This symbol on the product, the package or on the packaging indicates that the product and the battery shall not be treated as household waste. On certain batteries this symbol might be used in combination with a chemical symbol. The chemical symbol for mercury (Hg) or lead (Pb) is added if the battery contains 0.0005% mercury or 0.004% lead. By ensuring that these products and batteries are disposed of correctly, you will help prevent potentially negative consequences for the environment and human health which could otherwise be caused by inappropriate waste handling of the materials contained in the products and by ensuring that they are disposed of correctly, otherwise it may be prohibited to dispose of electrical and electronic equipment together with household waste. The recycling of materials will help to conserve natural resources.

In case of products that for safety, performance or data integrity reasons require a permanent connection with an incorporated battery, this battery should be replaced by qualified service staff only. To ensure that the battery and the electrical and electronic equipment will be treated properly, hand over these products at the end-of-life to the applicable collection point for the recycling of electrical and electronic equipment. For all other batteries, please refer the section on how to remove the battery from the product safely. Hand the battery over the applicable collection point for the recycling of waste batteries. For more detailed information about recycling of this product or battery, please contact your local Civic Office, your household waste disposal service or the shop where you purchased the product or battery.
