FD Mavica® Digital Still Camera

FEATURES

Removable 3.5" 2 HD Floppy Disk Storage Media:

Floppy disks continue to be inexpensive and easy to use. No hassles with connecting wires or interfaces, just insert into your PC's floppy drive. Each disk will store up to 40 still images per disk, in the standard mode.

1/4" 350K Pixel Progressive Scan CCD, 330K Pixels Effective:

The camera will automatically select the proper shutter speed to capture fast moving objects and freeze them in motion.

VGA Image Resolution:

VGA Resolution (640 x 480) is widely used and ideal for emailing or uploading to websites.

10X Optical Zoom Lens With Auto Focus:

10x Optical Zoom Lens with Auto Focus allows the camera to zoom in on distant subjects or using the built in Macro capability get within inches of your subject and focus automatically allowing for great close-up shots.

E-Mail Mode:

Stores a low-resolution 1/4 VGA (320 x 240) file in a separate folder from the original image for faster Internet uploads and downloads.

Intelligent Flash:

Provides the appropriate amount of flash for optimum brightness and color accuracy in virtually any lighting condition.

2.5" 84K Pixel LCD Display:

What you see is what you get! A large, full color LCD display viewfinder lets you preview or review your shots right on the camera back, with great detail and clarity.

6-Mode Program AE:

Allows quick and easy setting of proper exposure, shutter and depth-of-field for a variety of shooting environments. A/E modes include: Soft Portrait, Sports Lesson, Beach & Ski, Sunset & Moon, Landscape, Pan Focus

InfoLithium® Battery System with AccuPower™ Meter and Stamina®:

Rechargeable Lithium-Ion battery means no "memory effect" like other battery types can experience. Sony's exclusive AccuPower meter continuously displays the battery time remaining, in minutes, on the LCD screen.

In Camera Picture Effects (4):

Sepia, B&W, Negative Art and Solarization.

2X High Speed Floppy Disk Drive:

This exclusive technology developed by Sony allows for double the speed when recording or playing back images. The high-speed spindle motor combined with DSP also allows for quicker JPEG compression.

Disk Copy:

Disk Copy lets you make a copy of your images right inside the camera. Simply select Disk Copy from the menu with the original disk in the camera and the digital Mavica camera will save images in temporary memory. Place a blank disk in and you will have an exact copy of all your pictures to share with anyone.
