Your BRAVIA™ must be properly connected to components such as sound system and cable or satellite box.

See reverse side of this poster for sample connection diagrams.

- Turn off and unplug all components before making connections.
- Do not turn on the TV until connection setup is complete.

What is HDMI™?
HDMI™ (High-Definition Multimedia Interface) cables are the standard for connecting HDTV. They are built to properly handle high bandwidth, uncompressed video and multi-channel audio—all in one cable.

Connecting a PC to Your BRAVIA™
- May require DVI-to-HDMI adapter and separate audio connector.
- Connect PC’s audio output when using a Digital Video Interface (DVI) connection.
- Refer to BRAVIA™ Operating Instruction Manual for more information.

To learn more about HDTV, visit www.sony.com/HDTV

Steps:

1. Your BRAVIA™ opens the door to the “Full HD Experience”.
   - This guide will explain how to get the most from your new High Definition TV.
   - Learn more. Visit the Sony HDTV Learning Center: www.sony.com/HDTV

2. Please take these steps before you power up your BRAVIA™:
   - Register online: www.sony.com/registration (from U.S.A.)
   - www.SonyStyle.ca/registration (from Canada)
   - Make sure you’ve removed all accessory contents from packaging
   - Install 2 AA batteries (supplied separately) in your remote control
   - Give your TV 4 inches (10 cm) of space behind it to properly vent.

3. The Four Steps to a Full HD Experience: Set, Sound, Source, and Setup
   - Along with your BRAVIA™ TV set, a complete HD system requires an HD sound system, a source of HD content, and proper setup connection with components such as your HD cable or satellite box.
   - You must get HD programming to experience the stunning detail of HDTV.
   - The quality of the image you see on your BRAVIA™ can only be as high as the quality of the signal it is displaying. This chart shows the different signal types and how to access them.

Contact your cable or satellite provider to signalize your service to HD. Check over the air HD broadcast with an HD-quality antenna (www.antennaweb.org) and discover the wealth of entertainment now available on super-high-resolution Blu-ray Disc™.

5. Running Initial Setup

   - Initial Setup instructions are displayed on the screen when your BRAVIA™ is powered on for the first time.

   1. Select the language for the OSD (on-screen display).
   2. Contact either Antenna or Cable to your TV:
      - Select Auto Program to advance to the Auto Programming.
      - If you are not using the VHF/UHF/CABLE connection to TV, you can cancel the Auto Program by selecting the Skip option.
   3. Your TV will detect the type of signal connected and will start scanning for the channels.
   4. Follow on-screen instructions to complete setup and begin viewing your TV.

6. Connecting Your TV

   - To Access Initial Setup by Remote Control
      - If you do not follow the Initial Setup as soon as you first turn on the BRAVIA™, you will not be able to select the HDTV channel.
      - Press the home button on your remote control to display on-screen the TV mode or External Inputs selection menu, OR
      - Press the INPUT button repeatedly until your selection is highlighted on screen.

7. Adjust Screen Shape and Aspect Ratio

   - High Definition and Standard Definition signals are transmitted with different aspect ratios (the width-to-height shape of the image). Most HD signals use a widescreen aspect ratio of 16:9.
   - Most SD signals use a boxed 4:3 aspect ratio.
   - Select the appropriate setting for your content.
   - The 4:3 image must be adjusted to look right. You can:
     - Adjust your TV so Sony 4:3 images are automatically re-configured (zoomed or letterboxed) to fill the wide TV screen OR
     - Watch SD content in its original, boxed format with wide black bars surrounding the image to fill in unused space (for example, you may prefer to watch an old classic movie in its original 4:3 format, not reconfigured for a wide screen).

8. Customize Sound and Picture Quality

   - You can choose operating and picture settings to match the content you are displaying on your TV.
   - Press the HOME button on your remote control and select Picture or Sound. Choose the appropriate setting for your content.
   - Use the remote control OPTIONS button to quickly adjust sound and picture quality.
   - Refer to your BRAVIA™ Operating Instruction Manual for more information.

To learn more about HDTV, visit www.sony.com/HDTV

To Do List

When the Initial Setup is completed, consider carrying out these items:

- Set Clock
- Set Closed Captions (CC)
- Set Parental Lock
- Show/Hide Channels
- Label Inputs (skip inputs)
- Speakers On/Off

For details, refer to your BRAVIA™ Operating Instruction Manual.
Required Cable Types for Connection

- HDMI
- DVI-to-HDMI
- Component
- Composite
- Coaxial
- Audio (L/R)
- Digital Optical Audio

Notes on Connection:
- Your TV is equipped with two HDMI inputs, connect your incoming signal source (HD Cable Box, HD Satellite Receiver, or DVD) with an HDMI or component video for the best possible picture quality.
- If your connecting equipment has DVI output instead of the HDMI output, you must use a DVI-to-HDMI cable for the video and also connect an audio cable for the sound. If this is the case, connect the cable to HDMI IN 2 (input) of your TV.
- When receiving High Definition content signal by over-the-air antenna, it is best to use the HD antenna.
- When using a DVI-to-HDMI cable, make sure to connect the DVI side first.

Programming the Remote Control

Your remote control can be programmed to use other equipment. The remote control is preset as below for Sony equipment.

<table>
<thead>
<tr>
<th>Sony Equipment</th>
<th>Programmable Code Numbers</th>
</tr>
</thead>
<tbody>
<tr>
<td>BD 101</td>
<td>Sony Blu-ray Disc Player</td>
</tr>
<tr>
<td>DVD 751</td>
<td>Sony DVD Player</td>
</tr>
<tr>
<td>STB 801</td>
<td>Sony Satellite Receiver</td>
</tr>
</tbody>
</table>

To Program Non-Sony Video Equipment:

1. In the space provided below, write down the three-digit code of your equipment found on the Manufacturer’s Codes List on page 26 of the Operating Instruction Manual.
2. Press and hold 2, 3, 4, or 5 to light the FUNCTION button.
3. Enter the three-digit code using 0-9 while the selected button is lit. If the code is not entered within 10 seconds, you must repeat step 2.
4. Press and hold the selected FUNCTION button until it blinks twice. If programmed correctly, the selected button blinks twice. If not, it blinks five times.

To Confirm the Programming:

If the equipment turns on and off the equipment by pressing the green button, then the programming is complete. If not, try the next code listed.

Note:
- In some cases, you may not be able to program your remote control. If this is the case, use your equipment’s own remote control.
- Any one of the FUNCTION buttons can be programmed to operate other equipment regardless of the labeling. For example, if programmed with the correct code, any one of the FUNCTION buttons available. Make note of your equipment’s programmed button.
