### Features

#### **1920x1080 Full HD 60p/24p Recording w/20.4MP still image capture**

The Sony® HDR-CX580V offers 1920 x 1080 high definition resolution letting you record your memories in exceptional Full High Definition quality. Capable of 60p/24p recording and playback via HDMI™ and compatible HDTV<sup>4</sup> providing stunning clarity and incredibly detailed and smoother playback of your memories.

#### **32GB embedded Flash Memory for up to 11 hours of recording<sup>1</sup>**

The built-in 32GB<sup>1</sup> embedded Flash memory can record and store up to 11 hours of high definition video footage (HD LP mode).

#### **Optical SteadyShot™ image stabilization w/ Active Mode**

Optical SteadyShot™ image stabilization with Active Mode compensates for greater degrees of camera shake to deliver stunningly smooth video from wide angle to full telephoto shooting. In addition, innovative 3-Way Shake-Canceling adds electronic roll stability for even smoother video capture.

### **CinemaTone presets and 24p recording for cinematic quality video**

For extra control over image expression, CinemaTone technology is used to deepen the color and recreate film-like color tones. Combined with 24p recording, you'll have some of the tools you need to fulfill your need for cinematic expression.

### **Advanced controls with expanded focus, zebra, and peaking**

The HDR-CX580V provides advanced capture and control features that are often considered the domain of professional cameras including expanded focus for precise manual focus control, zebra and peaking for precision focus and exposure adjustments.

### **Wide Angle G lens to capture more of what you want**

Experience the pinnacle of Sony® lens technology with the professional-quality G Lens. Engineered for superior optical performance, Sony G lenses deliver brilliant, accurate color reproduction and sharp, amazingly detailed images. In addition, the 29.8mm focal length in Photo Mode and Video Modes offers a broader perspective for enhanced wide angle shooting.

### **Back-illuminated Exmor R® CMOS sensor for superb low-light video**

Experience stunning low-light sensitivity with improved image clarity and drastically reduced grain with Sony's back-illuminated Exmor R® CMOS sensor. Designed for compact cameras and camcorders, the Exmor R® CMOS sensor relocates the photo diodes above the support circuitry, maximizing the light gathering area per pixel so you can shoot with better results in lower lighting conditions.

### **20x Extended Zoom to get even closer to the action**

Extended Zoom works in conjunction with 12x optical zoom to get even closer to the action while maintaining HD image quality.

### **3.0" touch-screen Xtra Fine LCD™ display (921K) w/TruBlack™ technology**

The 3.0" (16:9) Xtra Fine LCD™ screen (921K) displays sharp, bright, vivid images, letting you compose a shot more easily -- even outdoors, while enabling you to change settings to best represent the scene. TruBlack™ technology brings remarkably higher contrast delivering more natural, realistic colors and easier viewing in bright conditions by reducing glare.

### **Tracking Focus follows selected subjects in/out of the frame**

Tracking Focus works as an extension of Face Detection to allow you to select an object with a touch of the LCD and have the focus follow the selected object, even if it leaves the frame and returns.

### **5.1ch Surround mic for vivid and dynamic surround sound.**

Dolby® Digital 5.1 channel recording captures active sounds coming from all directions, so you can experience your home movies the way you experienced them while recording.

### **Wind noise reduction for clear voice recording**

Wind Reduction reduces noise and interference that is produced when wind passes over the microphone, giving you a clearer and more enjoyable sound experience.

### **Expanded recording/monitoring with mic/headphone jack**

Features dedicated mic and headphone inputs for expanded audio recording options and convenient monitoring of audio with headphones (external microphones and headphones sold separately).

### **Active Interface Shoe to attach intelligent accessories**

The Active Interface Shoe lets you mount Intelligent Accessories, such as external lights and microphones, which can help extend the capabilities of your camcorder.

### **Event Browse groups photos/videos for you for easy reference**

Event Browse conveniently groups your images and videos together for easier viewing. The date range that Event Browse groups your pictures and videos is easily adjusted to suit your needs. When used with the Highlight Playback feature, making and sharing a highlight reel from your event is easy and fun.

**Highlight Playback creates movies with transitions for you**

Why spend hours editing your movies when you can let your camcorder do it for you? Highlight Playback identifies and compiles key scenes into a short, entertaining movie complete with music and transitions. You can even pinpoint the exact scene you want to include in the highlight reel.

**Clear Phase stereo speakers for true and dynamic sound**

Bring your video alive with Clear Phase stereo speakers. Drawing on Sony’s high-end audio expertise, renown S-Master™ digital amplifier technology is utilized to produce more true-to-life sound.

**Geotagging with built-in GPS receiver & NAVTEQ® maps<sup>7</sup>**

A built-in GPS receiver<sup>7</sup> makes the HDR-CX580V an ideal choice for travelers. The receiver gives you the ability to view your current location on the LCD map display, as well as “tag” your shooting locations. Tagged videos and still images can be reviewed and played back using the Map Index function on the camcorder or once downloaded to your PC using the supplied PlayMemories Home software<sup>9</sup>. Additionally, the receiver automatically adjusts your camcorder’s clock to the proper time zone

**Direct Copy to external HDD without PC<sup>13</sup>**

Store your memories in a whole new way with the ability to copy videos from your camcorder directly to an external hard disk drive<sup>13</sup> (sold separately), all without a computer. Your camcorder can also access videos stored on the external hard drive for playback on your HDTV<sup>4</sup>, allowing you to utilize the camcorder’s handy playback features.

**Built-in USB cable for easy file transfer/charge**

The high-speed, built-in USB 2.0 cable allows for easy connection to your computer for charging or file transfer without having to remember separate cables. It also fits conveniently into the hand strap so it’s out of the way until you need it. Charging your camcorder is faster than ever now through the USB; for every two minutes of charge time you get one minute of recording time

**Intelligent Auto (180 different scene combinations possible)**

Intelligent Auto mode goes a step beyond traditional auto modes by analyzing your shot and then automatically selecting the appropriate settings from ten distinct scene modes and wind noise reduction. There are 180 different combinations possible: Landscape, Backlight, Twilight, Spotlight, Low light, Macro, Portrait, Baby, Walk, Tripod, Wind Noise Reduction. This camcorder utilizes an advanced sound processor and sophisticated noise reduction algorithms to reduce wind noise by up to 10db compared to other models. In addition to reducing low frequency noise, iAuto also suppresses mid- and upper-frequency noise, resulting in clearer, more enjoyable sound.

**Golf Shot**

Building on the slow-motion capture capabilities of Smooth Slow Record, Golf Shot captures a few seconds of motion as a sequence of up to 22 still images, which can be viewed/printed individually or as a composite “sequence shot” image, perfect for analyzing the nuances of a golf swing, tennis serve, and other fast action.

**Built-in Flash**

The built-in flash will assist in shedding light on your subject when shooting still photos.
