Discman

## D-E775

### FEATURES

- **SUPER ESP<sup>2</sup> STEADYSOUND ELECTRONIC SHOCK PROTECTION** provides 3 times stronger anti-shock protection than Sony's current ESP2 SteadySound ESP buffer memory system, and uses DSP (Digital Signal Processor) technology to provide Sony's best anti-skip protection for even longer continuous playback in more active uses\*
- **ULTRA SLIM DESIGN** is attractive and functional, yet less than one inch thick
- **MD LINK OPTICAL OUTPUT** permits digital connection to MiniDisc recorder (requires optional digital cable)
- **STEREO HEADPHONES WITH BACKLIT LCD REMOTE CONTROL** have Electronic Luminescence back light LCD display for ease of operation, and are Mega Bass<sup>®</sup> compatible
- **UP TO 23 HOURS PLAYBACK WITH 2 "AA" BATTERIES (ESP OFF)** is made possible by advanced design that allows extended battery life
- **HIGH IMAGE METALLIC FINISH DESIGN WITH HEAT RESISTANT LID** has attractive yet functional styling, and helps protect against high temperature build-up especially when using the Discman<sup>®</sup> in hot climates in a car
- **MEGA BASS<sup>®</sup> SOUND SYSTEM WITH GROOVE SOUND POSITION** produces deeper, richer bass tones for more pleasing overall sound, with a special position for contemporary music that virtually doubles the bass response compared to regular Mega Bass<sup>®</sup>
- **11 PLAYBACK MODES** provide many choices in the playback of CDs: hear one track over and over, program a selection of tracks in a desired order, hear tracks in Shuffle (random) order, or select Track Loop Repeat which provides seamless access to all tracks
- **22 TRACK RMS PROGRAMMING** lets you customize the order in which tracks are played
- **RECHARGEABLE BATTERY (NH-DM2AA) SUPPLIED** uses advanced Nickel Metal Hydride technology and offers great savings and convenience over replaceable batteries
- **RESUME PLAY** re-starts the compact disc at exact track where playback last stopped instead of at the beginning of disc

- **2 POSITION AUTOMATIC VOLUME LIMITER SYSTEM** maintains volume output at levels below distortion threshold for cleaner sound reproduction
- **CARRYING CASE SUPPLIED** allows Discman to be protected while carried
- **AVAILABLE IN SILVER OR BLUE** to accommodate personal taste
