 seconds of the recorded section are played back and returns to the standby mode. You can monitor the sound from the speaker or headphones.

EDITSEARCH

You can search for the next recording start point.

Hold down the +/– (7) side of EDITSEARCH in the standby mode. The recorded section is played back.
+ : to go forward
– : to go backward
Release EDITSEARCH to stop playback. If you press START/STOP, re-recording begins from the point you released EDITSEARCH. You cannot monitor the sound.

Rec Review

You can check the section which you have stopped most recently.

Press the – (8) side of EDITSEARCH momentarily in the standby mode.
The section you have stopped most recently will be played back for a few seconds, and then your camcorder will return to the standby mode. You can monitor the sound from the speaker or headphones.

Notes
• END SEARCH, EDITSEARCH and Rec Review work only for tapes recorded in the Digital8 (6) system.
• If you start recording after using the end search function, occasionally, the transition between the last scene you recorded and the next scene may not be smooth.
• Once you eject the cassette after you have recorded on the tape, the end search function does not work.

If a tape has a blank portion in the recorded portions
The end search function may not work correctly.
Playing back a tape

You can monitor the playback picture on the LCD screen. If you close the LCD panel, you can monitor the playback picture in the viewfinder. You can control playback using the Remote Commander supplied with your camcorder.

(1) Install the power source and insert the recorded tape.
(2) Set the POWER switch to VCR while pressing the small green button.
(3) Open the LCD panel while pressing OPEN.
(4) Press $\leftarrow$ to rewind the tape.
(5) Press $\rightarrow$ to start playback.
(6) To adjust the volume, press either of the two buttons on VOLUME. The speaker on your camcorder is silent when the LCD panel is closed.

To stop playback
Press $\square$.

When monitoring on the LCD screen
You can turn the LCD panel over and move it back to the camcorder body with the LCD screen facing out.
Playing back a tape

To display the screen indicators – Display function

Press DISPLAY on your camcorder or the Remote Commander supplied with your camcorder.
The indicators appear on the screen.
To make the indicators disappear, press DISPLAY again.

Using the data code function
Your camcorder automatically records not only images on the tape but also the recording data (date/time or various settings when recorded) (Data code). Use the Remote Commander for this operation.

Press DATA CODE on the Remote Commander in the playback mode.
The display changes as follows:
date/time → various settings (SteadyShot, exposure AUTO/MANUAL, white balance, gain, shutter speed, aperture value) → no indicator

<table>
<thead>
<tr>
<th>Date/time</th>
<th>Various settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>JUL 4 2001 12:05:56 AM</td>
<td>[a] [b] [c] [d] [e] [f]</td>
</tr>
<tr>
<td>40 min E 0:00:23:01</td>
<td>AUTO 60 AWB F1.6 9dB</td>
</tr>
</tbody>
</table>

[a] SteadyShot off indicator
[b] Exposure mode indicator
[c] White balance indicator
[d] Gain indicator
[e] Shutter speed indicator
[f] Aperture value

Not to display various settings
Set DATA CODE to DATE in the menu settings (p. 78). The display changes as follows:
date/time → no indicator

Note on the data code function
The data code function works only for tapes recorded in the Digital8 system.

Recording data
Recording data is your camcorder’s information when you have recorded. In the recording mode, the recording data will not be displayed.
Playing back a tape

**When you use data code function, bars (--- ---- and --:--) appear if:**
- A blank section of the tape is being played back.
- The tape is unreadable due to tape damage or noise.
- The tape was recorded by a camcorder without the date and time set.

**Data code**
When you connect your camcorder to the TV, the data code appears on the TV screen.

**Remaining battery time indicator during playback**
The indicator indicates the approximate continuous playback time. The indicator may not be correct, depending on the conditions in which you are playing back. When you close the LCD panel and open it again, it takes about 1 minute for the correct remaining battery time to be displayed.

**Various playback modes**

To operate video control buttons, set the **POWER switch** to **VCR**.

**To view a still image (playback pause)**
Press **II** during playback. To resume playback, press **II** or **I**.

**To advance the tape**
Press **I** in the stop mode. To resume normal playback, press **I**.

**To rewind the tape**
Press **I** in the stop mode. To resume normal playback, press **I**.

**To change the playback direction**
Press `<` on the Remote Commander during playback to reverse the playback direction. To resume normal playback, press **I**.

**To locate a scene monitoring the picture (picture search)**
Keep pressing **I** or **I** during playback. To resume normal playback, release the button.

**To monitor the high-speed picture while advancing or rewinding the tape (skip scan)**
Keep pressing **I** while rewinding or **I** while advancing the tape. To resume rewinding or advancing, release the button.

**To view the picture at slow speed (slow playback)**
Press **I** on the Remote Commander during playback. For slow playback in the reverse direction, press `<`, then press **I** on the Remote Commander. To resume normal playback, press **I**.

**To view the picture at double speed**
Press **×2** on the Remote Commander during playback. For double speed playback in the reverse direction, press `<`, then press **×2** on the Remote Commander. To resume normal playback, press **I**.

**To view the picture frame-by-frame**
Press **I** on the Remote Commander in the playback pause mode. For frame-by-frame playback in the reverse direction, press **I**. To resume normal playback, press **I**.

**To search the last scene recorded (END SEARCH)**
Press **END SEARCH** in the stop mode. The last 5 seconds of the recorded section plays back and stops.
In the various playback modes
• Noise may appear when your camcorder plays back tapes recorded in the Hi8/standard 8 system.
• Sound is muted.
• The previous recording may appear as a mosaic image when playing back in the Digital8 system.

Notes on the playback pause mode
• When the playback pause mode lasts for 3 minutes, your camcorder automatically enters the stop mode. To resume playback, press $\Rightarrow$.
• The previous recording may appear.

Slow playback for tapes recorded in the Digital8 system
The slow playback can be performed smoothly on your camcorder; however, this function does not work for an output signal from the DV IN/OUT jack.

When you play back a tape in reverse
Horizontal noise may appear at the center or top and bottom of the screen. This is not a malfunction.
Connecting your camcorder to your TV with the A/V connecting cable supplied with your camcorder allows you to watch the playback picture on the TV screen. You can operate the playback control buttons in the same way as when you monitor playback pictures on the LCD screen. When monitoring the playback picture on the TV screen, we recommend that you power your camcorder from a wall outlet using the AC power adaptor (p. 16). Refer to the operating instructions of your TV.

Open the jack cover. Connect your camcorder to the TV using the A/V connecting cable. Then, set the TV/VCR selector on the TV to VCR.

If your TV is already connected to a VCR

Connect your camcorder to the LINE IN input on the VCR by using the A/V connecting cable supplied with your camcorder. Set the input selector on the VCR to LINE.

If your TV or VCR is a monaural type

Connect the yellow plug of the A/V connecting cable to the video input jack and the white or the red plug to the audio input jack on the VCR or the TV. If you connect the white plug, the sound is L (left) signal. If you connect the red plug, the sound is R (right) signal.

If your TV or VCR has an S video jack

Connect using an S video cable (optional) to obtain high-quality pictures. With this connection, you do not need to connect the yellow (video) plug of the A/V connecting cable.

Connect an S video cable (optional) to the S video jacks on both your camcorder and the TV or the VCR.

To display the screen indicators on TV

Set DISPLAY to V-OUT/LCD in the menu settings (p. 78). Then press DISPLAY on your camcorder. To turn off the screen indicators, press DISPLAY on your camcorder again.
Using the AV cordless IR receiver

Once you connect the AV cordless IR receiver (optional) to your TV or VCR, you can easily view the picture on your TV. For details, refer to the operating instructions of the AV cordless IR receiver.

Before operation
Attach the power supply such as the AC power adaptor to your camcorder, and insert the recorded tape.

1. After connecting your TV and AV cordless IR receiver, set the POWER switch on the AV cordless IR receiver to ON.
2. Turn the TV on and set the TV/VCR selector on the TV to VCR.
3. Set the POWER switch on your camcorder to VCR.
4. Press SUPER LASER LINK. The lamp of SUPER LASER LINK lights up.
5. Press ▶ on your camcorder to start playback.
6. Point the super laser link emitter at the AV cordless IR receiver. Adjust the position of your camcorder and the AV cordless IR receiver to obtain clear playback pictures.

To cancel the super laser link function
Press SUPER LASER LINK. The lamp on the SUPER LASER LINK button goes out.

If you use a Sony TV
• You can turn on the TV automatically when you press SUPER LASER LINK on your camcorder. To do so, do as follow in advance:
  – Turn the TV’s main switch on.
  – Set AUTO TV ON to ON in the menu settings.
  – Point the super laser link emitter of your camcorder at the TV’s remote sensor.
• You can switch the video input of the TV automatically to the one which the AV cordless IR receiver is connected. To do so, set AUTO TV ON to ON and TV INPUT to the same video input (1, 2, 3) in the menu settings. With some models, however, the picture and sound may be disconnected momentarily when the video input is switched.
• The above feature may not work on some TV models.

If you turn the power off
Super laser link function turns off automatically.

When super laser link is activated (the SUPER LASER LINK button is lit)
Your camcorder consumes power. Press SUPER LASER LINK to turn off the super laser link function when it is not needed.

is a trademark of Sony Corporation.
You can record a still image like a photograph. This mode is useful when you want to record an image such as a photograph or when you print a picture using a video printer (optional).

You can record about 510 images in the SP mode and about 765 images in the LP mode on a tape which can record for 60 minutes in the SP mode.

Besides the operation described here, your camcorder can record still images on “Memory Stick”s (p. 97).

1. In the standby mode, keep pressing PHOTO lightly until a still image appears. The CAPTURE indicator appears on the screen. Recording does not start yet.
   To change the still image, release PHOTO, select a still image again, and then press and hold PHOTO lightly.

2. Press PHOTO deeper.
   The still image on the screen is recorded for about seven seconds. The sound during those seven seconds is also recorded.
   The still image is displayed until recording is completed.

Notes
• During the tape photo recording, you cannot change the mode or setting.
• The PHOTO button does not work:
  – while the digital effect function is set or in use.
  – while the fader function is in use.
• When recording a still image, do not shake your camcorder. Mosaic-pattern noise may appear on the image.

To use tape photo recording function using the Remote Commander
Press PHOTO in the Remote Commander. Your camcorder records an image on the screen immediately.

When you use the tape photo recording function during normal CAMERA recording
You cannot check an image on the screen by pressing PHOTO lightly. Press PHOTO deeper. The still image is then recorded for about seven seconds, and your camcorder returns to the standby mode.

To record clear and less fluctuated still images
We recommend that you record on “Memory Stick”s.
Self-timer recording

You can record still images on tapes with the self-timer. You can also use the Remote Commander for this operation.

(1) In the standby mode, press MENU to display the menu settings.
(2) Turn the SEL/PUSH EXEC dial to select , then press the dial.
(3) Turn the SEL/PUSH EXEC dial to select SELFTIMER, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select ON, then press the dial.
(5) Press MENU to make the menu settings disappear.
(6) Press PHOTO deeper.

Self-timer starts counting down from 10 with a beep sound. In the last two seconds of the countdown, the beep sound gets faster, then recording starts automatically.

To cancel self-timer recording
Set SELFTIMER to OFF in the menu settings in the standby mode.
You cannot cancel the self-timer recording using the Remote Commander.

Note
The self-timer recording mode is automatically cancelled when:
– Self-timer recording is finished.
– The POWER switch is set to OFF (CHG) or VCR.
Printing the still image

You can print a still image by using the video printer (optional). Connect the video printer using the A/V connecting cable supplied with your camcorder. Connect the A/V connecting cable to the AUDIO/VIDEO jack and connect the yellow plug of the cable to the video input of the video printer. Refer to the operating instructions of the video printer as well.

If the video printer is equipped with S video input
Use the S video connecting cable (optional). Connect it to the S VIDEO jack and the S video input of the video printer.

: Signal flow
Using the wide mode

You can record a 16:9 wide picture to watch on the 16:9 wide-screen TV (16:9WIDE). Black bands appear on the LCD screen or in the viewfinder during recording in 16:9 WIDE mode [a]. The picture during playing back on a normal TV [b] or a wide-screen TV [c] are compressed in the widthwise direction. If you set the screen mode of the wide-screen TV to the full mode, you can watch pictures of normal images [d].

In the standby mode, set 16:9WIDE to ON in the menu settings (p. 78).

To cancel the wide mode
Set 16:9WIDE to OFF in the menu settings.

In the wide mode
You cannot select OLD MOVIE.

During recording
You cannot select or cancel the wide mode. When you cancel the wide mode, set your camcorder to the standby mode and then set 16:9WIDE to OFF in the menu setting.

Connection for a TV
Pictures recorded in the 16:9WIDE mode automatically appear on the TV screen at full size when:
– you connect your camcorder to a TV that is compatible with the video ID (ID-1/ID-2) system.
– you connect your camcorder to the S video jack on the TV.

ID-1 system
The ID-1 system sends aspect ratio information (16:9, 4:3, or letter box) with video signals. If you connect a TV compatible with the ID-1 system, the screen size is automatically selected.

ID-2 system
The ID-2 system sends a copyright protection signal with ID-1 signals inserted between video signals when you connect your camcorder to other equipment by an A/V connecting cable.
Using the fader function

You can fade the picture in or out to give your recording a professional appearance.

[a]  STBY  REC

FAADER

OVERLAP *

WIPE *

DOT *
(random dot)

[b]  STBY  REC

MONOTONE
When fading in, the picture gradually changes from black-and-white to color.
When fading out the picture gradually changes from color to black-and-white.

* Fade in only
Using the fader function

(1) **When fading in [a]**
In the standby mode, press FADER until the desired fader indicator flashes.

**When fading out [b]**
In the recording mode, press FADER until the desired fader indicator flashes.
The indicator changes as follows:
FADER → MONOTONE → OVERLAP → WIPE → DOT
The last selected fader mode is indicated first of all.

(2) Press START/STOP. The fader indicator stops flashing.
After the fade in/out is carried out, your camcorder automatically returns to
the normal mode.

To cancel the fader function
Before pressing START/STOP, press FADER until the indicator disappears.

Notes
- The overlap, wipe and dot functions work only for tapes recorded in the Digital8 system.
- You cannot use the following functions while using the fader function. Also, you
cannot use the fader function while using the following functions:
  - Digital effect
  - Low lux mode of PROGRAM AE (Overlap, wipe, or dot function only)
  - Super NightShot
  - Tape photo recording

Before operating the overlap, wipe, or dot function
Your camcorder stores the image on the tape. As the image is being stored, the indicator
flashes quickly, and the image you are shooting disappears from the screen. Depending
on the tape condition, the image may not be recorded clearly.
Using special effects – Picture effect

You can digitally process images to obtain special effects like those in films or on the TV.

NEG. ART [a]: The color and brightness of the image is reversed.
SEPIA: The image is sepia.
B&W: The image is monochrome (black-and-white).
SOLARIZE [b]: The light intensity is clearer, and the picture looks like an illustration.
SLIM [c]: The image expands vertically.
STRETCH [d]: The image expands horizontally.
PASTEL [e]: The contrast of the image is emphasized, and the image looks like an animated cartoon.
MOSAIC [f]: The image is mosaic.

(1) Press MENU to display the menu settings in CAMERA mode.
(2) Turn SEL/PUSH EXEC dial to select [ ] , then press the dial.
(3) Turn SEL/PUSH EXEC dial to select P EFFECT, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select the desired picture effect mode, then press the dial.

To turn the picture effect function off
Set P EFFECT to OFF in the menu settings.

While using the picture effect function
You cannot select OLD MOVIE with the digital effect function.

When you turn the power off
The picture effect is automatically canceled.
You can add special effects to recorded image using the various digital functions. The sound is recorded normally.

**STILL**
You can record a still image so that it is superimposed on a moving image.

**FLASH (FLASH MOTION)**
You can record still images successively at constant intervals.

**LUMI. (LUMINANCEKEY)**
You can swap a brighter area in a still image with a moving image.

**TRAIL**
You can record the image so that an incidental image like a trail is left.

**SLOW SHTR (SLOW SHUTTER)**
You can slow down the shutter speed. The slow shutter mode is good for recording dark images more brightly.

**OLD MOVIE**
You can add an old movie type atmosphere to images. Your camcorder automatically sets the wide mode to ON, picture effect to SEPIA, and the appropriate shutter speed.
(1) Press MENU to display the menu settings in CAMERA mode.
(2) Turn SEL/PUSH EXEC dial to select \[ \text{MENU} \], then press the dial.
(3) Turn SEL/PUSH EXEC dial to select D EFFECT, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select the desired digital effect mode.
(5) Press the SEL/PUSH EXEC dial. The bars appear on the screen. In the STILL and LUMI. modes, the still image is stored in memory.
(6) Turn the SEL/PUSH EXEC dial to adjust the effect as follows:

STILL – The rate of the still image you want to superimpose on the moving image
FLASH – The interval of flash motion
LUMI. – The color scheme of the area in the still image which is to be swapped with a moving image
TRAIL – The vanishing time of the incidental image
SLOW SHTR – Shutter speed. The larger the shutter speed number, the slower the shutter speed.
OLD MOVIE – No adjustment necessary

The more bars there are on the screen, the stronger the digital effect. The bars appear in the following modes: STILL, FLASH, LUMI. and TRAIL.

To cancel the digital effect
Set D EFFECT to OFF in the menu settings.
Using special effects - Digital Effect

Notes
• The following functions do not work during digital effect:
  – Fader
  – Low lux mode of PROGRAM AE
  – Tape photo recording
  – Super NightShot
• The following function does not work in the slow shutter mode:
  – PROGRAM AE
• The following functions do not work in the old movie mode:
  – Wide mode
  – Picture effect
  – PROGRAM AE

When you turn the power off
The digital effect is automatically canceled.

When recording in the slow shutter mode
Auto focus may not be effective. Focus manually using a tripod.

Shutter speed

<table>
<thead>
<tr>
<th>Shutter speed number</th>
<th>Shutter speed</th>

</tbody>
</table>
You can select PROGRAM AE (Auto Exposure) mode to suit your specific shooting requirements.

**Spotlight**
This mode prevents people’s faces, for example, from appearing excessively white when shooting subjects lit by strong light in the theater.

**Soft portrait**
This mode brings out the subject while creating a soft background for subjects such as people or flowers.

**Sports lesson**
This mode minimizes shake on fast-moving subjects such as in tennis or golf.

**Beach & ski**
This mode prevents people’s faces from appearing dark in strong light or reflected light, such as at a beach in midsummer or on a ski slope.

**Sunset & moon**
This mode allows you to maintain atmosphere when you are recording sunsets, general night views, fireworks displays and neon signs.

**Landscape**
This mode is for when you are recording distant subjects such as mountains and prevents your camcorder from focusing on glass or metal mesh in windows when you are recording a subject behind glass or a screen.

**Low lux**
This mode makes subjects brighter in insufficient light.
Using the PROGRAM AE function

(1) Press MENU to display menu settings in CAMERA or MEMORY mode.
(2) Turn SEL/PUSH EXEC dial to select [M], then press the dial.
(3) Turn SEL/PUSH EXEC dial to select PROGRAM AE, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select the desired mode.

To turn the PROGRAM AE function off
Set PROGRAM AE to AUTO in the menu settings.

Notes
• In the spotlight, sports lesson and beach & ski modes, you cannot take close-ups. This is because your camcorder is set to focus only on subjects in the middle to far distance.
• In the sunset & moon and landscape modes, your camcorder is set to focus only on distant subjects.
• The following functions do not work in the PROGRAM AE mode:
  – Slow shutter
  – Old movie
• The following functions do not work in the low lux mode:
  – Digital effect
  – Overlap
  – Wipe
  – Dot
• While setting the NIGHTSHOT to ON, the PROGRAM AE function does not work. (The indicator flashes.)
• While shooting in MEMORY mode, the low lux mode and the sports lesson mode do not work. (The indicator flashes.)

If you are recording under a discharge tube such as a fluorescent lamp, sodium lamp or mercury lamp
Flickering or changes in color may occur in the following modes. If this happens, turn the PROGRAM AE function off.
  – Soft portrait mode
  – Sports lesson mode
You can manually adjust and set the exposure.
Adjust the exposure manually in the following cases:
– The subject is backlit
– Bright subject and dark background
– To record dark pictures (e.g. night scenes) faithfully

(1) Press EXPOSURE in CAMERA or MEMORY mode. The exposure indicator appears on the screen.
(2) Turn the SEL/PUSH EXEC dial to adjust the brightness.

To return to the automatic exposure mode
Press EXPOSURE.

Note
When you adjust the exposure manually, the backlight function does not work in CAMERA or MEMORY mode.

Your camcorder automatically returns to the automatic mode:
– if you change the PROGRAM AE mode
– if you slide NIGHTSHOT to ON
You can gain better results by manually adjusting the focus in the following cases:
• The autofocus mode is not effective when shooting:
  – subjects through glass coated with water droplets.
  – horizontal stripes.
  – subjects with little contrast with backgrounds such as walls and sky.
• When you want to change the focus from a subject in the foreground to a subject in the background.
• Shooting a stationary subject when using a tripod.

(1) Set FOCUS to MANUAL in CAMERA or MEMORY mode. The \( \text{\textcircled{F}} \) indicator appears on the screen.
(2) Turn the focus ring to sharpen focus.

To return to the autofocus mode
Set FOCUS to AUTO.

To focus precisely
Adjust the zoom by first focusing at the “T” (telephoto) position and then shooting at the “W” (wide-angle) position. This makes focusing easier.

When you shoot close to the subject
Focus at the end of the “W” (wide-angle) position.

\( \text{\textcircled{F}} \) changes to the following indicators:
• \( \text{\textcircled{↑}} \) when recording a distant subject.
• \( \text{\textcircled{↓}} \) when the subject is too close to focus on.
Superimposing a title

You can select one of eight preset titles and two custom titles (p. 49). You can also select the language, color, size and position of titles.

(1) Press TITLE to display the title menu in the standby mode. The title menu display appears on the screen.
(2) Turn the SEL/PUSH EXEC dial to select ☐, then press the dial.
(3) Turn the SEL/PUSH EXEC dial to select the desired title, then press the dial. The titles are displayed in the language you selected.
(4) Change the color, size, or position, if necessary.
   ① Turn the SEL/PUSH EXEC dial to select the color, size, or position, then press the dial. The item appears on the screen.
   ② Turn the SEL/PUSH EXEC dial to select the desired item, then press the dial.
   ③ Repeat steps ① and ② until the title is laid out as desired.
(5) Press the SEL/PUSH EXEC dial again to complete the setting.
(6) Press START/STOP to start recording.
(7) When you want to stop recording the title, press TITLE.
Superimposing a title

To superimpose the title while you are recording
Press TITLE while you are recording, and carry out steps 2 to 5. When you press the SEL/PUSH EXEC dial at step 5, the title is recorded.

To select the language of a preset title
If you want to change the language, select ☑ before step 2. Then select the desired language and return to step 2.

If you display the menu while superimposing a title
The title is not recorded while the menu is displayed.

To use the custom title
If you want to use the custom title, select ☑ in step 2.

Title setting
• The title color changes as follows:
  WHITE ↔ YELLOW ↔ VIOLET ↔ RED ↔ CYAN ↔ GREEN ↔ BLUE
• The title size changes as follows:
  SMALL ↔ LARGE
  You cannot input more than 12 characters in LARGE size.
• The title position changes as follows:
  1 ↔ 2 ↔ 3 ↔ 4 ↔ 5 ↔ 6 ↔ 7 ↔ 8 ↔ 9
  The larger the position number, the lower the title is positioned.
  When you select the title size LARGE, you cannot choose position 9.

When you are selecting and setting the title
You cannot record the title displayed on the screen.

When you superimpose a title while you are recording
The beep does not sound.

While you are playing back
You can superimpose a title. However, the title is not recorded on tape.
You can record a title when you dub a tape connecting your camcorder to the VCR with the A/V connecting cable. If you use the i.LINK cable instead of the A/V connecting cable, you cannot record the title.
Making your own titles

You can make up to two titles and store them in your camcorder. Each title can have up to 20 characters.

1. Press TITLE in the standby or VCR mode.
2. Turn the SEL/PUSH EXEC dial to select \( \text{SEL} \), then press the dial.
3. Turn the SEL/PUSH EXEC dial to select CUSTOM1 SET or CUSTOM2 SET, then press the dial.
4. Turn the SEL/PUSH EXEC dial to select the column of the desired character, then press the dial.
5. Turn the SEL/PUSH EXEC dial to select the desired character, then press the dial.
6. Repeat steps 4 and 5 until you have selected all characters and completed the title.
7. To finish making your own titles, turn the SEL/PUSH EXEC dial to select \([\text{SET}]\), then press the dial. The title is stored in memory.
8. Press TITLE to make the title menu disappear.
Making your own titles

To change a title you have stored
In step 3, select CUSTOM1 SET or CUSTOM2 SET, depending on which title you want to change, then press the SEL/PUSH EXEC dial. Turn the SEL/PUSH EXEC dial to select [←], then press the dial to delete the title. The last character is erased. Enter the new title as desired.

If you take 3 minutes or longer to enter characters in the standby mode while a cassette is in your camcorder
The power automatically goes off. The characters you have entered remain stored in memory. Set the POWER switch to OFF (CHG) once, and turn it to CAMERA again, then proceed from step 1.
We recommend setting the POWER switch to VCR or removing the cassette so that your camcorder does not automatically turn off while you are entering title characters.

If you select [➔P2]
The menu for selecting alphabet and Russian characters appear. Select [➔P1] to return to the previous screen.

To erase a character
Select [←]. The last character is erased.

To enter a space
Select [Z& ?!], then select the blank part.
Inserting a scene

You can insert a scene in the middle of a recorded tape by setting the start and end points. The previously recorded frames between these start and end points will be erased. Use the Remote Commander for this operation.

(1) While your camcorder is in the standby mode, keep pressing EDITSEARCH, and release the button at the insert end point [b].

(2) Press ZERO SET MEMORY. The ZERO SET MEMORY indicator flashes and the counter resets to zero.

(3) Keep pressing the – side of EDITSEARCH and release the button at the insert start point [a].

(4) Press START/STOP to start recording. The scene is inserted. Recording stops automatically near the counter zero point. Your camcorder returns to the standby mode.

Notes

• The zero set memory function works only for tapes recorded in the Digital8 system.
• The picture and the sound may be distorted at the end of the inserted section when it is played back.

If a tape has a blank portion in the recorded portions

The zero set memory function may not work correctly.
During playback, you can process a scene using the picture effect functions: NEG.ART, SEPIA, B&W and SOLARIZE.

(1) Press MENU to display the menu settings in the playback or playback pause mode.
(2) Turn SEL/PUSH EXEC dial to select \text{M}, then press the dial.
(3) Turn SEL/PUSH EXEC dial to select P EFFECT, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select the desired picture effect mode, then press the dial.

For details of each picture effect function, see page 39.

To cancel the picture effect function
Set P EFFECT to OFF in the menu settings.

Notes
• The picture effect function works only for tapes recorded in the Digital8 \(\) system.
• You cannot process externally input scenes using the picture effect function.
• You cannot record pictures that you have processed using the picture effect function with this camcorder. To record pictures that you have processed using the picture effect function, record the pictures on the VCR using your camcorder as a player.

Pictures processed by the picture effect function
Pictures processed by the picture effect function are not output through the DV IN/OUT jack.

When you set the POWER switch to OFF (CHG) or stop playing back
The picture effect function is automatically canceled.
Playing back a tape with digital effects

During playback, you can process a scene using the digital effect functions: STILL, FLASH, LUMI, and TRAIL.

(1) Press MENU to display the menu settings in the playback mode.
(2) Turn SEL/PUSH EXEC dial to select STILL, then press the dial.
(3) Turn SEL/PUSH EXEC dial to select D EFFECT, then press the dial.
(4) Turn SEL/PUSH EXEC dial to select the desired digital effect mode, then press the dial. The bars appear on the screen. In the STILL or LUMI mode, the image where you press the SEL/PUSH EXEC dial is stored in memory as a still image.
(5) Turn the SEL/PUSH EXEC dial to adjust the effect.
   For details of each digital effect function, see page 40.

To cancel the digital effect function
Set D EFFECT to OFF in the menu settings.

Notes
- The digital effect function works only for tapes recorded in the Digital8 system.
- You cannot process externally input scenes using the digital effect function.
- You cannot record images that you have processed using the digital effect function with this camcorder. To record images that you have processed using the digital effect function, record the images on the VCR using your camcorder as a player.

Pictures processed by the digital effect function
Pictures processed by the digital effect function are not output through the DV IN/OUT jack.

When you set the POWER switch to OFF (CHG) or stop playing back
The digital effect function is automatically canceled.
You can enlarge moving and still images recorded on tapes. You can also dub the enlarged images to tapes or copy to “Memory Stick”s. Besides the operation described here, your camcorder can enlarge still images recorded on “Memory Stick”s.

(1) Press PB ZOOM on your camcorder in the playback or playback pause mode. The image is enlarged, and ↑↓ indicators which showing the direction to move the image appear on the screen.

(2) Turn SEL/PUSH EXEC dial to move the enlarged image, then press the dial.
   ↑ : The image moves downwards.
   ↓ : The image moves upwards.
   ← → becomes available.

(3) Turn SEL/PUSH EXEC dial to move the enlarged image, then press the dial.
   ← : The image moves rightward (Turn the dial downwards.)
   → : The image moves leftward (Turn the dial upwards.)

To cancel PB ZOOM function
Press PB ZOOM.

Notes
• PB ZOOM works only for tapes recorded in the Digital8 system.
• You cannot process externally input scenes using PB ZOOM function.
• You cannot record pictures that you have processed using PB ZOOM function with this camcorder. To record pictures that you have processed using PB ZOOM function, record the pictures on the VCR using your camcorder as a player.

Pictures processed by PB ZOOM function
Pictures processed by PB ZOOM function are not output through the DV IN/OUT jack.

PB ZOOM function is automatically canceled when:
– the POWER switch is set to OFF (CHG)
– you stop playing back
– you press MENU
– you press TITLE
Your camcorder goes forward or backward to automatically stop at a desired scene having a counter value of “0:00:00”.
Use the Remote Commander for this operation.
Use this function, for example, to view a desired scene later on during playback.

(1) In the playback mode, press DISPLAY.
(2) Press ZERO SET MEMORY at the point you want to locate later. The counter shows “0:00:00” and the ZERO SET MEMORY indicator flashes on the screen.
(3) Press ■ when you want to stop playback.
(4) Press ◄ to rewind the tape to the counter’s zero point. The tape stops automatically when the counter reaches approximately zero. The ZERO SET MEMORY indicator disappears and the time code appears.
(5) Press ▶. Playback starts from the counter’s zero point.

Notes
• The zero set memory function works only for tapes recorded in the Digital8 system.
• When you press ZERO SET MEMORY before rewinding the tape, the zero set memory function is canceled.
• There may be a discrepancy of several seconds from the time code.

If a tape has a blank portion in the recorded portions
The zero set memory function may not work correctly.
Searching a recording by date
- Date search

You can automatically search for the point where the recording date changes and start playback from that point (Date search). Use the Remote Commander for this operation. Use this function to check where recording dates change or to edit the tape at each recording date.

(1) Set the POWER switch to VCR.
(2) Press SEARCH MODE on the Remote Commander repeatedly, until the date search indicator appears on the screen.
   The indicator changes as follows:
   DATE SEARCH → PHOTO SEARCH → PHOTO SCAN → (no indicator)
(3) When the current position is [b], press [◄◄] to search towards [a] or press [►►] to search towards [c]. Your camcorder automatically starts playback at the point where the date changes.
   Each time you press [◄◄] or [►►], the camcorder searches for the previous or next date.

To stop searching
Press ■.

Notes
• The date search works only for tapes recorded in the Digital8 system.
• If one day’s recording is less than two minutes, your camcorder may not accurately find the point where the recording date changes.

If a tape has a blank portion in the recorded portions
The date search function may not work correctly.
You can search for the recorded still image recorded on tape (photo search). You can also search for still images one after another and display each image for five seconds automatically (photo scan). Use the Remote Commander for these operations.

**Searching for a photo**

1. Set the POWER switch to VCR.
2. Press SEARCH MODE on the Remote Commander repeatedly, until the photo search indicator appears on the screen.
   - The indicator changes as follows: DATE SEARCH → PHOTO SEARCH → PHOTO SCAN → (no indicator)
3. Press ‹‹ or ›› to select the photo for playback. Each time you press ‹‹ or ››, the camcorder searches for the previous or next photo. Your camcorder automatically starts playback from the photo.

To stop searching
Press ■.
Scanning photo

(1) Set the POWER switch to VCR.
(2) Press SEARCH MODE on the Remote Commander repeatedly, until the photo scan indicator appears on the screen.
   The indicator changes as follows:
   DATE SEARCH → PHOTO SEARCH → PHOTO SCAN → (no indicator)

(3) Press ◀ or ▶.
   Each photo is played back for about 5 seconds automatically.

To stop scanning
Press ■.

Note
The photo search and photo scan work only for tapes recorded in the Digital8 system.

If a tape has a blank portion in the recorded portions
The photo search and photo scan functions may not work correctly.
— Editing —

**Dubbing a tape**

Using the A/V connecting cable
You can dub or edit on the VCR connected to your camcorder using your camcorder as a player.
Connect your camcorder to the VCR using the A/V connecting cable supplied with your camcorder.

**Before operation**
• Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)
• Press the following buttons to make the indicators disappear so that they will not be superimposed on the edited tape:
  – DISPLAY on your camcorder
  – DATA CODE on the Remote Commander
  – SEARCH MODE on the Remote Commander

1. Insert a blank tape (or a tape you want to record over) into the VCR, and insert the recorded tape into your camcorder.
2. Set the input selector on the VCR to LINE. Refer to the operating instructions of your VCR for more information.
3. Set the POWER switch to VCR.
4. Play back the recorded tape on your camcorder.
5. Start recording on the VCR.
   Refer to the operating instructions of your VCR for more information.

When you have finished dubbing a tape
Press ■ on both your camcorder and the VCR.

---

You can edit on VCRs that support the following systems:
- 8 mm, Hi8, Hi8, VHS, S-VHS, VHS, S-VHS, VHS, S-VHS, S-VHS, Betamax, ED Betamax, ED Betamax, mini DV, DV, DV or Digital8
Dubbing a tape

If your VCR is a monaural type
Connect the yellow plug of the A/V connecting cable to the video input jack and the white or the red plug to the audio input jack on the VCR or the TV. When the white plug is connected, the left channel audio is output, and the red plug is connected, the right channel audio is output.

If your VCR has an S video jack
Connect using an S video cable (optional) to obtain high-quality pictures. With this connection, you do not need to connect the yellow (video) plug of the A/V connecting cable. Connect an S video cable (optional) to the S video jacks of both your camcorder and the VCR.

Using the i.LINK cable (DV connecting cable)
Simply connect the i.LINK cable (DV connecting cable) (optional) to DV IN/OUT and to DV IN/OUT of the DV products. With digital-to-digital connection, video and audio signals are transmitted in digital form for high-quality editing. You cannot dub the screen indicators.

(1) Insert a blank tape (or a tape you want to record over) into the VCR, and insert the recorded tape into your camcorder.
(2) Set the input selector on the VCR to DV IN if it is available. Refer to the operating instructions of your VCR for more information.
(3) Set the POWER switch to VCR.
(4) Play back the recorded tape on your camcorder.
(5) Start recording on the VCR.
   Refer to the operating instructions of your VCR for more information.

When you have finished dubbing a tape
Press ■ on both your camcorder and the VCR.
Note on tapes that are not recorded in the Digital8  system
The picture may fluctuate. This is not a malfunction.

During playback of tapes recorded in the Hi8/standard 8 system
Digital signals are output as the image signals from the DV IN/OUT jack.

You can connect one VCR only using the i.LINK cable (DV connecting cable).
See page 149 for more information about i.LINK.

The following functions do not work during digital editing:
– Picture effect
– Digital effect
– PB ZOOM

If you record playback pause picture via the DV IN/OUT jack
The recorded picture becomes rough. Also, when you play back the recorded pictures on other video equipment, the picture may jitter.
You can duplicate selected scenes (programs) for editing onto a tape without operating the VCR. Scenes can be selected by frame. You can set up to 20 programs.

Before operating the Digital program editing function

**Step 1** Connecting the VCR (p. 62).

**Step 2** Setting the VCR for operation (p. 63, 67).

**Step 3** Adjusting the synchronicity of the VCR (p. 68).

When you dub using the same VCR again, you can skip steps 2 and 3.

Using the Digital program editing function

**Operation 1** Making the program (p. 70).

**Operation 2** Performing Digital program editing (dubbing a tape) (p. 72).

**Notes**

- The Digital program editing works only for tapes recorded in the Digital8 system.
- You cannot dub titles or display indicators.
- When you connect with an i.LINK cable (DV connecting cable), you may not be able to operate the dubbing function correctly, depending on the VCR.
  Set CONTROL to IR in the menu settings of your camcorder.
- When editing digital video, the operation signals cannot be sent with LANC.

**Step 1: Connecting the VCR**

You can connect both an A/V connecting cable and an i.LINK cable (DV connecting cable).

When you use the A/V connecting cable, connect the devices as illustrated in page 59.
When you use an i.LINK cable (DV connecting cable), connect the devices as illustrated in page 60.

**If you connect using an i.LINK cable (DV connecting cable)**

With a digital-to-digital connection, video and audio signals are transmitted in digital format for high-quality editing.
Step 2: Setting the VCR to operate with the A/V connecting cable

To edit using the VCR, send the control signal by infrared ray to the remote sensor on the VCR.

When you connect using an A/V connecting cable, follow the procedure below, (1) to (4), to send the control signal correctly.

(1) Set the IR SETUP code
   1. Set the POWER switch to VCR on your camcorder.
   2. Turn the power of the connected VCR on, then set the input selector to LINE.
      When you connect a video camera recorder, set its power switch to VCR/VTR.
   3. Press MENU to display the menu.
   4. Turn the SEL/PUSH EXEC dial to select EDIT, then press the dial.
   5. Turn the SEL/PUSH EXEC dial to select EDIT SET, then press the dial.
   6. Turn the SEL/PUSH EXEC dial to select CONTROL, then press the dial.
   7. Turn the SEL/PUSH EXEC dial to select IR, then press the dial.
   8. Turn the SEL/PUSH EXEC dial to select IR SETUP, then press the dial.
   9. Turn the SEL/PUSH EXEC dial to select the IR SETUP code number of your VCR, then press the dial.

   Check the code in “About the IR SETUP code.” (p. 64)

(Continued on the following page)
## Dubbing only desired scenes – Digital program editing

### About the IR SETUP code

The IR SETUP code is stored in the memory of your camcorder. Be sure to set the correct code depending on your VCR. Default setting is code number 3.

* TV/VCR component

### Note on IR SETUP code

Digital program editing is not possible if the VCR does not support IR SETUP codes.
(2) Setting the modes to cancel recording pause on the VCR

1. Turn the SEL/PUSH EXEC dial to select PAUSEMODE, then press the dial.
2. Turn the SEL/PUSH EXEC dial to select the mode to cancel recording pause on the VCR, then press the dial.

Buttons for canceling recording pause on the VCR
The buttons vary depending on your VCR. To cancel recording pause:
- Select PAUSE if the button to cancel recording pause is I.
- Select REC if the button to cancel recording pause is ●.
- Select PB if the button to cancel recording pause is ►.

(3) Setting your camcorder and the VCR to face each other
Locate the infrared rays emitter of your camcorder and face it towards the remote sensor of the VCR.
Set the devices about 30 cm (11 7/8 in.) apart, and remove any obstacles between the devices.
(4) Confirming VCR operation

1. Insert a recordable tape into the VCR, then set to recording pause.
2. Turn the SEL/PUSH EXEC dial to select IR TEST, then press the dial.
3. Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.

   If the VCR starts recording, the setting is correct.  
   When finished, the indicator on the screen changes to COMPLETE.

When the VCR does not operate correctly

• After checking the code in “About the IR SETUP code”, set the IR SETUP or the PAUSEMODE again.
• Place your camcorder at least 30 cm (11 7/8 in.) away from the VCR.
• Refer to the operating instructions of your VCR.
Dubbing only desired scenes – Digital program editing

Step 2: Setting the VCR to operate with the i.LINK cable
(DV connecting cable)

When you connect using an i.LINK cable (DV connecting cable) (optional), follow the procedure below.

(1) Set the POWER switch to VCR on your camcorder.
(2) Turn the power of the connected VCR on, then set the input selector to DV input.
   When you connect a digital video camera recorder, set its power switch to VCR/VTR.
(3) Press MENU to display the menu.
(4) Turn the SEL/PUSH EXEC dial to select EDIT, then press the dial.
(5) Turn the SEL/PUSH EXEC dial to select EDIT SET, then press the dial.
(6) Turn the SEL/PUSH EXEC dial to select CONTROL, then press the dial.
(7) Turn the SEL/PUSH EXEC dial to select i.LINK, then press the dial.

(Continued on the following page)
Step 3: Adjusting the synchronicity of the VCR

You can adjust the synchronicity of your camcorder and the VCR. Have a pen and paper ready for notes. Before operation, eject the cassette from your camcorder.

1. Set the POWER switch to VCR on your camcorder.
2. Insert a blank tape (or a tape you want to record over) into the VCR, then set to recording pause.
   When you select i.LINK in CONTROL, you do not need to set to recording pause.
3. Turn the SEL/PUSH EXEC dial to select ADJ TEST, then press the dial.
4. Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.
   IN and OUT are recorded on an image for 5 times each to calculate the numerical values for adjusting the synchronicity.
   The EXECUTING indicator flashes on the screen. When finished, the indicator changes to COMPLETE.
5. Rewind the tape in the VCR, then start slow playback.
   Take a note of the opening numerical value for each IN and the closing numerical value for each OUT.
6. Calculate the average of all the opening numerical values for each IN, and the average of all the closing numerical values for each OUT.
7. Turn the SEL/PUSH EXEC dial to select “CUT-IN”, then press the dial.
8. Turn the SEL/PUSH EXEC dial to select the average numerical value of IN, then press the dial.
   The calculated start position for recording is set.
9. Turn the SEL/PUSH EXEC dial to select “CUT-OUT”, then press the dial.
10. Turn the SEL/PUSH EXEC dial to select the average numerical value of OUT, then press the dial.
    The calculated stop position for recording is set.
11. Turn the SEL/PUSH EXEC dial to select RETURN, then press the dial.
Notes

- When you complete step 3, the image to adjust the synchronicity is recorded for about 50 seconds.
- If you start recording from the very beginning of the tape, the first few seconds of the tape may not record properly. Be sure to allow about 10 seconds’ of lead before starting the recording.
- When you connect using an i.LINK cable (DV connecting cable) you may not be able to operate the dubbing function correctly, depending on the VCR. Keep the i.LINK connection, and set CONTROL to IR in the menu settings. (p. 78)

Video and audio signals are transmitted in digital format.

(Continued on the following page)
Dubbing only desired scenes - Digital program editing

Operation 1: Making the program

(1) Insert the tape for playback into your camcorder, and insert a tape for recording into the VCR.
(2) Press MENU to display the menu.
(3) Turn the SEL/PUSH EXEC dial to select \text{VIDEO EDIT}, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select VIDEO EDIT, then press the dial.
(5) Search for the beginning of the first scene you want to insert using the video operation buttons, then pause playback.
(6) Press the SEL/PUSH EXEC dial.
   The IN point of the first program is set, and the top part of the program mark changes to light blue.
(7) Search for the end of the first scene you want to insert using the video operation buttons, then pause playback.
(8) Press the SEL/PUSH EXEC dial.
   The OUT point of the first program is set, then the bottom part of the program mark changes to light blue.
(9) Set the program by repeating steps 5 to 8.
   When the program is set, the program mark changes to light blue.
   You can set a maximum of 20 programs.
Erasing the program you have set
Erase OUT first and then IN from the last set program.

(1) Turn the SEL/PUSH EXEC dial to select UNDO, then press the dial.
(2) Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.
The last set program mark flashes, then the setting is canceled.

To cancel erasing
Select RETURN in step 2.

Erasing all programs
(1) Select VIDEO EDIT in the menu settings. Turn the SEL/PUSH EXEC dial to select ERASE ALL, then press the dial.
(2) Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.
All the program marks flash, then the settings are canceled.

To cancel erasing all programs
Select RETURN in step 2.

To cancel a program you have set
Press MENU. The program is stored in memory until the tape is ejected.

Notes
• The Digital program editing does not work when PB MODE is set to [mode] in the menu settings.
• You cannot operate recording during Digital program editing.

You cannot set IN or OUT to the following portions of the tape:
– a blank portion of the tape
– a portion recorded in a system other than Digital8

The total time code may not be displayed correctly in the following cases:
– there is a blank portion between IN and OUT on the tape
– the tape is not recorded in the Digital8 system.

(Continued on the following page)
Operation 2: Performing Digital program editing (Dubbing a tape)

Make sure that your camcorder and VCR are connected, and that the VCR is set to recording pause. This procedure is not necessary when you use an i.LINK cable (DV connecting cable). When you use a digital video camera recorder, set its power switch to VCR/VTR.

(1) Select VIDEO EDIT. Turn the SEL/PUSH EXEC dial to select START, then press the dial.
(2) Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.
   Search for the beginning of the first program, then start dubbing.
   The program mark flashes.
   The SEARCH indicator appears during a search, and the EDIT indicator appears during editing on the screen.
   The program mark changes to light blue after dubbing is complete.
   When dubbing ends, your camcorder and the VCR automatically stop.

To stop dubbing during editing
Press ■ on your camcorder.

To quit the Digital program editing function
Your camcorder stops when dubbing is complete. Then the display returns to VIDEO EDIT in the menu settings.
Press MENU to quit the Digital program editing function.

You cannot record on the VCR when:
– The tape has run out.
– The write-protect tab on the cassette is set to lock.
– The IR SETUP code is not correct. (when IR is selected)
– The button to cancel recording pause is not correct. (when IR is selected)

NOT READY appears on the screen when:
– The program to operate Digital program editing has not yet been made.
– i.LINK is selected but an i.LINK cable (DV connecting cable) is not connected.
– The power of the connected VCR is not turned on. (when you set i.LINK)
Using with analog video unit and your computer – Signal convert function

You can capture images and sound from an analog video unit connected to your computer which has the i.LINK (DV) jack to your camcorder.

**Before operation**
Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)

1. Set the POWER switch to VCR.
2. Set A/V → DV OUT in [ ] to ON in the menu settings. (p. 78)
3. Start playback on the analog video unit.
4. Start capturing procedures on your computer.
   The operation procedures depend on your computer and the software which you use.
   For details on how to capture images, refer to the instruction manual of your computer and software.

**Notes**
- You need to install software which can exchange video signals.
- Depending on the condition of the analog video signals, the computer may not be able to output the images correctly when you convert analog video signals into digital video signals via your camcorder. Depending on the analog video unit, the image may contain noise or incorrect colors.
- You cannot record or capture the video output via your camcorder when the video includes copyright protection signals such as ID-2 system.

**After capturing images and sound**
Stop capturing procedures on your computer, and stop the playback on the analog video unit.
Recording video or TV programs

Using the A/V connecting cable
You can record a tape from another VCR or a TV program from a TV that has video/audio outputs. Use your camcorder as a recorder.

Before operation
Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)

(1) Insert a blank tape (or a tape you want to record over) into your camcorder. If you are recording a tape from the VCR, insert a recorded tape into the VCR.

(2) Set the POWER switch to VCR.

(3) Press ● REC and the button on its right simultaneously on your camcorder, then immediately press □ on your camcorder.

(4) Press ► on the VCR to start playback if you are recording a tape from VCR. Select a TV program if you are recording from TV. The picture from a TV or VCR appears on the screen of your camcorder.

(5) Press □ on your camcorder at the scene where you want to start recording from.

When you have finished dubbing a tape
Press ■ on both your camcorder and the VCR.

Notes
• To enable smooth transition, we recommend that you do not mix pictures recorded in the Hi8/standard 8 with the Digital8 system on a tape.
• If you fast-forward or slow-playback on the other equipment, the image being recorded may fluctuate. When recording from other equipment, be sure to play back the original tape at normal speed.

If your VCR is a monaural type
Connect the yellow plug of the A/V connecting cable to the video output jack and the white or the red plug to the audio output jack on the VCR or the TV. When the white plug is connected, the left channel audio is output, and the red plug is connected, the right channel audio is output.

If your TV or VCR has an S video jack
Connect using an S video cable (optional) to obtain high-quality pictures. With this connection, you do not need to connect the yellow (video) plug of the A/V connecting cable.
Connect an S video cable (optional) to the S video jacks of both your camcorder and the TV or VCR.
Recording video or TV programs

Using the i.LINK cable (DV connecting cable)
Simply connect the i.LINK cable (DV connecting cable) (optional) to DV IN/OUT and to DV IN/OUT of the DV products. With digital-to-digital connection, video and audio signals are transmitted in digital form for high-quality editing.

Before operation
Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)

(1) Insert a blank tape (or a tape you want to record over) into your camcorder, and insert the recorded tape into the VCR.
(2) Set the POWER switch to VCR.
(3) Press ● REC and the button on its right simultaneously on your camcorder, then immediately press ● on your camcorder.
(4) Press ▶ on the VCR to start playback.
   The picture from a TV or VCR appears on the screen of your camcorder.
(5) Press ● on your camcorder at the scene where you want to start recording from.

When you have finished dubbing a tape
Press ● on both your camcorder and the VCR.

You can connect one VCR only using the i.LINK cable (DV connecting cable).

During digital editing
The color of the display may be uneven. However this does not affect the dubbed picture.

If you record playback pause picture with the DV IN/OUT jack
The recorded picture becomes rough. And when you play back the picture using your camcorder, the picture may jitter.

Before recording
Make sure if the DV IN indicator appears on the screen of your camcorder by pressing DISPLAY. The DV IN indicator may appear on both equipment.
Inserting a scene from a VCR
- Insert Editing

You can insert a new scene from a VCR onto your originally recorded tape by specifying the insert start and end points. Use the Remote Commander for this operation. Connections are the same as in “Recording video or TV programs” on page 74, 75. Insert a cassette containing the desired scene to insert into the VCR.

[A]: A tape that contains the scene to be superimposed
[B]: A tape before editing
[C]: A tape after editing
Inserting a scene from a VCR – Insert Editing

(1) Set the POWER switch to VCR.
(2) On the VCR, locate just before the insert start point [a], then press to set the VCR to the playback pause mode.
(3) On your camcorder, locate the insert end point [c] by pressing or . Then press to set it to the playback pause mode.
(4) Press ZERO SET MEMORY on the Remote Commander. The ZERO SET MEMORY indicator flashes and the end point of the insert is stored in memory.
(5) On your camcorder, locate the insert start point [b] by pressing , then press REC and the button on its right simultaneously to set your camcorder to the recording pause mode.
(6) First press on the VCR, and after a few seconds press on your camcorder to start inserting the new scene.

Inserting automatically stops near the zero point on the counter. Your camcorder automatically stops. The end point [c] of the insert stored in memory is canceled.

To change the insert end point
Press ZERO SET MEMORY again after step 5 to erase the ZERO SET MEMORY indicator and begin from step 3.

Notes
• The zero set memory function works only for tapes recorded in the Digital8 system.
• The picture and sound recorded on the section between the insert start and end points will be erased when you insert the new scene.

When the inserted picture is played back
The picture may be distorted at the end of the inserted section. This is not a malfunction.

To insert a scene without setting the insert end point
Skip step 3 and 4. Press when you want to stop inserting.
— Customizing Your Camcorder —

Changing the menu settings

To change the mode settings in the menu settings, select the menu items with the SEL/PUSH EXEC dial. The default settings can be partially changed. First, select the icon, then the menu item and then the mode.

1. In CAMERA, VCR or MEMORY mode, press MENU.
2. Turn the SEL/PUSH EXEC dial to select the desired icon, then press the dial to set.
3. Turn the SEL/PUSH EXEC dial to select the desired item, then press the dial to set.
4. Turn the SEL/PUSH EXEC dial to select the desired mode, and press the dial to set.
5. If you want to change other items, select RETURN and press the dial, then repeat steps from 2 to 4.

For details, see “Selecting the mode setting of each item” (p. 79).
To make the menu display disappear
Press MENU.

Menu items are displayed as the following icons:
- MANUAL SET
- CAMERA SET
- VCR SET
- LCD/VF SET
- MEMORY SET
- PRINT SET
- TAPE SET
- SETUP MENU
- OTHERS

Selecting the mode setting of each item ● is the default setting.

Menu items differ according to the position of the POWER switch. The screen shows only the items you can operate at the moment.

</table>
| ● AUTO | To display the remaining tape bar:  
• for about 8 seconds after your camcorder is turned on and calculates the remaining amount of tape  
• for about 8 seconds after a cassette is inserted and your camcorder calculates the remaining amount of tape  
• for about 8 seconds after ▶ is pressed in VCR mode  
• for about 8 seconds after DISPLAY is pressed to display the screen indicators  
• for the period of tape rewinding, forwarding or picture search in the VCR mode | CAMERA VCR
ON | To always display the remaining tape bar |

### Note on REC MODE

When you record on the standard 8|8 tape, your camcorder records in the SP mode even you select the LP mode in the menu settings. In this case, the indicator “8mm TAPE → SP REC, Hi8 TAPE → LP/SP REC” appears on the screen. Use the Hi8|Hi8 tapes for the LP mode.

### Notes on the LP mode

- When you record a tape in the LP mode on your camcorder, we recommend playing the tape on your camcorder. When you play back the tape on other camcorders or VCRs, noise may occur in images or sound.
- When you record in the SP and LP modes on one tape or you record some scenes in the LP mode, the playback image may be distorted or the time code may not be written properly between scenes.

### Note on AUDIO MODE

When playing back a tape recorded in the 16-bit mode, you cannot adjust the balance in AUDIO MIX.

### To dub a tape to another VCR

You cannot select AUDIO MODE for tapes recorded in the Digital8|Digital8 system. You, however, can select AUDIO MODE when you dub tapes recorded in the Hi8/standard 8 system to another VCR using the i.LINK cable.

### Note
If you press DISPLAY with DISPLAY set to V-OUT/LCD in the menu settings, the picture from a TV or VCR will not appear on the screen even when your camcorder is connected to outputs on the TV or VCR. (Except when your camcorder is connected with the i. LINK cable)

### In more than 5 minutes after removing the power source
The AUDIO MIX, FLASH LVL, COMMANDER and HiFi SOUND items are returned to their default settings. The other menu items are held in memory even when the battery is removed.

### Notes on INDICATOR
- When you select BL ON, battery life is reduced by about 3 percent during recording.
- When you use power sources other than the battery pack, BL ON is automatically selected.
You can record and play back images on the “Memory Stick” supplied with your camcorder. You can easily play back, record or delete still images. You can exchange image data with other equipment such as your computer etc., using the USB cable for “Memory Stick” supplied with your camcorder.

On file format

Still image (JPEG)
Your camcorder compresses image data in JPEG format (extension .jpg).

Moving picture (MPEG)
Your camcorder compresses picture data in MPEG format (extension .mpg).

Typical image data file name
Still image
100-0001: This file name appears on the screen of your camcorder.
Dsc00001.jpg: This file name appears on the display of your computer.

Moving picture
MOV00001: This file name appears on the screen of your camcorder.
Mov00001.mpg: This file name appears on the display of your computer.

Before using “Memory Stick”

• You cannot record or erase images when the write-protect tab on the “Memory Stick” is set to LOCK.
• Depending on the model, the position and shape of the switch may be different.
• We recommend backing up important data.
• Image data may be damaged in the following cases:
  – If you remove the “Memory Stick” or turn the power off while reading or writing.
  – If you use “Memory Stick”s near static electricity or magnetic fields.
• Prevent metallic objects or your finger from coming into contact with the metal parts of the connecting section.
• Stick its label on the labeling position.
• Do not bend, drop or apply strong shock to “Memory Stick”s.
• Do not disassemble or modify “Memory Stick”s.
• Do not let “Memory Stick”s get wet.
• Do not use or keep “Memory Stick”s in locations that are:
  – Extremely hot such as in a car parked in the sun or under the scorching sun
  – Under direct sunlight
  – Very humid or subject to corrosive gases
• When you carry or store a “Memory Stick”, put it in its case.
“Memory Stick”s formatted by a computer
“Memory Stick”s formatted by Windows OS or Macintosh computers do not have a guaranteed compatibility with this camcorder.

Notes on image data compatibility
• Image data files recorded on “Memory Stick”s by your camcorder conform with the Design Rules for Camera File Systems universal standard established by the JEITA (Japan Electronics and Information Technology Industries Association). You cannot play back on your camcorder still images recorded on other equipment (DCR-TRV890E/TRV900/TRV900E or DSC-D700/D770) that does not conform with this universal standard. (These models are not sold in some areas.)
• If you cannot use the “Memory Stick” that has been used on other equipment, format the “Memory Stick” on your camcorder following the steps on page 84. Note that all images on the “Memory Stick” will be deleted if you format it.

“Memory Stick” and are trademarks of Sony Corporation.

• Windows and ActiveMovie, DirectShow are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
• Macintosh and Mac OS, QuickTime are trademarks of Apple Computer, Inc.
• All other product names mentioned herein may be the trademarks or registered trademarks of their respective companies.
Furthermore, “™” and “®” are not mentioned in each case in this manual.
Using “Memory Stick”–introduction

Inserting “Memory Stick”

Insert a “Memory Stick” in the “Memory Stick” slot as far as it can go with the ▲ mark facing toward the “Memory Stick” slot as illustrated below.

To eject the “Memory Stick”

Press the “Memory Stick” eject button. The “Memory Stick” pops up.

When the access lamp is lit or flashing
Do not shake or strike your camcorder because your camcorder is reading the data from the “Memory Stick” or recording the data on the “Memory Stick.” Do not turn the power off, eject the “Memory Stick” or remove the battery pack. Otherwise, the image data breakdown may occur.

If “Memory Stick ERROR” is displayed
The “Memory Stick” may be corrupted. If this occurs, use another “Memory Stick.”
Selecting image quality mode

You can select image quality mode in still image recording. The default setting is SUPER FINE.

(1) Set the POWER switch to VCR or MEMORY. Make sure that the LOCK is set to the left (unlock) position.
(2) Press MENU to make the menu display appear.
(3) Turn the SEL/PUSH EXEC dial to select , then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select STILL SET, then press the dial.
(5) Turn the SEL/PUSH EXEC dial to select QUALITY, then press the dial.
(6) Turn the SEL/PUSH EXEC dial to select the desired image quality, then press the dial.

Note
In some cases, changing the image quality mode may not affect the image quality, depending on the types of images you are shooting.
Using “Memory Stick”—introduction

Image quality settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUPER FINE (SFN)</td>
<td>This is the highest image quality in your camcorder. The number of still images you can record is less than in FINE mode. The image is compressed to about 1/3.</td>
</tr>
<tr>
<td>FINE (FINE)</td>
<td>Use this mode when you want to record high quality images. The image is compressed to about 1/6.</td>
</tr>
<tr>
<td>STANDARD (STD)</td>
<td>This is the standard image quality. The image is compressed to about 1/10.</td>
</tr>
</tbody>
</table>

Differences in image quality mode

Recorded images are compressed in JPEG format before being stored into memory. The memory capacity allotted to each image varies depending on the selected image quality mode and image size. Details are shown in the table below. (You can select 1152 × 864 or 640 × 480 image size in the menu settings.)

1152 × 864 image size

<table>
<thead>
<tr>
<th>Image quality mode</th>
<th>Memory capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUPER FINE</td>
<td>About 600 KB</td>
</tr>
<tr>
<td>FINE</td>
<td>About 300 KB</td>
</tr>
<tr>
<td>STANDARD</td>
<td>About 200 KB</td>

<tbody>
<tr>
<td>SUPER FINE</td>
<td>About 190 KB</td>
</tr>
<tr>
<td>FINE</td>
<td>About 100 KB</td>
</tr>
<tr>
<td>STANDARD</td>
<td>About 60 KB</td>
</tr>
</tbody>
</table>

Note on the image quality mode indicator

This is only displayed during recording.
Selecting the image size

You can select either one of two image sizes
Still images: 1152 × 864 or 640 × 480.
   The default setting is 1152 × 864.
Moving pictures: 320 × 240 or 160 × 112
   The default setting is 320 × 240.

(1) Set the POWER switch to MEMORY. Make sure that the LOCK switch is set to
   the left (unlock) position.
(2) Press MENU to display the menu.
(3) Turn the SEL/PUSH EXEC dial to select [ ], then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select STILL SET (still image) or MOVIE
   SET (moving picture), then press the dial.
(5) Turn the SEL/PUSH EXEC dial to select IMAGESIZE, then press the dial.
(6) Turn the SEL/PUSH EXEC dial to select the desired image size, then press the
dial.

   The indicator changes as follows:

   Still images: \[ 1152 \leftrightarrow 640 \]
   Moving pictures: \[ 320 \leftrightarrow 160 \]

You can record still images on “Memory Stick”s.

Before operation
Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left (unlock) position.

(2) Keep pressing PHOTO lightly. The green mark stops flashing, then lights up. The brightness of the image and focus are adjusted, being targeted for the middle of the image and are fixed. Recording does not start yet.

(3) Press PHOTO deeper. The image displayed on the screen will be recorded on the “Memory Stick.” Recording is complete when the bar scroll indicator disappears.

Number of images can be recorded on the “Memory Stick”

Number of recorded images
Recording still images on “Memory Stick”
- Memory Photo recording

Note
When recording still images at step 2 with PHOTO pressed lightly, the image momentarily flickers. This is not a malfunction.

When the POWER switch is set to MEMORY
The following functions do not work:
– Wide TV
– Digital zoom
– SteadyShot function
– SUPER NIGHTSHOT
– Fader
– Picture effect
– Digital effect
– Title
– Low lux mode (The indicator flashes.)
– Sports lesson mode (The indicator flashes.)

When you are recording a still image
You can neither turn off the power nor press PHOTO.

When you press PHOTO on the Remote Commander
Your camcorder immediately records the image that is on the screen when you press the button.

When recording in MEMORY mode
The angle of view is a little increased than one in CAMERA mode.

Recording images continuously
You can record still images continuously. Select one of the two modes described below before recording.

Continuous mode [a]
When the image size is set to 1152 × 864, you can record up to 4 images continuously.
When the image size is set to 640 × 480, you can record up to 16 images continuously.
The number of recorded photos in continuous mode depends on the capacity of the “Memory Stick.”

Multi screen mode (Recording image size is 640 × 480) [b]
You can record 9 still images continuously on a single page.
Recording still images on “Memory Stick”

- Memory Photo recording

While pressing down PHOTO, your camcorder continuously record maximum number of still images depending on the image size. When you stop pressing, the recording stops.

(1) Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left (unlock) position.
(2) Press MENU to make the menu display appear.
(3) Turn the SEL/PUSH EXEC dial to select [ ], then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select STILL SET, then press the dial.
(5) Turn the SEL/PUSH EXEC dial to select PIC MODE, then press the dial.
(6) Turn the SEL/PUSH EXEC dial to select the desired setting, then press the dial.
(7) Press MENU to erase the menu display.
(8) Press PHOTO deeper.

If the capacity of the “Memory Stick” becomes full “FULL” appears on the screen and you cannot record still images on the “Memory Stick.”
Continuous shooting settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Meaning (indicator on the screen)</th>
</tr>
</thead>
<tbody>
<tr>
<td>SINGLE</td>
<td>Your camcorder shoots one image at a time. (no indicator)</td>
</tr>
<tr>
<td>CONTINUOUS</td>
<td>Your camcorder shoots up to 16 still images at about 0.5 sec intervals. ([C])</td>
</tr>
<tr>
<td>MULTI SCRN</td>
<td>Your camcorder shoots 9 still images at about 0.5 sec intervals and displays the images on a single page divided into 9 boxes. Still images are recorded in 640 × 480 size. (D)</td>
</tr>
</tbody>
</table>

The number of images in continuous shooting

The number of images you can shoot continuously varies depending on the image size and the capacity of the “Memory Stick.”

When shooting with the self-timer function or the Remote Commander

The camcorder automatically records up to the maximum recordable number of still images.
Self-timer memory photo recording

You can record still images on “Memory Stick”s with the self-timer. You can use the Remote Commander for this operation.

1. Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left (unlock) position.
2. Press MENU to display the menu settings in the standby mode.
3. Turn the SEL/PUSH EXEC dial to select [3], then press the dial.
4. Turn the SEL/PUSH EXEC dial to select SELFTIMER, then press the dial.
5. Turn the SEL/PUSH EXEC dial to select ON, then press the dial.
6. Press MENU to make the menu settings disappear.
7. Press PHOTO deeper. Self-timer starts counting down from 10 with a beep sound. In the last two seconds of the countdown, the beep sound gets faster, then recording starts automatically.

To record moving pictures on “Memory Stick”s with the self-timer
Press START/STOP in step 7. To cancel the recording, press START/STOP again.

To cancel self-timer recording
Set SELFTIMER to OFF in the menu settings while your camcorder is in the standby mode. You cannot cancel self-timer recording with Remote Commander.

Note
The self-timer recording mode is automatically cancelled when:
– Self-timer recording is finished.
– The POWER switch is set to OFF (CHG) or VCR.

To check the image to be recorded
You can check the image with pressing PHOTO lightly, then press it deeper to start the self-timer recording.
Recording an image from a tape as a still image

Your camcorder can read moving image data recorded on a tape and record it as a still image on a “Memory Stick.”
Your camcorder can also take in moving image data through the input connector and record it as a still image on a “Memory Stick.”

Before operation
Insert a recorded tape and a “Memory Stick” into your camcorder.

(1) Set the POWER switch to VCR.
(2) Press ➪. The image recorded on the tape is played back.
(3) Keep pressing PHOTO lightly until the image from the tape freezes.
   “CAPTURE” appears on the screen. Recording does not start yet.
(4) Press PHOTO deeper. The image displayed on the screen will be recorded on the “Memory Stick.” Recording is complete when the bar scroll indicator disappears.

Image size of still images
Image size is automatically set to 640 × 480.

When the access lamp is lit or flashing
Do not shake or strike the unit. Also do not turn the power off, eject the “Memory Stick” or remove the battery pack. Otherwise, an image data breakdown may occur.

If ☒ appears on the screen
The inserted “Memory Stick” is incompatible with your camcorder because its format does not conform with your camcorder. Check the format of the “Memory Stick.”

If you press PHOTO lightly in the playback mode
Your camcorder stops momentarily.

Sound recorded on a tape
You cannot record the audio from a tape.

Titles superimposed on tapes
You cannot record the titles on the “Memory Stick.” However, you can record titles which have already been recorded on tapes.

When you press PHOTO on the Remote Commander
Your camcorder immediately records the image that is on the screen when you press the button.
Recording a still image from other equipment

Before operation
Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)

(1) Set the POWER switch to VCR.
(2) Play back the recorded tape, or turn the TV on to see the desired program.
   The image from TV or VCR appears on the screen of your camcorder.
(3) Follow the steps 3 and 4 on page 102.

Using the A/V connecting cable

Connect the yellow plug of the A/V connecting cable to the video jack on the VCR or the TV.

If your TV or VCR has an S video jack
Connect using an S video cable (optional) to obtain high-quality pictures. With this connection, you do not need to connect the yellow (video) plug of the A/V connecting cable.
Connect an S video cable (optional) to the S video jacks of both your camcorder and the TV or VCR.

Using the i.LINK cable (DV connecting cable)
You can record moving pictures with sound on “Memory Stick”s.

Before operation
Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to MEMORY. Make sure that the LOCK switch is set to the left (unlock) position.

(2) Press START/STOP. Your camcorder starts recording. The camera recording lamp located on the front of your camcorder lights up. When IMAGESIZE in the menu settings is set to $160 \times 112$, the maximum recording time is 60 seconds. However, when IMAGESIZE in the menu settings is set to $320 \times 240$, the maximum recording time is 15 seconds.

To stop recording
Press START/STOP.

Note
Sound is recorded in monaural.

When the POWER switch is set to MEMORY
The following functions do not work:
- Wide TV
- Digital zoom
- SteadyShot function
- SUPER NIGHTSHOT
- Fader
- Picture effect
- Digital effect
- Title
- Low lux mode (The indicator flashes.)
- Sports lesson mode (The indicator flashes.)
Recording moving pictures on “Memory Stick”s  
- MPEG movie recording

When recording in MEMORY mode
The angle of view is a little increased than one in CAMERA mode.

When using an external flash (optional)
Turn the power of the external flash off when recording moving pictures on “Memory Stick”s. Otherwise, the charging sound for the flash may be recorded.

During recording on “Memory Stick”
Do not eject the cassette tape from your camcorder. During ejecting the tape, sound is not recorded on the “Memory Stick.”
Recording moving pictures from a tape

Your camcorder can read moving picture data recorded on a tape and record it as a moving picture on a “Memory Stick.” Your camcorder can also take in moving picture data through the input connector and record it as a moving picture on a “Memory Stick.”

Before operation
- Insert a recorded tape into your camcorder.
- Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to VCR.
(2) Press ➤. The picture recorded on the tape is played back. And press ■ at the scene where you want to start recording from.
(3) Press START/STOP. When IMAGESIZE in the menu settings is set to 160 × 112, the maximum recording time is 60 seconds. However, when IMAGESIZE in the menu setting is set to 320 × 240, the maximum recording time is 15 seconds.

To stop recording
Press START/STOP.
Recording moving pictures from a tape

Notes
• Sound recorded in 48 kHz is converted to one in 32 kHz when recording images from a tape to “Memory Stick”s.
• Sound recorded in stereo is converted to monaural sound when recording from tapes.

When the access lamp is lit or flashing
Do not shake or strike the unit. As well do not turn the power off, eject a “Memory Stick” or remove the battery pack. Otherwise, the image data breakdown may occur.

Data code recorded on a tape
You cannot record the data code recorded on a tape.

If “\ Audio Error” is displayed
Sound that cannot be recorded by your camcorder has been recorded. Connect the A/V connecting cable to input images from an external unit used to play back the image.

The picture may be recorded on the “Memory Stick” incorrectly if:
– you turn the POWER switch during recording
– you press any video control buttons during recording
– between the scene recorded in the Digital8 system and in the Hi8/standard 8 system.
Recording moving pictures from a tape

Recording a moving picture from other equipment

**Before operation**
Set DISPLAY to LCD in the menu settings. (The default setting is LCD.)

1. Set the POWER switch to VCR.
2. Play back the recorded tape, or turn the TV on to see the desired program. The image of the other equipment is displayed on the screen.
3. Follow step 3 on page 106.

Using the A/V connecting cable

Connect the yellow plug of the A/V connecting cable to the video jack on the VCR or the TV.

---

**If your TV or VCR has an S video jack**
Connect using an S video cable (optional) to obtain high-quality pictures. With this connection, you do not need to connect the yellow (video) plug of the A/V connecting cable. Connect an S video cable (optional) to the S video jacks of both your camcorder and the TV or VCR.
Recording moving pictures from a tape

Using the i.LINK cable (DV connecting cable)

Note
The “usaha” may flash in the following instances. If this happens, eject and insert “Memory Stick” again, and record distortion-free images.
- When recording on a tape in a poor recording state, for example, on a tape that has been repeatedly used for dubbing
- When attempting to input images that are distorted due to poor radio wave reception when a TV tuner unit is in use
- Between scenes or in the various playback modes on the tape recorded in Hi8/standard 8 system

During recording on “Memory Stick”
Do not eject the cassette tape from your camcorder. During ejecting the tape, sound is not recorded on the “Memory Stick.”
Superimposing a still image in the “Memory Stick” on an image
- MEMORY MIX

You can superimpose a still image you have recorded on the “Memory Stick” on top of the moving image you are recording. You can record the superimposed images on a tape or a “Memory Stick.” (However, you can record only superimposed still images on the “Memory Stick”.)

**M. CHROM** (Memory chroma key)
You can swap a blue area of a still image such as an illustration or a frame with a moving image.

**M. LUMI** (Memory luminance key)
You can swap a brighter area of a still image such as a handwritten illustration or title with a moving image. Record a title on the “Memory Stick” before a trip or event for convenience.

**C. CHROM** (Camera chroma key)
You can superimpose a moving image on top of a still image such as an image can be used as background. Shoot the subject against a blue background. The blue area of the moving image will be swapped with a still image.

**M. OVERLAP** (Memory overlap)
You can make a moving image fade in on top of a still image recorded on the “Memory Stick” as the overlap function.

* The superimposed image using Memory overlap function can be recorded on tapes only.
Superimposing a still image in the “Memory Stick” on an image
- MEMORY MIX

Recording superimposed images on a tape

**Before operation**

- Insert a Hi8/Digital8 tape for recording into your camcorder.
- Insert a “Memory Stick” recorded still images into your camcorder.

1. Set the POWER switch to CAMERA.
2. Press MEMORY MIX in the standby mode.
   The last recorded or last composed image appears on the lower part of the screen as a thumbnail image.
3. Press MEMORY+/– to select the still image you want to superimpose.
   To see the previous image, press MEMORY –. To see the next image, press MEMORY+.
4. Turn the SEL/PUSH EXEC dial to select the desired mode.
   The mode changes as follows:
   M. CHROM ↔ M. LUMI ↔ C. CHROM ↔ M. OVERLAP
5. Press the SEL/PUSH EXEC dial.
   The still image is superimposed on the moving image.
6. Turn the SEL/PUSH EXEC dial to adjust the effect.
   M. CHROM – The color (blue) scheme of the area in the still image which is to be swapped with a moving image
   M. LUMI – The color (bright) scheme of the area in the still image which is to be swapped with a moving image
   C. CHROM – The color (blue) scheme of the area in the moving image which is to be swapped with a still image
   M. OVERLAP – No adjustment necessary
   The fewer bars there are on the screen, the stronger the effect.
7. Press START/STOP to start recording.
Superimposing a still image in the “Memory Stick” on an image

**MEMORY MIX**

To change the still image to superimpose
Do either of the following:
– Press MEMORY+/– before step 7.
– Press the SEL/PUSH EXEC dial before step 7, and repeat the procedure from step 4.

To change the mode setting
Press the SEL/PUSH EXEC dial before step 7, and repeat the procedure from step 4.

To cancel MEMORY MIX
Press MEMORY MIX.

**Notes**

- You cannot use MEMORY MIX function for moving pictures recorded on “Memory Stick”s.
- When the overlapping still image has a large amount of white, the thumbnail image of the picture may not be clear.

**The “Memory Stick” supplied with your camcorder stores 20 images**

– For M. CHROM: 18 images (such as a frame) 100-0001~100-0018
– For C. CHROM: 2 images (such as a background) 100-0019~100-0020

**Sample images**
Sample images stored in the “Memory Stick” supplied with your camcorder are protected (p. 132).

**When you select M. OVERLAP**
You cannot change the still image or the mode setting.

**During recording**
You cannot change the mode setting.

**To record the superimposed image as a still image**
Press PHOTO in step 7.

**Image data modified with your computers or shot with other equipment**
You may not be able to play them back with your camcorder.

---

**Recording superimposed images on a “Memory Stick” as a still image**

**Before operation**
Insert a “Memory Stick” is recorded still images into your camcorder.

1. Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left position.
2. Press MEMORY MIX in the standby mode.
   The last recorded or last composed image appears on the lower part of the screen as a thumbnail image.
3. Press MEMORY+/– to select the still image you want to superimpose.
   To see the previous image, press MEMORY –. To see the next image, press MEMORY+.
Superimposing a still image in the “Memory Stick” on an image - MEMORY MIX

(4) Turn the SEL/PUSH EXEC dial to select the desired mode.
   The mode changes as follows:
   M. CHROM ↔ M. LUMI ↔ C. CHROM

(5) Press the SEL/PUSH EXEC dial.
   The still image is superimposed on the moving image.

(6) Turn the SEL/PUSH EXEC dial to adjust the effect.

   M. CHROM – The color (blue) scheme of the area in the still image which is
   to be swapped with a moving image

   M. LUMI – The color (bright) scheme of the area in the still image which
   is to be swapped with a moving image

   C. CHROM – The color (blue) scheme of the area in the moving image
   which is to be swapped with a still image

   The fewer bars there are on the screen, the stronger the effect.

(7) Press PHOTO deeper. The image displayed on the screen will be recorded on
   the “Memory Stick.” Recording is complete when the bar scroll indicator
dissappears.
Superimposing a still image in the “Memory Stick” on an image - MEMORY MIX

To change the still image to superimpose
Do either of the following:
– Press MEMORY+/- before step 7.
– Press the SEL/PUSH EXEC dial before step 7, and repeat the procedure from step 4.

To change the mode setting
Press the SEL/PUSH EXEC dial before step 7, and repeat the procedure from step 4.

To cancel MEMORY MIX
Press MEMORY MIX.

Notes
• You cannot use MEMORY MIX function for moving pictures recorded on “Memory Stick”s.
• When the overlapping still image has a large amount of white, the thumbnail image of the picture may not be clear.

During recording
You cannot change the mode setting.

The “Memory Stick” supplied with your camcorder stores 20 images
– For M. CHROM: 18 images (such as a frame) 100-0001~100-0018
– For C. CHROM: 2 images (such as a background) 100-0019~100-0020

Sample images
Sample images stored in the “Memory Stick” supplied with your camcorder are protected (p. 132).

Image data modified with your computers or shot with other equipment
You may not be able to play them back with your camcorder.

While recording on a “Memory Stick” using MEMORY MIX function
You cannot use the following functions;
– PROGRAM AE
– exposure
Using the search function, you can automatically take in only still images from tapes recorded in the Digital8 system and record them on a “Memory Stick” in sequence.

**Before operation**
- Insert a tape recorded in the Digital8 system and rewind the tape.
- Insert a “Memory Stick” into your camcorder.

1. Set the POWER switch to VCR.
2. Press MENU to make the menu display appear.
3. Turn the SEL/PUSH EXEC dial to select , then press the dial.
4. Turn the SEL/PUSH EXEC dial to select PHOTO SAVE, then press the dial. PHOTO BUTTON appears on the screen.
5. Press PHOTO deeper. The still image from the tape is recorded on the “Memory Stick.” The number of still images copied is displayed. END is displayed when copying is completed.
To stop copying
Press MENU to stop copying.

When the memory of the “Memory Stick” is full
“MEMORY FULL” appears on the screen, and the copying stops. Insert another
“Memory Stick” and repeat the procedure from step 2.

Image size of still images
Image size is automatically set to 640 × 480.

When the access lamp is lit or flashing
Do not shake or strike your camcorder. As well do not turn the power off, eject the
“Memory Stick” or remove the battery pack. Otherwise, the image data breakdown
may occur.

If the write-protect tab on the “Memory Stick” is set to LOCK
“NOT READY” appears on the screen when you select PHOTO SAVE in the menu
settings.

When you change the “Memory Stick” in the middle of copying
Your camcorder resumes copying from the last image recorded on the previous
“Memory Stick.”
Viewing a still image  
- Memory Photo playback

You can play back still images recorded on a “Memory Stick”. You can also play back 6 images at a time by selecting the index screen.

**Before operation**
Insert a “Memory Stick” into your camcorder.

1. Set the POWER switch to MEMORY or VCR. Make sure that the LOCK is set to the left (unlock) position.
2. Open the LCD panel while pressing OPEN.
3. Press MEMORY PLAY. The last recorded image is displayed.
4. Press MEMORY +/- to select the desired still image. To see the previous image, press MEMORY –. To see the next image, press MEMORY +.

To stop memory photo playback
Press MEMORY PLAY.

**Note**
You may not be able to play back images correctly on your camcorder when:
- playing back image data modified with your computer
- playing back image data shot with other equipment

**Notes on the file name**
- The directory is not displayed if the structure of the directory does not conform to the DCF98 standard.
- “DIRECTORY ERROR” may appear on the screen if the structure of the directory does not conform to the DCF98 standard. While this message appears, you can play back images but cannot record them on the “Memory Stick.”
- The file name flashes on the screen if the file is corrupted or the file is unreadable.
To play back recorded images on a TV screen
• Connect your camcorder to the TV with the A/V connecting cable supplied with your camcorder before the operation.
• When operating memory photo playback on a TV or the LCD screen, the image quality may appear to have deteriorated. This is not a malfunction. The image data is as good as ever.
• Turn the audio volume of the TV down before operation, or noise (howling) may be output from the TV speakers.

Recording data
• When you press DATA CODE on the Remote Commander, you can see the recording data (date/time or various settings when recorded).
• Recording data are also recorded on “Memory Stick.”

If “NO FILE” appears on the screen
No image is recorded on the “Memory Stick.”

Screen indicators during still image playback

Playing back 6 recorded images at a time (index screen)
You can play back 6 recorded images at a time. This function is especially useful when searching for a particular image.

(1) Set the POWER switch to MEMORY or VCR. Make sure that the LOCK switch is set to the left (unlock) position.
(2) Press MEMORY INDEX to display the index screen.
Viewing a still image – Memory Photo playback

A red ▶ mark appears above the image that is displayed before changing to the index screen mode.

![Image index screen]

- To display the following 6 images, keep pressing MEMORY +.
- To display the previous 6 images, keep pressing MEMORY –.

To return to the normal playback screen (single screen)
Press MEMORY +/- to move the ▶ mark to the image you want to display on full screen, then press MEMORY PLAY.

Note
When displaying the index screen, the number appears above each image. This indicates the order in which images are recorded on the “Memory Stick.” These numbers are different from the data file names.

Image data modified with your computer or shot with other equipment
These files may not be displayed on the index screen.
Viewing a moving picture
- MPEG movie playback

You can play back moving pictures recorded on a “Memory Stick.” You can also play back 6 images including still images in order at a time by selecting the index screen.

**Before operation**
Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to MEMORY or VCR. Make sure that the LOCK switch is set to the left (unlock) position.
(2) Press MEMORY PLAY. The last recorded image is displayed.
(3) Press MEMORY +/- to select the desired moving pictures. To see the previous picture, press MEMORY –. To see the next picture, press MEMORY +.
(4) Press MPEG ► II to start playback.

To stop MPEG movie playback
Press MPEG ► II.

**Note**
You may not be able to play back images correctly on your camcorder when:
- playing back image data modified with your computer
- playing back image data shot with other equipment

**To play back recorded images on a TV screen**
• Connect your camcorder to the TV with the A/V connecting cable supplied with your camcorder before operation.
• Turn the audio volume of the TV down before operation, or noise (howling) may be output from the TV speakers.

**Recording data**
When you press DATA CODE on the Remote Commander, you can see the recording data.
The display changes as follows:
date/time → no indicator

**When no image is recorded on the “Memory Stick”**
The message “NO FILE” appears.
Screen indicators during moving picture playback

- Image size
- Picture number/Total number of recorded pictures
- Memory playback indicator
- Protect indicator
- Data directory number/File number
You can view data recorded on the “Memory Stick” using your computer.

**On file format**
Data recorded on the “Memory Stick” is stored in the following formats. Make sure that applications that support these file formats are installed on your computer.
- Still images: JPEG format
- Moving images/audio: MPEG format

**Recommended computer environment**

**Recommended Windows environment**
OS: Microsoft Windows 98, Windows 98SE, Windows Me or Windows 2000
   Professional standard installation is required.
   However, operation is not assured if the above environment is an upgraded OS.
CPU: MMX Pentium 200 MHz or faster
The USB connector must be provided as standard.
ActiveMovie Player (DirectShow) must be installed (to play back moving pictures).

**Recommended Macintosh environment**
Macintosh computer with the Mac OS 8.5.1/8.6/9.0 standard installation.
However, note that the update to Mac OS 9.0 should be used for the following models.
- iMac with the Mac OS 8.6 standard installation and a slot loading type CD-ROM drive
- iBook or Power Mac G4 with the Mac OS 8.6 standard installation
The USB connector must be provided as standard.
QuickTime 3.2 or newer must be installed (to play back moving pictures).

**Notes**
- Operations are not guaranteed for either the Windows or Macintosh environment if you connect 2 or more USB equipment to a single computer at the same time or when using a hub.
- Depending on the type of USB equipment that is used simultaneously, some equipment may not operate.
- Operations are not guaranteed for all the recommended computer environments mentioned above.
Installing the USB driver

Before connecting your camcorder to your computer, install the USB driver to the computer. The USB driver is contained together with application software for viewing images on a CD-ROM which is supplied with your camcorder.

For Windows 98/98SE/Me and Windows 2000 users
(1) Turn on your computer and allow Windows to load.
(2) Insert the supplied CD-ROM in the CD-ROM drive of your computer. The application software screen appears.
(3) Click “USB Driver Installation for Windows ® 98/98SE/Me and Windows ® 2000”. USB driver installation starts.
(4) Follow the on-screen messages to install the USB driver.
(5) Connect the Ψ (USB) jack on your camcorder with the USB connector on your computer using the supplied USB cable.
(6) Insert a “Memory Stick” into your camcorder, connect the AC power adaptor and set the POWER switch to MEMORY. “PC MODE” appears on the screen of your camcorder. Your computer recognizes the camcorder, and the Windows Add Hardware Wizard starts.
(7) Follow the on-screen messages to have the Add Hardware Wizard recognize the hardware. The Add Hardware Wizard starts twice because 2 different USB drivers are installed. Be sure to allow the installation to complete without interrupting it.

For Macintosh users
(1) Turn on your computer and allow the Mac OS to load.
(2) Insert the supplied CD-ROM in the CD-ROM drive of your computer.
(3) Double-click the CD-ROM drive icon to open the window.
(4) Double-click the icon of the hard disk containing the OS to open the window.
(5) Move the following 2 files from the window opened in step 3 to the System Folder icon in the window opened in step 4 (drag and drop).
   • Sony Camcorder USB Driver
   • Sony Camcorder USB Shim
(6) When “Put these items into the Extensions folder?” appears, click OK.
(7) Restart your computer.

Note
You cannot install the USB driver if a “Memory Stick” is not in your camcorder. Be sure to insert a “Memory Stick” into your camcorder before installing the USB driver.
Viewing images using your computer

Viewing images

For Windows 98 users

(1) Turn on the power of your computer and allow Windows 98 to load.

(2) Connect one end of the USB cable to the USB (USB) jack on the camcorder and the other end to the USB connector on your computer.

(3) Insert a “Memory Stick” into your camcorder, and connect the AC power adaptor to your camcorder and then to a wall outlet.

(4) Set the POWER switch to MEMORY. “PC MODE” appears on the screen of your camcorder.

(5) Open “My Computer” on Windows 98 and double click the newly recognized drive. (Example: “Removable Disk (D:)”)

The folders inside the “Memory Stick” are displayed.

(6) Select and double-click the desired image file from the folder. Double-click the folder or the file in the following order.

“Dcim” folder → “100msdcf” folder → Image file

For the detailed folder and file name, see “Image file storage destinations and image files” (p. 126).

<table>
<thead>
<tr>
<th>Desired file type</th>
<th>Double-click in this order</th>
</tr>
</thead>
<tbody>
<tr>
<td>Still image</td>
<td>“Dcim” folder → “100msdcf” folder → Image file</td>
</tr>
<tr>
<td>Moving picture*</td>
<td>“Mssony” folder → “Moml0001” folder → Image file*</td>
</tr>
</tbody>
</table>

* Copying a file to the hard disk of your computer before viewing it is recommended. If you play back the file directly from the “Memory Stick”, the image and sound may break off.
Unplug the USB cable/Eject the “Memory Stick”

To unplug the USB cable or eject the “Memory Stick”, follow the procedure below.

For Windows 2000 users
(1) Move the cursor to the “Unplug or Eject Hardware” icon on the TaskTray and click to cancel the applicable drive.
(2) A message to remove the device from the system appears, then unplug the USB cable or eject the “Memory Stick.”

For Macintosh users
(1) Quit application programs opened.
Make sure that the access lamp of the hard disk does not lit.
(2) Drag and drop the “Memory Stick” icon to the Trash or select Eject under the Special menu.
(3) Eject the “Memory Stick.”

Notes on using your computer

“Memory Stick”
• “Memory Stick” operations on your camcorder cannot be assured if the “Memory Stick” has been formatted on your computer.
• Do not optimize the “Memory Stick” on a Windows machine. This will shorten the “Memory Stick” life.
• Do not compress the data on the “Memory Stick.” Compressed files cannot be played back on your camcorder.

Software
• Depending on your application software, the file size may increase when you open a still image file.
• When you load an image modified using a retouch software from your computer to the camcorder or when you directly modify the image on the camcorder, the image format will differ so a file error indicator may appear and you may be unable to open the file.

Communications with your computer
Communications between your camcorder and your computer may not recover after recovering from Suspend, Resume, or Sleep.
Image file storage destinations and image files

Image files recorded with your camcorder are grouped in a folder. The meanings of the file names are as follows. □□□□ □□□□ stands for any number within the range from 0001 to 9999.

For Windows 98 users
(The drive recognizing the camera is [D:])

<table>
<thead>
<tr>
<th>Folder</th>
<th>File</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>100msdcf</td>
<td>DSC0□□□□□□.JPG</td>

<td>MOV0□□□□□□.MPG</td>
<td>Moving picture file</td>
</tr>
</tbody>
</table>
Copying the image recorded on “Memory Stick” to tapes

You can copy images or titles recorded on “Memory Stick”s and record them to Hi8/Digital8 tapes.

**Before operation**
Insert a Hi8/Digital8 tape for recording and a “Memory Stick” into your camcorder.

1. Set the POWER switch to VCR.
2. Using the video control buttons, search a point where you want to record the desired image. Set the Hi8/Digital8 tape to playback pause mode.
3. Press REC and the button on its right simultaneously on your camcorder. The Hi8/Digital8 tape is set to the recording pause mode.
4. Press MEMORY PLAY to play back the image you want to copy.
5. Press to start recording and press again to stop.
6. If you have more to copy, repeat steps 4 and 5.

To stop copying
Press .
During copying
You cannot operate the following buttons:
– MEMORY PLAY
– MEMORY INDEX
– MEMORY DELETE
– MEMORY +/-
– MEMORY MIX

Note on the index screen
You cannot record the index screen.

If you press EDITSEARCH during pause mode
Memory playback stops.

Image data modified with your computer or shot with other equipment
You may not be able to copy them with your camcorder.

If you press DISPLAY in the standby or recording mode
You can see memory playback and the file name indicators in addition to the indicators pertinent to Hi8 Hi 8/Digital8 Digital 8 tapes, such as the time code indicator.

When copying
You cannot copy the image recorded on “Memory Stick” with titles to tapes.
You can enlarge still images recorded on a “Memory Stick.”

**Before operation**
Insert a “Memory Stick” into your camcorder.

1. Set the POWER switch to MEMORY or VCR. Make sure that the LOCK is set to the left (unlock) position.
2. Press PB ZOOM on your camcorder while you are playing back images recorded on “Memory Stick.” The still image is enlarged, and ↑ ↓ indicators showing the direction to move the image appear on the screen.
3. Turn SEL/PUSH EXEC dial to move the enlarged image, then press the dial.
   - ↑: The image moves downward.
   - ↓: The image moves upward.
   - ← → becomes available.
4. Turn SEL/PUSH EXEC dial to move the enlarged image, then press the dial.
   - ←: The image moves rightward. (Turn the dial downward.)
   - →: The image moves leftward. (Turn the dial upward.)

To cancel memory PB ZOOM function
Press PB ZOOM.
Note
You cannot record or print the images enlarged by the PB ZOOM mode on “Memory Stick”s.

In the PB ZOOM mode
The digital effect function does not work.

The PB ZOOM function is cancelled when the following buttons are pressed:
– MENU
– MEMORY PLAY
– MEMORY INDEX
– MEMORY +/-

Pictures in the PB ZOOM mode
Pictures in the PB ZOOM mode are not output through the DV IN/OUT jack when the POWER switch is set to MEMORY.

Moving pictures recorded on “Memory Stick”s
The PB ZOOM function does not work on moving pictures recorded on “Memory Stick”s.
You can automatically play back images in sequence. This function is useful especially when checking recorded images or during a presentation.

**Before operation**
Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left (unlock) position.
(2) Press MENU to make the menu display appear.
(3) Turn the SEL/PUSH EXEC dial to select , then press the dial.
(4) Turn the SEL/PUSH EXEC dial to select SLIDE SHOW, then press the dial.
(5) Press MEMORY PLAY. Your camcorder plays back the images recorded on the “Memory Stick” in sequence.

To stop the slide show
Press MENU.

To pause during a slide show
Press MEMORY PLAY.

To start the slide show from a particular image
Select the desired image using MEMORY +/- buttons before step 2.

To view the recorded images on TV
Connect your camcorder to a TV with the A/V connecting cable supplied with your camcorder before operation.

If you change the “Memory Stick” during operation
The slide show does not operate. If you change the “Memory Stick”, be sure to follow the steps again from the beginning.
Preventing accidental erasure
- Image protection

To prevent accidental erasure of important images, you can protect selected images.

**Before operation**

Insert a “Memory Stick” into your camcorder.

1. Set the POWER switch to MEMORY or VCR. Make sure that the LOCK is set to the left (unlock) position.
2. Play back the image you want to protect.
3. Press MENU to make the menu display appear.
4. Turn the SEL/PUSH EXEC dial to select ☐, then press the dial.
5. Turn the SEL/PUSH EXEC dial to select PROTECT, then press the dial.
6. Turn the SEL/PUSH EXEC dial to select ON, then press the dial.
7. Press MENU to erase the menu display. The mark is displayed beside the data file name of the protected image.

To cancel image protection

Select OFF in step 6, then press the SEL/PUSH EXEC dial.

**Note**

Formatting erases all information on the “Memory Stick”, including the protected image data. Check the contents of the “Memory Stick” before formatting.

**If the write-protect tab on the “Memory Stick” is set to LOCK**

You cannot carry out image protection.
Deleting images

You can delete images stored in a “Memory Stick.”

Before operation
Insert a “Memory Stick” into your camcorder.

Deleting selected images

(1) Set the POWER switch to MEMORY or VCR. Make sure that the LOCK is set to the left (unlock) position.
(2) Play back the image you want to delete.
(3) Press MEMORY DELETE. “DELETE?” appears on the screen.
(4) Press MEMORY DELETE again. The selected image is deleted.

To cancel deleting an image

To delete an image displayed on the index screen
Press MEMORY +/– to move the ▶ indicator to the desired image and follow steps 3 and 4.

Notes
• To delete a protected image, first cancel image protection.
• Once you delete an image, you cannot restore it. Check the images to delete carefully before deleting them.
Deleting all the images

You can delete all the unprotected images in the "Memory Stick".

1. Set the POWER switch to MEMORY. Make sure that the LOCK is set to the left (unlock) position.
2. Press MENU to make the menu display appear.
3. Turn the SEL/PUSH EXEC dial to select , then press the dial.
4. Turn the SEL/PUSH EXEC dial to select DELETE ALL, then press the dial.
5. Turn the SEL/PUSH EXEC dial to select OK, then press the dial. OK changes to EXECUTE.
6. Turn the SEL/PUSH EXEC dial to select EXECUTE, then press the dial.

DELETING appears on the screen. When all the unprotected images are deleted, COMPLETE is displayed.
Deleting images

To cancel deleting all the images in the “Memory Stick”
Select RETURN in step 5, then press the SEL/PUSH EXEC.

While DELETING appears
Do not turn the POWER switch or press any buttons.

If the write-protect tab on the “Memory Stick” is set to LOCK
You cannot delete images.
Writing a print mark – PRINT MARK

You can specify the recorded still image to print out. This function is useful for printing out still images later. Your camcorder conforms with the DPOF (Digital Print Order Format) standard for specifying the still images to print out.

Before operation
Insert a “Memory Stick” into your camcorder.

(1) Set the POWER switch to MEMORY or VCR. Make sure that the LOCK is set to the left (unlock) position.
(2) Play back the image you want to write a print mark.
(3) Press MENU to display the menu.
(4) Turn the SEL/PUSH EXEC dial to select , then press the dial.
(5) Turn the SEL/PUSH EXEC dial to select PRINT MARK, then press the dial.
(6) Turn the SEL/PUSH EXEC dial to select ON, then press the dial.
(7) Press MENU to erase the menu display. The mark is displayed beside the data file name of the image with a print mark.

To cancel writing print marks
Select OFF in step 6, then press the SEL/PUSH EXEC dial.

If the write-protect tab on the “Memory Stick” is set to LOCK
You cannot write print marks on still images.

Moving pictures
You cannot write print marks on moving pictures.
Using the external printer

You can use the external printer (supplied with DCR-TRV830 only) on your camcorder to print still images on the print paper. For details, refer to the operating instructions of the printer.

There are various ways of printing still images. The following, however, describes how to print by selecting in the menu on your camcorder. (p. 78)

Before operation

- Insert a recorded “Memory Stick” into your camcorder.
- Connect the printer to your camcorder as illustrated.

You can print 9 still images on the 9 split print paper. Select the desired mode in the menu settings.

* 9 still images with print marks are printed together.

You can make prints with the recording date and/or recording time. Select the desired mode in the menu settings.
If you run into any problem using your camcorder, use the following table to troubleshoot the problem. If the problem persists, disconnect the power source and contact your Sony dealer or local authorized Sony service facility. If “C:ss” appears on the screen or the display window, the self-diagnosis display function has worked. See page 143.

    ➔ Close the LCD panel. (p. 20) |
| You cannot record in the LP mode. | • The tape is the standard 8 tape.  
    ➔ Use Hi8/ Digital8 tapes. (p. 85) |
| A vertical band appears when you shoot a subject such as lights or a candle flame against a dark background. | • The contrast between the subject and background is too high. This is not a malfunction. |
| A vertical band appears when you shoot a very bright subject. | • This is not a malfunction. |
| Some tiny white spots appear on the screen. | • Slow shutter, low lux or Super NightShot mode is activated. This is not a malfunction. |
### Troubleshooting

#### The date search does not work correctly.
- **Symptom**: The picture which is recorded in the Digital8 system is not played back.
- **Cause and/or Corrective Actions**:
  - PB MODE is set to \[ \text{Hi8} / \text{Hi8} \] in the menu settings.  
  - Set it to AUTO. (p. 78)

#### The tape which is recorded in the Hi8/standard 8 system is not played back correctly.
- **Symptom**: The picture which is recorded in the Digital8 system is not played back.
- **Cause and/or Corrective Actions**:
  - PB MODE is set to \[ \text{Hi8} / \text{Hi8} \] in the menu settings.  
  - Set it to AUTO. (p. 78)

#### Types of trouble and their solutions

## Types of trouble and their solutions

### Others

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and/or Corrective Actions</th>
</tr>
</thead>
</table>
| Digital program editing does not function. | - The input selector on the VCR is not set correctly.  
  ➔ Check the connection and set the input selector on the VCR again. (p. 62)  
- The camcorder is connected to DV equipment of other than Sony.  
  ➔ Set it to IR. (p. 63)  
- Setting program on a blank portion of the tape is attempted.  
  ➔ Set the program again on a recorded portion. (p. 70)  
- The camcorder and the VCR are not synchronized.  
  ➔ Adjust the synchronicity. (p. 68)  
- PB MODE is set to H/B in the menu settings.  
  ➔ Set it to AUTO. (p. 78) |
| The Remote Commander supplied with your camcorder does not work. | - COMMANDER is set to OFF in the menu settings.  
  ➔ Set it to ON. (p. 78)  
- Something is blocking the infrared rays.  
  ➔ Remove the obstacle.  
- The batteries are inserted in the battery holder with the + – polarities incorrectly matching the + – marks.  
  ➔ Insert the batteries with the correct polarity. (p. 165)  
- The batteries are dead.  
  ➔ Insert new ones. (p. 165) |
| The picture from a TV or VCR does not appear even when your camcorder is connected to outputs on the TV or VCR. | - DISPLAY is set to V-OUT/LCD in the menu settings.  
  ➔ Set it to LCD. (p. 78) |
| The melody or beep sounds for 5 seconds. | - Moisture condensation has occurred.  
  ➔ Remove the cassette and leave your camcorder for at least 1 hour to acclimatize. (p. 152)  
- Some troubles has occurred in your camcorder.  
  ➔ Remove the cassette and insert it again, then operate your camcorder. |
| You cannot charge the battery pack. | - The POWER switch is not set to OFF (CHG).  
  ➔ Set it to OFF (CHG). |
| While charging the battery pack, the backlight of the display window does not light. | - Charging the battery pack is completed.  
  ➔ The battery pack is not properly installed.  
  ➔ Install it properly. (p. 11) |
| While charging the battery pack, the remaining battery time indicator flashes. | - The battery pack is not properly installed.  
  ➔ Install it properly.  
- Something is wrong with the battery pack.  
  ➔ Contact your Sony dealer or local authorized Sony service facility.  
- The battery’s temperature is extremely high or low because of the ambient temperature. |
| No function works though the power is on. | - Disconnect the power cord of the AC power adaptor or remove the battery, then reconnect it in about one minute. Turn the power on. If the functions still do not work, open the LCD panel and press the RESET button under DISPLAY button using a sharp-pointed object. (If you press the RESET button, all the settings including the date and time return to the default.) (p. 161) |
Self-diagnosis display

Your camcorder has a self-diagnosis display function. This function displays the current condition of your camcorder as a 5-digit code (a combination of a letter and figures) on the screen or in the display window. If a 5-digit code is displayed, check the following code chart. The last two digits (indicated by □□) will differ depending on the state of your camcorder.

### Five-digit display | Cause and/or Corrective Actions
---|---
C:04:□□ | • You are using a battery pack that is not an “InfoLITHIUM” battery pack.  
  ➔ Use an “InfoLITHIUM” battery pack. (p. 148)
C:21:□□ | • Moisture condensation has occurred.  
  ➔ Remove the cassette and leave your camcorder for at least 1 hour to acclimatize. (p. 152)
C:22:□□ | • The video heads are dirty.  
  ➔ Clean the heads using the Sony V8-25CLD cleaning cassette (optional). (p. 153)
C:31:□□ | • A malfunction other than the above that you can service has occurred.  
  ➔ Remove the cassette and insert it again, then operate your camcorder.  
  ➔ Disconnect the power cord of the AC power adaptor or remove the battery pack. After reconnecting the power source, operate your camcorder.
C:32:□□ |  
E:61:□□ | • A malfunction that you cannot service has occurred.  
  ➔ Contact your Sony dealer or local authorized Sony service facility and inform them of the 5-digit code. (example: E:61:10)
E:62:□□ |  

If you are unable to rectify the problem even if you try corrective actions a few times, contact your Sony dealer or local authorized Sony service facility.
Warning indicators and messages

If indicators and messages appear on the screen or in the display window, check the following.
See the page in parentheses “( )” for more information.

Warning indicators

100-0001  Warning indicator as to file
Slow flashing:
• The file is corrupted.
• The file is unreadable.
• You are trying to carry out MEMORY MIX function on moving picture.

C:21:00  Self-diagnosis display (p. 143)

⚠️ The battery is dead or nearly dead
Slow flashing:
• The battery is nearly dead.
  The ⚠️ indicator sometimes blinks even if the remaining battery time is about five to ten minutes depending on the operating conditions, environment and battery condition.
Fast flashing:
• The battery is dead.

💧 Moisture condensation has occurred*
Fast flashing:
• Eject the cassette, turn off your camcorder, and leave it for about 1 hour with the cassette compartment open (p. 152).

⚠️ Warning indicator as to “Memory Stick”*
Slow flashing:
• No “Memory Stick” is inserted.
Fast flashing:
• The “Memory Stick” is not readable with your camcorder (p. 88).
• The image cannot be recorded on “Memory Stick” (p. 109).
• The picture you tried to record on “Memory Stick” as a moving picture is recorded in the Hi8/standard 8 system (p. 109).

⚠️ Warning indicator as to “Memory Stick” formatting
Fast flashing:
• “Memory Stick” is not formatted correctly (p. 84).
• The “Memory Stick” data is corrupted.*

⚠️ Warning indicator as to tape
Slow flashing:
• The tape is near the end.
• No tape is inserted.*
• The write-protect tab on the cassette is out (red) (p. 18).*
Fast flashing:
• The tape has run out.*

⚠️ You need to eject the cassette*
Slow flashing:
• The write-protect tab on the cassette is out (red) (p. 18).
Fast flashing:
• Moisture condensation has occurred (p. 152).
• The tape has run out.
• The self-diagnosis display function is activated (p. 143).

⚠️ The image is protected*
Slow flashing:
• The image is protected (p. 132).

⚠️ Warning indicator as to the flash (optional)
Fast flashing:
• There is something wrong with the external flash (optional).

* You hear the melody or beep sound.
Warning messages

- **CLOCK SET**
  Set the date and time. (p. 17)

- **FOR “InfoLITHIUM” BATTERY ONLY**
  Use an “InfoLITHIUM” battery pack. (p. 148)

- **8mm TAPE → SP REC**
  Use Hi8/Eight/8/Digital8/Eight8 tapes when you record in the LP mode.* (p. 85)

- **Hi8 TAPE → LP/SP REC**
  The tape has run out.*

- **TaPE END**
  Insert a cassette tape.*

- **CLEANING CASSETTE**
  The video heads are dirty. (p. 153)

- **COPY INHIBIT**
  You tried to record a picture that has a copyright control signal.* (p. 146)

- **FULL**
  The “Memory Stick” is full.* (p. 99)

- **NO TAPE**
  You are trying to record an image with sound that cannot be recorded by your camcorder on “Memory Stick”.* (p. 107)

- **MEMORY STICK ERROR**
  The “Memory Stick” data is corrupted.* (p. 90)

- **FORMAT ERROR**
  Check the type of formatting.* (p. 84)

- **DIRECTORY ERROR**
  The “Memory Stick” has more than one directory such as 100msdcf.* (p. 117)

- **NO PRINT MARK**
  You selected MARKED in 9PIC PRINT in the menu settings using a “Memory Stick” contains no image with a print mark.* (p. 137)

- **NO STILL IMAGE FILE**
  You selected MULTI in 9PIC PRINT in the menu settings using a “Memory Stick” contains no still image.* (p. 137)

- **DELETING**
  You tried to record on a “Memory Stick” while deleting data.*

- **FORMATTING**
  You tried to record on a “Memory Stick” while formatting it.*

- **NOW CHARGING**
  Charging an external flash (optional) does not work correctly.*

* You hear the melody or beep sound.

** The ♦ indicator and “♦ CLEANING CASSETTE” message appear one after another on the screen.
What is the “Digital8 ™ system”?
This video system has been developed to enable digital recording to Hi8 Hi8/Digital8 ™ video cassette.

Usable cassette tapes
We recommend using Hi8 Hi8/Digital8 ™ video cassette.*
The recording time when you use your Digital8 ™ system camcorder on Hi8 Hi8/standard 8 8 tape is half the recording time when using the conventional Hi8 Hi8/standard 8 8 system camcorder. (120 minutes of recording time becomes 60 minutes in the SP mode.)
* If you use standard 8 8 tape, be sure to play back the tape on this camcorder. Mosaic pattern noise may appear when you play back standard 8 8 tape on other VCRs (including other DCR-TRV730/TRV828/TRV830).

Note
Tapes recorded in the Digital8 ™ system cannot be played back on Hi8 Hi8/standard 8 8 (analog) system machine.

Playback system
The Digital8 ™ system or Hi8 Hi8/standard 8 8 system is automatically detected before the tape is played back.
During playback of tapes recorded in the Hi8 Hi8/standard 8 8 system, digital signals are output as the image signals from the DV IN/OUT jack.

Display during automatic detection of system
The Digital8 ™ system or Hi8 Hi8/standard 8 8 system is automatically detected, and the playback system is automatically switched to. During switching of systems, the screen turns blue, and the following displays appear on the screen. A hissing noise also sometimes can be heard.

Example: During switching from Digital8 ™ to Hi8 Hi8/standard 8 8

Copyright signal
When you play back
Using any other video camera recorder, you cannot record on a tape that has recorded copyright control signals for copyright protection of software which is played back on your camcorder.

When you record
You cannot record software on your camcorder that contains copyright control signals for copyright protection of software. COPY INHIBIT appears on the LCD screen, in the viewfinder or on the TV screen if you try to record such software. Your camcorder does not record copyright control signals on the tape when it records.
When you playback a dual sound track tape

When you use tapes recorded in the Digital8 ⋆ system
When you play back a Digital8 ⋆ system tape which is dubbed from a dual sound track tape recorded in the DV system, set HiFi SOUND to the desired mode in the menu settings (p. 78).

**Sound from speaker**

<table>
<thead>
<tr>
<th>HiFi Sound Mode</th>
<th>Playing back a stereo tape</th>
<th>Playing back a dual sound track tape</th>
</tr>
</thead>
<tbody>
<tr>
<td>STEREO</td>
<td>Stereo</td>

</tr>
<tr>
<td>1</td>
<td>Monaural</td>
<td>Main sound</td>
</tr>
<tr>
<td>2</td>
<td>Unnatural Sound</td>
<td>Sub sound</td>
</tr>
</tbody>
</table>

You cannot record dual sound programs on your camcorder.
About the “InfoLITHIUM” battery pack

What is the “InfoLITHIUM” battery pack?
The “InfoLITHIUM” battery pack is a lithium-ion battery pack that has functions for communicating information related to operating conditions between your camcorder and an AC power adaptor.
The “InfoLITHIUM” battery pack calculates the power consumption according to the operating conditions of your camcorder, and displays the remaining battery time in minutes.

Charging the battery pack
• Be sure to charge the battery pack before you start using your camcorder.
• We recommend charging the battery pack in an ambient temperature of between 10 °C to 30 °C (50 °F to 86 °F) until the backlight of the display window goes out, indicating that the battery pack is fully charged. If you charge the battery pack outside of this temperature range, you may not be able to efficiently charge the battery pack.
• After charging is completed, either disconnect the cable from the DC IN jack on your camcorder or remove the battery pack.

Effective use of the battery pack
• Battery performance decreases in low-temperature surroundings. So, the time that the battery pack can be used is shorter in cold places. We recommend the following to use the battery pack longer:
  – Put the battery pack in a pocket close to your body to warm it up, and insert it in your camcorder immediately before you start taking shots.
  – Use the large capacity battery pack (NP-FM70/FM90/FM91, optional).
• Frequently using the LCD panel or frequently operating playback, fast forward or rewind wears out the battery pack faster. We recommend using the large capacity battery pack (NP-FM70/FM90/FM91, optional).
• Be certain to turn the POWER switch to OFF (CHG) when not taking shots or playing back on your camcorder. The battery pack is also consumed when your camcorder is in the standby mode or playback is paused.
• Have spare battery packs handy for two or three times the expected recording time, and make a trial recording before the actual recording.
• Do not expose the battery pack to water. The battery pack is not water-registant.

Remaining battery time indicator
• If the power may go off although the remaining battery time indicator indicates that the battery pack has enough power to operate, charge the battery pack fully again so that the indication on the remaining battery time indicator is correct. Note, however, that the correct battery indication sometimes will not be restored if it is used in high temperatures for a long time or left in a fully charged state, or the battery pack is frequently used. Regard the remaining battery time indication as the approximate shooting time.
• The mark indicating there is little remaining battery time sometimes flashes depending on the operating conditions or ambient temperature and environment even if the remaining battery time is about five to ten minutes.

How to store the battery pack
• Even if the battery pack is not used for a long time, store it in a dry, cool place after fully charging it once per year and then using the battery pack up on your camcorder. This is to maintain the battery pack’s functions.
• To use the battery pack up on your camcorder, leave your camcorder in the shooting mode until the power goes off without a cassette inserted.

Battery life
• The battery life is limited. Battery capacity drops little by little as you use it more and more, and as time passes. When the available battery time is shortened considerably, a probable cause is that the battery pack has reached the end of its life. Please buy a new battery pack.
• The battery life varies according to how it is stored and operating conditions and environment for each battery pack.
The DV jack on this unit is an i.LINK-compliant DV input/output jack. This section describes the i.LINK standard and its features.

What is “i.LINK”?  
i.LINK is a digital serial interface for handling digital video, digital audio and other data in two directions between equipment having the i.LINK jack, and for controlling other equipment.  
i.LINK-compatible equipment can be connected by a single i.LINK cable. Possible applications are operations and data transactions with various digital AV equipment.  
When two or more i.LINK-compatible equipment are connected to this unit in a daisy chain, operations and data transactions are possible with not only the equipment that this unit is connected to but also with other devices via the directly connected equipment.  
Note, however, that the method of operation sometimes varies according to the characteristics and specifications of the equipment to be connected, and that operations and data transactions are sometimes not possible on some connected equipment.

**Note**  
Normally, only one piece of equipment can be connected to this unit by the i.LINK cable (DV cable). When connecting this unit to i.LINK-compatible equipment having two or more i.LINK jacks (DV jacks), refer to the instruction manual of the equipment to be connected.

About the Name “i.LINK”  
i.LINK is a more familiar term for IEEE 1394 data transport bus proposed by SONY, and is a trademark approved by many corporations.  
IEEE 1394 is an international standard standardized by the Institute of Electrical and Electronic Engineers.

**i.LINK Baud rate**  
i.LINK’s maximum baud rate varies according to the equipment. Three maximum baud rates are defined:  

- S100 (approx. 100Mbps*)  
- S200 (approx. 200Mbps)  
- S400 (approx. 400Mbps)  

The baud rate is listed under “Specifications” in the instruction manual of each equipment. It is also indicated near the i.LINK jack on some equipment.  
The maximum baud rate of equipment on which it is not indicated such as this unit is “S100”.  
When units are unit is connected to equipment having a different maximum baud rate, the baud rate sometimes differs from the indicated baud rate.

* What is “Mbps”?  
Mbps stands for megabits per second, or the amount of data that can be sent or received in one second. For example, a baud rate of 100Mbps means that 100 megabits of data can be sent in one second.
About i.LINK

i.LINK Functions on this unit

For details on how to dub when this unit is connected to other video equipment having DV jacks, see page 60.
This unit can also be connected to other i.LINK (DV) compatible equipment made by SONY (e.g. VAIO series personal computer) other than video equipment.
Before connecting this unit to a personal computer, make sure that application software supported by this unit is already installed on the personal computer.
For details on precautions when connecting this unit, also refer to the instruction manuals for the equipment to be connected.

Required i.LINK Cable

Use the Sony i.LINK 4-pin-to-4-pin cable (during DV dubbing).

i.LINK and i are trademarks.
Using your camcorder abroad

You can use your camcorder in any country or area with the AC power adaptor supplied with your camcorder within 100 V to 240 V AC, 50/60 Hz.

When charging the battery pack, use a commercially available AC plug adaptor [a], if necessary, depending on the design of the wall outlet [b].

Your camcorder is an NTSC system based camcorder. If you want to view the playback picture on a TV, it must be an NTSC system based TV with VIDEO/AUDIO input jack. The following shows TV color systems used overseas.

**NTSC system**
Bahama Islands, Bolivia, Canada, Central America, Chile, Colombia, Ecuador, Jamaica, Japan, Korea, Mexico, Peru, Surinam, Taiwan, the Philippines, the U.S.A., Venezuela, etc.

**PAL system**
Australia, Austria, Belgium, China, Czech Republic, Denmark, Finland, Germany, Great Britain, Holland, Hong Kong, Italy, Kuwait, Malaysia, New Zealand, Norway, Portugal, Singapore, Slovak Republic, Spain, Sweden, Switzerland, Thailand, etc.

**PAL-M system**
Brazil

**PAL-N system**
Argentina, Paraguay, Uruguay

**SECAM system**
Bulgaria, France, Guyana, Hungary, Iran, Iraq, Monaco, Poland, Russia, Ukraine, etc.

**Simple setting of clock by time difference**
You can easily set the clock to the local time by setting a time difference. Select WORLD TIME in the menu settings. See page 78 for more information.
Moisture condensation

If your camcorder is brought directly from a cold place to a warm place, moisture may condense inside your camcorder, on the surface of the tape, or on the lens. In this condition, the tape may stick to the head drum and be damaged or your camcorder may not operate correctly. If there is moisture inside your camcorder, the beep sounds and the \[\text{\\textbf{1}}\] indicator flashes. When the \[\text{\\textbf{\text{1}}}\] indicator flashes at the same time, the cassette is inserted in your camcorder. If moisture condenses on the lens, the indicator will not appear.

If moisture condensation occurred
None of the functions except cassette ejection will work. Eject the cassette, turn off your camcorder, and leave it for about 1 hour with the cassette compartment open. Your camcorder can be used again if the \[\text{\\textbf{1}}\] indicator does not appear when the power is turned on again.

Note on moisture condensation
Moisture may condense when you bring your camcorder from a cold place into a warm place (or vice versa) or when you use your camcorder in a hot place as follows:
– You bring your camcorder from a ski slope into a place warmed up by a heating device.
– You bring your camcorder from an air-conditioned car or room into a hot place outside.
– You use your camcorder after a squall or a shower.
– You use your camcorder in a high temperature and humidity place.

How to prevent moisture condensation
When you bring your camcorder from a cold place into a warm place, put your camcorder in a plastic bag and tightly seal it. Remove the bag when the air temperature inside the plastic bag has reached the surrounding temperature (after about 1 hour).
Cleaning the video heads
To ensure normal recording and clear pictures, clean the video heads.

**When you playback/record in the Digital8 system**
The video heads may be dirty when:
– mosaic-pattern noise appears on the playback picture.
– playback pictures do not move.
– playback pictures do not appear.
– the  $\bullet$ indicator and “$\bullet$ CLEANING CASSETTE” message appear one after another during recording.
If the video heads get dirtier, the entire screen becomes blue.

![Image](image1.png)

**When you play back in the Hi8/Standard 8 (analog) system**
The video heads may be dirty when:
– playback pictures contain noise.
– playback pictures are hardly visible.
– playback pictures do not appear.

![Image](image2.png)

If the above problem occurs, clean the video heads with the Sony V8-25CLD cleaning cassette (optional). Check the picture and if the above problem persists, repeat cleaning.

Cleaning the LCD screen
If fingerprints or dust make the LCD screen dirty, we recommend using a LCD Cleaning Kit (optional) to clean the LCD screen.
Maintenance information and precautions

Charging the built-in rechargeable battery

Your camcorder is supplied with a built-in rechargeable battery so as to retain the date and time, etc., regardless of the setting of the POWER switch. The built-in rechargeable battery is always charged as long as you are using your camcorder. The battery, however, will get discharged gradually if you do not use your camcorder. It will be completely discharged in about half a year if you do not use your camcorder at all. Even if the built-in rechargeable battery is not charged, it will not affect the camcorder operation. To retain the date and time, etc., charge the battery if the battery is discharged.

**Charging the built-in rechargeable battery:**
- Connect your camcorder to a wall outlet using the AC power adaptor supplied with your camcorder, and leave your camcorder with the POWER switch turned off for more than 24 hours.
- Or install the fully charged battery pack in your camcorder, and leave your camcorder with the POWER switch turned off for more than 24 hours.

Precautions

**Camcorder operation**
- Operate your camcorder on 7.2 V (battery pack) or 8.4 V (AC power adaptor).
- For DC or AC operation, use the accessories recommended in this operating instructions.
- If any solid object or liquid get inside the casing, unplug your camcorder and have it checked by a Sony dealer before operating it any further.
- Avoid rough handling or mechanical shock. Be particularly careful of the lens.
- Keep the POWER switch set to OFF (CHG) when you are not using your camcorder.
- Do not wrap your camcorder with a towel, for example, and operate it. Doing so might cause heat to build up inside.
- Keep your camcorder away from strong magnetic fields or mechanical vibration. Noise may appear on the image.
- Do not touch the LCD screen with your fingers or a sharp-pointed object.
- If your camcorder is used in a cold place, a residual image may appear on the screen. This is not a malfunction.
- While using your camcorder, the back of the LCD screen may heat up. This is not a malfunction.

**On handling tapes**
- Do not insert anything into the small holes on the rear of the cassette. These holes are used to sense the type and thickness of the tape and if the recording tab is in or out.
- Do not open the tape protect cover or touch the tape.

**Camcorder care**
- Remove the tape, and periodically turn on the power, operate the CAMERA and VCR sections and play back a tape for about 3 minutes when your camcorder is not to be used for a long time.
- Clean the lens with a soft brush to remove dust. If there are fingerprints on the lens, remove them with a soft cloth.
- Clean the camcorder body with a dry soft cloth, or a soft cloth lightly moistened with a mild detergent solution. Do not use any type of solvent which may damage the finish.
- Do not let sand get into your camcorder. When you use your camcorder on a sandy beach or in a dusty place, protect it from the sand or dust. Sand or dust may cause your camcorder to malfunction, and sometimes this malfunction cannot be repaired.
Connection to your computer
- When recording with i.LINK cable the image processed or edited by your computer, use a new Hi8/Digital8 tape.
- When inputting the image recorded by Hi8/standard 8 (analog) system into your computer, dub the image into a Digital8 or DV tape first, and then input it into your computer.

When inputting the image recorded by Hi8/standard 8 system into Sony VAIO
The Program Capture function of DVgate motion doesn’t work. To use this function, dub the image into a Digital8 or DV tape first, and then input it into your Sony VAIO.

AC power adaptor
- Unplug the unit from the wall outlet when you are not using the unit for a long time. To disconnect the power cord, pull it out by the plug. Never pull the power cord itself.
- Do not operate the unit with a damaged cord or if the unit has been dropped or damaged.
- Do not bend the power cord forcibly, or place a heavy object on it. This will damage the cord and may cause fire or electrical shock.
- Prevent metallic objects from coming into contact with the metal parts of the connecting section. If this happens, a short may occur and the unit may be damaged.
- Always keep metal contacts clean.
- Do not disassemble the unit.
- Do not apply mechanical shock or drop the unit.
- While the unit is in use, particularly during charging, keep it away from AM receivers and video equipment. AM receivers and video equipment disturb AM reception and video operation.
- The unit becomes warm during use. This is not a malfunction.
- Do not place the unit in locations that are:
  - Extremely hot or cold
  - Dusty or dirty
  - Very humid
  - Vibrating

About care and storage of the lens
- Wipe the surface of the lens clean with a soft cloth in the following instances:
  - When there are fingerprints on the lens surface
  - In hot or humid locations
  - When the lens is used in environments susceptible to salt such as the seaside
- Store the lens in a well-ventilated location subject to little dirt or dust.

To prevent mold from occurring, periodically perform the above. We recommend turning on and operating the video camera recorder about once per month to keep the video camera recorder in an optimum state for a long time.
Battery pack
• Use only the specified charger or video equipment with the charging function.
• To prevent accident from a short circuit, do not allow metal objects to come into contact with the battery terminals.
• Keep the battery pack away from fire.
• Never expose the battery pack to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight.
• Keep the battery pack dry.
• Do not expose the battery pack to any mechanical shock.
• Do not disassemble nor modify the battery pack.
• Attach the battery pack to the video equipment securely.
• Charging while some capacity remains does not affect the original battery capacity.

Note on dry batteries
To avoid possible damage from battery leakage or corrosion, observe the following:
– Be sure to insert the batteries with the + – polarities matched to the + – marks.
– Dry batteries are not rechargeable.
– Do not use a combination of new and old batteries.
– Do not use different types of batteries.
– Current flows from batteries when you are not using them for a long time.
– Do not use leaking batteries.

If batteries are leaking
• Wipe off the liquid in the battery compartment carefully before replacing the batteries.
• If you touch the liquid, wash it off with water.
• If the liquid get into your eyes, wash your eyes with a lot of water and then consult a doctor.

If any problem occurs, unplug your camcorder and contact your nearest Sony dealer.
Video recording system
2 rotary heads
Helical scanning system
Audio recording system
Rotary heads, PCM system
Quantization: 12 bits (Fs 32 kHz, stereo 1, stereo 2), 16 bits (Fs 48 kHz, stereo)

Video signal
NTSC color, EIA standards

Recommended cassette
Hi8/Digital8 video cassette

Recording/playback time (using 120 min. Hi8 video cassette)
SP mode: 1 hour
LP mode: 1 hour and 30 minutes

Fastforward/rewind time (using 120 min. Hi8 video cassette)
Approx. 5 min.

Viewfinder
Electric Viewfinder, Monochrome

Image device
4.5 mm (1/4 type CCD)
(Charge Coupled Device)
Approx. 1,070,000 pixels
(Memory mode: 1,000,000 pixels)
(Camera mode: 690,000 pixels)

Lens
Combined power zoom lens
Filter diameter 37 mm (1 1/2 in.)
18x (Optical), 500x (Digital)

Focal length
4.1 - 73.8 mm (3/16 - 3 in.)
When converted to a 35 mm still camera
Camera mode:
47 - 846 mm (1 7/8 - 33 3/8 in.)
Memory mode:
39 - 702 mm (1 9/16 - 27 3/4 in.)

Color temperature
Auto

Minimum illumination
7 lx (lux) (F 1.8)
0 lx (lux) (in the NightShot mode)*
* Objects unable to be seen due to the dark can be shot with infrared lighting.

Specifications

Identifying the parts and controls

Camcorder

1 Lens cap (p. 19)
2 LCD screen (p. 19)
3 OPEN button (p. 19)
4 VOLUME buttons (p. 27)
5 Battery pack (p. 11)
6 BATT (battery) release lever (p. 11)
7 POWER switch (p. 19)
8 START/STOP button (p. 19)
9 Hooks for shoulder strap
10 DC IN jack (p. 12)

This mark indicates that this product is a genuine accessory for Sony video products.
When purchasing Sony video products, Sony recommends that you purchase accessories with this “GENUINE VIDEO ACCESSORIES” mark.

Attaching the shoulder strap
Attach the shoulder strap supplied with your camcorder to the hooks for the shoulder strap.
Identifying the parts and controls

**Video control buttons** (p. 27, 29)
- STOP (stop)
- Rew (rewind)
- PLAY (playback)
- FF (fastforward)
- PAUSE (pause)
- REC (recording)

**SUPER LASER LINK button** (p. 32)

**SUPER NIGHTSHOT button** (p. 23)

**Focus ring** (p. 46)

**Lens**

**Microphone**

**Camera recording lamp** (p. 19)

**Infrared rays emitter** (p. 23, 32)

**NIGHTSHOT switch** (p. 23)

**Display window** (p. 166)

**FOCUS switch** (p. 46)

**FADER button** (p. 37)

**BACK LIGHT button** (p. 23)

**Remote sensor**

---

**What is SUPER LASER LINK?**
The super laser link system sends and receives pictures and sound between video equipment having the super laser link mark by using infrared rays.
Identifying the parts and controls

25 EDITSEARCH buttons (p. 26)  
26 MPEG ►II button (p. 120)  
27 Speaker  
28 MEMORY - button (p. 111, 117)  
29 RESET button (p. 142)  
30 MEMORY PLAY button (p. 117)  
31 MEMORY INDEX button (p. 118)  
32 EXPOSURE button (p. 45)  
33 MEMORY DELETE button (p. 133)  
34 MEMORY + button (p. 111, 117)

Attaching the lens cap
Attach the lens cap to the grip strap as illustrated.
Notes on the intelligent accessory shoe

- The intelligent accessory shoe supplies power to optional accessories such as a video light, microphone or printer.
- The intelligent accessory shoe is linked to the POWER switch, allowing you to turn the power supplied by the shoe on and off. Refer to the operating instructions of the accessory for further information.
- The intelligent accessory shoe has a safety device for fixing the installed accessory securely. To connect an accessory, press down and push it to the end, and then tighten the screw.
- To remove an accessory, loosen the screw, and then press down and pull out the accessory.
Identifying the parts and controls

48 **Viewfinder** (p. 22)
49 **LOCK knob** (p. 19)
50 **Grip strap**
51 **(headphones) jack**
52 **MIC (PLUG IN POWER) jack**
   Connect an external microphone (optional). This jack also accepts a “plug-in-power” microphone.
53 **Eyecup**
54 **Viewfinder lens adjustment lever** (p. 22)
55 **OPEN/EJECT switch** (p. 18)
56 **Tripod receptacle** (base)
   Make sure that the length of the tripod screw is less than 6.5 mm (9/32 inch). Otherwise, you cannot attach the tripod securely and the screw may damage your camcorder.
57 **Cassette compartment** (p. 18)
Identifying the parts and controls

**58** AUDIO/VIDEO ID-2 jack  
(p. 31, 59, 103)

**59** S VIDEO ID-2 jack  
(p. 31)

**60** DV IN/OUT jack  
(p. 60, 103)  
The DV IN/OUT jack is i.LINK compatible.

**61** LANC jack  
LANC stands for Local Application Control Bus System. The LANC control jack is used for controlling the tape transport of video equipment and other peripherals connected to the video equipment. This jack has the same function as the jack indicated as CONTROL L or REMOTE.

**62** (USB) jack  
(p. 123)

Fastening the grip strap

Fasten the grip strap firmly.
Remote Commander

The buttons that have the same name on the Remote Commander as on your camcorder function identically to the buttons on your camcorder.

1 PHOTO button (p. 33, 97)
2 DISPLAY button (p. 28)
3 SEARCH MODE button (p. 56, 57)
4 I ◄► buttons (p. 56, 57)
5 Tape transport buttons (p. 29)
6 Transmitter
Point toward the remote sensor to control the camcorder after turning on the camcorder.
7 ZERO SET MEMORY button (p. 51, 55)
8 START/STOP button (p. 19)
9 DATA CODE button (p. 28)
10 Power zoom button (p. 21)

To prepare the Remote Commander
Insert 2 size AA (R6) batteries by matching the + and – polarities on the batteries to the + – marks inside the battery compartment.

Notes on the Remote Commander
• Point the remote sensor away from strong light sources such as direct sunlight or overhead lighting. Otherwise, the Remote Commander may not function properly.
• Your camcorder works in the Commander mode VTR 2. Commander modes 1, 2 and 3 are used to distinguish your camcorder from other Sony VCRs to avoid remote control misoperation. If you use another Sony VCR in the Commander mode VTR 2, we recommend changing the Commander mode or covering the sensor of the VCR with black paper.
